Practice Test Managing-Cloud-Security Fee | Updated Managing-Cloud-Security Dumps

At the 2Pass4sure, you can download top-notch and easy-to-use Managing-Cloud-Security practice test material quickly. Just take the smart and the best decision of your career and get registered for WGU Managing Cloud Security (JY02) Managing-Cloud-Security Exam and download 2Pass4sure Managing-Cloud-Security PDF Questions and practice tests and start this journey right now. And 2Pass4sure provides 365 days updates.

The WGU Managing-Cloud-Security PDF questions file of 2Pass4sure has real WGU Managing-Cloud-Security exam questions with accurate answers. You can download WGU PDF Questions file and revise WGU Managing Cloud Security (JY02) Managing-Cloud-Security exam questions from any place at any time. We also offer desktop Managing-Cloud-Security practice exam software which works after installation on Windows computers. The Managing-Cloud-Security web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based Managing-Cloud-Security Practice Exam. You can access the WGU Managing-Cloud-Security web-based practice test via Mac, Linux, iOS, Android, and Windows. WGU Managing Cloud Security (JY02) Managing-Cloud-Security practice test (desktop & web-based) allows you to design your mock test sessions.

Updated Managing-Cloud-Security Dumps & Managing-Cloud-Security Question Explanations

To let the client be familiar with the atmosphere of the Managing-Cloud-Security exam we provide the function to stimulate the exam and the timing function of our Managing-Cloud-Security study materials to adjust your speed to answer the questions. We provide the stimulation, the instances and the diagrams to explain the hard-to-understand contents of our Managing-Cloud-Security Study Materials. For these great merits we can promise to you that if you buy our Managing-Cloud-Security study materials you will pass the test without difficulties.

WGU Managing Cloud Security (JY02) Sample Questions (Q49-Q54):

NEW QUESTION # 49
An organization is informed by its cloud provider that a storage device containing some of the organization's data has been seized as possible evidence in a court case, but the organization itself is not involved in any ongoing court cases. Which characteristic of a cloud environment architecture makes such a scenario possible?

- A. Virtualization
- B. Platform as a service (PaaS)
- C. Software as a service (SaaS)
- D. Multitenancy

Answer: D

Explanation:
The scenario arises because of multitenancy, a core cloud characteristic where multiple customers share the same physical infrastructure. If a storage device containing multiple tenants' data is seized as part of a case involving another customer, unrelated organizations may still be affected.
Virtualization enables resource abstraction, but multitenancy specifically introduces shared infrastructure risks. SaaS and PaaS are service models, not architectural characteristics.
Multitenancy offers efficiency and cost benefits but raises challenges for data sovereignty, legal jurisdiction, and evidentiary control. Providers mitigate these risks through encryption, logical isolation, and contractual terms. Customers must understand these implications when handling regulated or sensitive data in cloud environments.

NEW QUESTION # 50
Which component allows customers to transfer data into and out of a cloud computing vendor's environment?

- A. Virtual display
- B. Firewall
- C. Load balancer
- D. Network

Answer: D

Explanation:
The network is the component that enables customers to transfer data into and out of a cloud environment. It provides the connectivity through which data is uploaded, downloaded, and exchanged between customer systems and cloud infrastructure.
Firewalls protect the network by filtering traffic, load balancers distribute requests across resources, and virtual displays present interfaces, but none directly facilitate the transfer of data.
In cloud models, secure networking is critical. Protocols like TLS encrypt traffic, while VPNs and private links provide additional isolation. Reliable networking ensures availability, while strong controls safeguard confidentiality and integrity. Customers must ensure that the cloud provider offers secure, high-performance network services to support business needs.

NEW QUESTION # 51
An organization is going through the process of selecting a new enterprise resource management (ERM) vendor. The organization has already selected the vendor and is now preparing to go through the onboarding process. Which specific issues should be discussed between the organization and the vendor during this phase?

