2026 High Hit-Rate 1z0-1057-25: Valid Oracle Project Management Cloud 2025 Implementation Professional Exam Test

If you are willing to purchase valid Oracle 1z0-1057-25 reliable vce exam simulator, you should be eagle-eyed since there are so much information on the internet. Valid products are hard to tell, once you find them, you will feel as if you'd found a priceless treasure. Our 1z0-1057-25 reliable vce exam simulator will be your priceless products. Our passing rate is 100% recent two years. We can assure you that No Pass Full Refund. Our materials are valid and the best absolutely.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q108-Q113):

NEW QUESTION # 108

You want to create a few project roles so as to restrict access in the Project Financial Management work area to only the specific projects in which an employee is assigned as a team member. What are the two default project roles available to meet this requirement? (Choose two.)

- A. Project Manager- Security based on Project Assignment
- B. Project Billing Specialist- Security based on Contract BU
- C. Project Accountant- Security based on BU for Assets, Expenditure BU for Costs and Contract BU for Revenue
- D. Project Executive- Security based on Project Hierarchy
- E. Project Team Member- Security based on Project Assignment

Answer: A,E

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/applications-common/r13-update17d/faser/implementing-security-in-oracle-fusion-project-portfolio-management.htm#FASER1840867>

NEW QUESTION # 109

Your organization has a requirement to retrieve the value of the cost center segment based on the department. Which source can you use while defining the account rule to achieve this requirement?

- A. Project Organization Cost Center Segment
- B. Event Organization Cost Center Segment
- C. Expenditure Organization Cost Center Segment
- D. Expenditure Business Unit Cost Center Segment

Answer: C

Explanation:

The source that can be used while defining the account rule to achieve this requirement is Expenditure Organization Cost Center Segment. This source allows you to retrieve the value of the cost center segment based on the expenditure organization of the transaction. The expenditure organization is an attribute of a transaction that represents the organization that incurs or owns the cost of the transaction.

NEW QUESTION # 110

Your company creates a separate project for infrastructure services, so as to track these costs separately and then allocate to various projects that use the services of the infrastructure team. You want to allocate these costs by first attributing a fixed percentage of the source amount to each project and then spread it across tasks based on the actual labor hours charged to each task.

Which allocation basis method would you use to meet this requirement? (Choose the best answer.)

- A. target percentage and prorate
- B. prorate
- C. target percentage and spread evenly
- D. spread evenly

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapjc/allocate-project-costs.html#OAPJC94831>

* Spread Evenly

* The allocation rule divides the source pool amount equally among all the chargeable target tasks included in the rule. This is the most simple and direct basis method.

* Target Percentage and Spread Evenly

* Specify the percentage of the source pool that is required to allocate to each target line. The total specified target percentage must always equal 100 percent. The allocation rule calculates the amount to allocate to the target line, and then spreads the results evenly among the chargeable tasks.

* Prorate

* The allocation generation uses the attributes defined in the allocation rule to derive the rate at which the source pool amount is apportioned among the target projects and tasks. For this basis method, the allocation rule uses the basis attributes to apportion the source amount among all the tasks defined by the rule. The Prorate basis method provides precise control over how the rule distributes the source pool.

* Target Percentage and Prorate

* The allocation rule first uses the target percentage to calculate the amount to allocate to the line, and then apportions the results among all the tasks. The Target Percentage and Prorate basis method provides precise control over how the rule distributes the source pool.

NEW QUESTION # 111

You are set up as a Follower in Manage Tasks. Which two abilities can you accomplish? (Choose two.)

- A. Enter progress for tasks.
- B. Receive email notifications about changes that team members make to a task.
- C. View task details and the task activity stream.
- D. Edit task details.

Answer: B,C

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapem/execute-project-tasks- and-deliverables.htm#OAPEM1122082> Followers are persons who aren't working on the task but have an interest in reviewing the task progress. Only the resources and other followers can add followers to a task. If a resource assigns the task to another team member, the application automatically changes the original resource to a follower.

What's the difference between my tasks and tasks that I follow?

* You can edit task details and enter progress for your tasks on the Manage Tasks page. If a task has multiple resources, only the primary resource can edit the task.

* When you follow a task, you can view the task details and see the task activity stream. You receive e- mail notifications of changes that team members make to the task.

* If a resource reassigns the task to another team member, then the previous resource automatically becomes a follower.

NEW QUESTION # 112

Which three features are part of Oracle Fusion Functional Setup Manager?

- A. updating an implementation project task list by changing the opt-in configuration to suit the latest requirements
- B. modifying an existing implementation project task list by selecting more functional areas when needed
- C. guided task list for end-to-end setup requirements
- D. feature opt-in for a best fit configuration
- E. export and import services for setup data migration between environments

Answer: C,D,E

Explanation:

<https://docs.oracle.com/en/cloud/saas/applications-common/r13-update17d/oafsm/applications-cloud-using-functional-setup-manager.pdf> Functional Setup Manager offers the following:

* Standardized application configuration and setup experience

* Feature opt-in for a best fit configuration

* Flexible processes for managing setup:

Setup by functional areas for an adopt-as-you-go approach

Implementation projects to manage setup

Upload file to enter setup data in bulk

* Guided task list for end-to-end setup requirements

* Export and import services for setup data migration between environments

* Comprehensive reporting on setup data

NEW QUESTION # 113

.....
