If any problem in this process, you can tell us the detailed information, our service staff will solve the problem for you.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q175-Q180):

NEW QUESTION # 175

Which of the following statements is true for the Form Designer?

- a) To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form.
- b) To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field.
- c) To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button.
- d) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.

- A. b, c, and d
- B. a, b, and d
- C. a, b, c, and d
- D. a, b, and c

Answer: D

Explanation:

https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/form-administration/concept/c_FormDesign.html

The Form Designer is a graphical interface for creating and customizing forms. The following statements are true for the Form Designer:

To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form. This will add the field to the form view without changing the table definition.

To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field. This will create a new column on the table and add the field to the form view.

To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button. This will remove the field from the form view but not from the table definition.

The following statement is false for the Form Designer:

To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form. This is incorrect because sections are not available in the Field Types tab. To add a section, click the Add Section button on the toolbar or right-click on the form and select Add Section. NEW QUESTION # 176

What are some of the benefits of extending an existing table such as the Task table when creating a new application?

- a) You can repurpose existing fields by simply changing the label.
- b) Use existing fields with no modifications.
- c) Existing logic from the parent table will be automatically applied to the new table.
- d) All of the parent table records are copied to the new table.

- A. a and b
- B. b and c
- C. a, b, c, and d
- D. a, b, and c

Answer: D

Explanation:

Extending an existing table such as the Task table when creating a new application has several benefits, such as:

You can repurpose existing fields by simply changing the label. For example, you can change the Short description field to Summary or Title for your new table.

You can use existing fields with no modifications. For example, you can use the Assigned to, Priority, and State fields for your new table without changing anything.

Existing logic from the parent table will be automatically applied to the new table. For example, you can inherit the Business Rules, Client Scripts, and UI Policies from the Task table for your new table.

The only option that is not true is d) All of the parent table records are copied to the new table. Extending a table does not copy any records from the parent table to the new table. It only creates a new table that inherits the fields and logic from the parent table.

NEW QUESTION # 177

What is the REST API Explorer used to do?

- A. Create sample code for sending REST requests to ServiceNow
- B. Find resources on the web for learning about REST
- C. Convert SOAP Message functions to REST methods
- D. Practice using REST to interact with public data providers

Answer: A

Explanation:

One of the uses of the ServiceNow REST API Explorer is to create sample code for sending REST requests to ServiceNow. The REST API Explorer is a tool that allows you to discover and test the ServiceNow REST APIs. You can select an API endpoint, set the HTTP method, parameters, headers, and body, and then execute the request. The REST API Explorer will show you the response status, headers, and body, as well as generate sample code for various languages and frameworks, such as cURL, Java, JavaScript, Node.js, Python, Ruby, and more. NEW QUESTION # 178

Which one of the following client-side scripts apply to Record Producers?

- A. UI Scripts and Record Producer Scripts
- B. UI Scripts and UI Actions
- C. Catalog Client Scripts and Catalog UI Policies
- D. Client Scripts and UI Policies

Answer: C

NEW QUESTION # 179

Here is the Business Rule script template:

```
(function executeRule (current, previous /*null when async*/) {  
    // ...  
})(current, previous);
```

This type of JavaScript function is known as:

- A. Anonymous

- B. Constructor
- C. Scoped
- **D. Self-invoking**

Answer: D

Explanation:

Self-invoking. Learn JavaScript!

This type of JavaScript function is known as self-invoking or immediately-invoked function expression (IIFE). It is a function that is defined and executed at the same time, without being assigned to a variable or being called by another function. It is often used to create a local scope for variables and avoid polluting the global namespace. Reference: [W3Schools - JavaScript Function Definitions], [MDN Web Docs - Immediately-invoked function expressions]

NEW QUESTION # 180

• • • • •

Our Certified Application Developer-ServiceNow study questions have a high quality, that mainly reflected in the passing rate. More than 99% students who use our CAD exam material passed the exam and successfully obtained the relating certificate. This undoubtedly means that if you purchased CAD exam guide and followed the information we provided you, you will have a 99% chance of successfully passing the exam. With CAD Exam Guide, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. CAD exam material not only helps you to save a lot of money, but also let you know the new exam trends earlier than others.
