Authoritative EMEA-Advanced-Support Authorized Exam Dumps - Easy and Guaranteed EMEA-Advanced-Support Exam Success

In traditional views, EMEA-Advanced-Support practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real exam. However, our EMEA-Advanced-Support learning questions are not doing that way. According to data from former exam candidates, the passing rate has up to 98 to 100 percent. There are adequate content to help you pass the EMEA-Advanced-Support Exam with least time and money.

Fortinet EMEA Advanced Support Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

What does the FortiGate 'set nat enable' command do in a firewall policy?

- A. Enables NAT for incoming traffic only
- B. Forces NAT to use a specific IP pool
- C. Disables NAT for the policy
- D. Enables NAT for outgoing traffic

Answer: D

Explanation:
The 'set nat enable' command in a FortiGate firewall policy enables Source NAT (SNAT) for outgoing traffic, typically rewriting the source IP to the FortiGate's interface IP or an IP pool. It does not disable NAT (B), force a specific pool (C), or limit to incoming traffic (D). Exact extract: "The 'set nat enable' command in a firewall policy enables Source NAT, rewriting the source IP address of outgoing traffic to the egress interface IP or a configured NAT pool."

NEW QUESTION # 14
What happens when a FortiGate's CPU enters conserve mode?

- A. Proxy-based inspection is disabled
- B. All traffic is blocked
- C. New sessions are dropped
- D. Routing protocols are disabled

Answer: A

Explanation:
When a FortiGate's CPU enters conserve mode due to high load, proxy-based inspection (e.g., web filtering, DLP) is disabled to reduce resource usage, while flow-based inspection continues. Traffic isn't fully blocked (A), new sessions may still be processed (C), and routing protocols (D) are unaffected. Exact extract: "In conserve mode, FortiGate disables proxy-based inspection to reduce CPU and memory load, switching to flow-based inspection to maintain performance."

NEW QUESTION # 15
Which FortiGate feature allows inspection of encrypted SSL/TLS traffic?

- A. SSL Inspection
- B. Deep Packet Inspection
- C. Application Control
- D. Web Filtering

Answer: A

Explanation:
FortiGate's SSL Inspection feature decrypts and inspects SSL/TLS traffic to detect threats or enforce policies, using techniques like full SSL inspection or certificate inspection. Deep Packet Inspection (A) is a broader term, Application Control (C) identifies apps, and Web Filtering (D) blocks URLs, not specific to SSL. Exact extract: "SSL Inspection allows FortiGate to decrypt and inspect SSL/TLS traffic to detect hidden threats or enforce security policies, supporting full or certificate-based inspection."

NEW QUESTION # 16
What does the below route indicate?

- A. The destination network is locally connected on that interface
- B. It is a dummy route in the routing table
- C. The device does not know the destination
- D. The destination network can be reached via any gates

Answer: A

Explanation:

A route with a directly connected interface (no gateway) indicates the destination network is locally attached to that interface on the FortiGate. This is common for networks directly connected to the device's interfaces.

Option A is vague, B is incorrect as it's not a dummy route, and D suggests an unknown route, which isn't the case. Exact extract: "A directly connected route indicates that the destination network is locally attached to the interface specified in the routing table... No gateway is required for such routes as the FortiGate is directly connected to the network."

NEW QUESTION # 17

Which FortiGate feature allows for policy-based routing?

- A. Dynamic Routes
- B. SD-WAN Rules
- C. Static Routes
- D. Policy Routes

Answer: D

Explanation:
Policy Routes in FortiGate allow routing decisions based on criteria like source, destination, or service, overriding the default routing table. SD-WAN Rules (A) are for WAN optimization, Static Routes (C) are fixed, and Dynamic Routes (D) are protocol-based, not policy-based. Exact extract: "Policy Routes allow FortiGate to make routing decisions based on user-defined criteria, such as source/destination IPs or services, overriding standard routing."

NEW QUESTION # 18

......

By using the EMEA-Advanced-Support desktop practice exam software, you can sit in real exam like scenario. This EMEA-Advanced-Support practice exam simulates the complete environment of the actual test so you can overcome your fear about appearing in the Fortinet EMEA-Advanced-Support Exam. FreeCram has designed this software for your Windows laptops and computers.
