## Place Your Order Today and Get Free Cisco 300-435 Questions Updates

The price for 300-435 learning materials is reasonable, and no matter you are a student or an employee, you can afford the expense. In addition, 300-435 exam dumps are edited by professional experts, and therefore the quality can be guaranteed. 300-435 exam materials cover most of the knowledge points for the exam, and you can master them through study. In order to let you know the latest information for the exam, we offer you free update for 365 days after purchasing, and the update version for 300-435 Exam

Dumps will be sent to you automatically.

## Cisco Automating and Programming Cisco Enterprise Solutions Sample Questions (Q131-Q136):

### NEW QUESTION # 131

Which curl command is used to update the SNMP community of network ID "1234567" to read-only?

- A. Option D
- **B. Option B**
- C. Option C
- D. Option A

**Answer: B**

Explanation:

Explanation

PUT is used to update the snmp network ID. The access has to be community and not users. Therefore, option B is correct.

### NEW QUESTION # 132

A programmer is creating a Maraki webhook Python script to send a message to Webex Teams.

Which two elements should be configured to create this script? (Choose two)

- A. gRPC credentials
- **B. webhook server secret**
- **C. Webex Teams access token**
- D. XML formatted request
- E. user authentication count

**Answer: B,C**

### NEW QUESTION # 133

Which function is available in NETCONF and unavailable in RESTCONF?

- A. Support JSON and data encoding.
- **B. Uses the YANG data models to communicate.**
- C. Validates the content of a candidate datastore.
- D. Configuration changes are automatically activated.

**Answer: B**

### NEW QUESTION # 134

Refer to the exhibit. An engineer must split the network ENAUTO by using Cisco Meraki APIs.

Which code snippet must be added to the box in the code to complete the Python code?

- A. `response = requests.request('PATCH', url, headers=headers, data = payload)`
- B. `response = requests.request('GET', url, headers=headers, payload = none)`
- C. `response = requests.request('PUT', url, headers=headers, payload = none)`
- **D. `response = requests.request('POST', url, headers=headers, data = payload)`**

**Answer: D**

Explanation:

To perform a network split using the Cisco Meraki API, the correct method is a POST request.

The code must use:

`response = requests.request('POST', url, headers=headers, data=payload)` This correctly sends the API request with the appropriate headers and payload (even if None).