- A. Ensuring the vendor has securely destroyed all confidential information
- B. Deciding how to respond to the request for proposal (RFP)
- C. Identifying the business need the vendor will address
- D. Verifying the details of the contract and arrangements for data transfer

Answer: D

Explanation:
Once a vendor has been selected, the onboarding phase requires contractual verification and technical arrangements for data transfer. This step ensures that service levels, compliance requirements, encryption standards, and responsibilities are clearly defined before operations begin.
Options such as identifying the business need or responding to the RFP are pre-selection activities. Ensuring secure destruction of data is relevant to offboarding, not onboarding. Therefore, the most critical onboarding task is verifying the contract details and ensuring secure data transfer agreements.
Discussing these issues protects the organization from legal disputes, ensures smooth technical integration, and supports compliance with frameworks such as GDPR and PCI DSS. It also defines the scope of vendor accountability in case of security incidents.

NEW QUESTION # 52
An organization is implementing a new hybrid cloud deployment. Before granting access to any of the resources, the security team wants to ensure that all employees are checked against a database to see if they are allowed to access the requested resource. Which type of security control is the organization leveraging for its employees?

- A. Authentication
- B. Authorization
- C. Antispyware program
- D. Web application firewall (WAF)

Answer: B

Explanation:
The described control isauthorization, which occurs after authentication. Authorization determines what resources a user can access based on their role, attributes, or policies stored in an access control database.
Authentication confirms identity, but authorization validates permissions. WAFs protect applications from malicious traffic, and antispyware tools detect malware. Neither applies to access decisions.
By checking users against a database of permissions, the organization enforces the principle of least privilege, ensuring employees only access the resources necessary for their role. This strengthens data protection, reduces insider threats, and aligns with compliance requirements for access governance.

NEW QUESTION # 53
Which U.S. standard is used by federal government agencies to manage enterprise risk?

- A. The Statement on Standards for Attestation Engagements 18 (SSAE 18)
- B. The Committee of Sponsoring Organizations (COSO) framework
- C. International Organization for Standardization (ISO) 37500
- D. The National Institute of Standards and Technology (NIST) SP 800-37

Answer: D

Explanation:
Federal agencies in the U.S. rely onNIST SP 800-37, Risk Management Framework (RMF), to manage enterprise risk. RMF provides a structured process for categorizing systems, selecting controls, implementing safeguards, assessing effectiveness, authorizing operations, and continuous monitoring.
ISO 37500 deals with outsourcing governance, SSAE 18 governs service provider audits, and COSO is a corporate governance framework but not specific to federal agencies.
NIST RMF is integrated with the Federal Information Security Modernization Act (FISMA) requirements, ensuring agencies manage cybersecurity risks consistently. Its adoption is expanding beyond government into industries seeking comprehensive, repeatable risk management processes.

NEW QUESTION # 54
......

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our Managing-Cloud-Security training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. With our Managing-Cloud-Security Study Guide, you will find that studying knowledge and making a progress is quite interesting and easy. And the most important is that you will get the best reward according to the Managing-Cloud-Security certification.

Updated Managing-Cloud-Security Dumps: https://www.2pass4sure.com/Courses-and-Certificates/Managing-Cloud-Security-actual-exam-braindumps.html

Our products are officially certified, and our Managing-Cloud-Security exam materials are definitely the most authoritative product in the industry, Our Managing-Cloud-Security Materials study materials boost superior advantages and the service of our products is perfect, WGU Practice Test Managing-Cloud-Security Fee When you are at the cafe, you can read and scan your papers and study two questions, WGU Practice Test Managing-Cloud-Security Fee Unlimited Access Mega Packs This is a special offer for candidates planning take several certification exams.

Social clubs are coworking spaces, By Jim Steger, Mike Snyder, Brendan Landers, Our products are officially certified, and our Managing-Cloud-Security Exam Materials are definitely the most authoritative product in the industry.

You Can Never Think About Failure With WGU Managing-Cloud-Security Exam Dumps

Our Managing-Cloud-Security Materials study materials boost superior advantages and the service of our products is perfect, When you are at the cafe, you can read and scan your papers and study two questions.

Unlimited Access Mega Packs This is a special offer for candidates planning take several certification exams, What's more important, the printed Managing-Cloud-Security exam dump learning materials is easy to carry.
