UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q32-Q37):

NEW QUESTION # 32

According to best practices, what is an acceptable way of validating an application's state before proceeding with certain steps in a process during testing?

- A. Avoid waiting for the desired application state and directly proceed with other interactions.

- B. Validate an application's state by implementing hardcoded delays before proceeding with other interactions.
- C. Use as many hardcoded delays as needed to ensure the application has reached the desired state before proceeding with other interactions.
- D. Consider applying validation measures which include using extra activities that wait for the desired application state before other interactions.

Answer: D

Explanation:

According to best practices, it is important to apply validation measures such as using activities that wait for the desired application state to be reached before proceeding with other interactions. This ensures stability and reduces the risk of errors, as waiting for a specific condition or state before continuing ensures that the application is ready for the next action.

NEW QUESTION # 36

In which of the following cases is the Self-Hosted agent needed when creating a pipeline using the UiPath Integration for Azure DevOps?

- A. In cases where UiPath Orchestrator is not available.
- B. In cases where the Orchestrator is not accessible from the public internet.
- C. In cases where an External Application cannot be created in order to connect to UiPath Orchestrator.
- D. In cases where Cross-Platform projects are built and deployed.

Answer: B

Explanation:

A Self-Hosted agent is required when creating a pipeline using the UiPath Integration for Azure DevOps in cases where Orchestrator is not accessible from the public internet. This agent acts as an intermediary to facilitate communication between the

DevOps pipeline and Orchestrator when direct internet access is not available.
