Original COG170 Questions, Latest COG170 Exam Cram

A Epic Cogito Fundamentals will not only expand your knowledge but it will polish your abilities as well to advance successfully in the world of EPIC. Real EPIC COG170 Exam QUESTIONS certification increases your commitment and professionalism by giving

you all the knowledge necessary to work in a professional setting. We have heard from thousands of people who say that using the authentic and Reliable COG170 Exam Dumps was the only way they were able to pass the COG170.

EPIC Epic Cogito Fundamentals Sample Questions (Q233-Q238):

NEW QUESTION # 233

A hospital needs to benchmark its surgical case cancellation rates against Epic community data in a Radar dashboard, with drill-down to case details and dynamic thresholds based on surgical specialty. Which configuration achieves this complex requirement?

- A. Configure the Analytics Catalog to query Epic's Clarity database with drill-down and specialty filters.
- **B. Use Dashboard Metrics with Epic's benchmarking database, configure a Hyperspace activity link, and enable Specialty-Based Dynamic Thresholds in the Component Editor.**
- C. Create a SlicerDicer session with a benchmarking filter, enable drill-down, and add specialty-based slices for thresholds.
- D. Build a Reporting Workbench report with community benchmarking, link to the dashboard, and configure specialty-based summary targets.

Answer: B

NEW QUESTION # 234

A SlicerDicer session in a dashboard component, using the Patients data model, returns no data despite correct filters and an enabled dashboard. The session is linked to Caboodle, and some users report no visibility or drill-down capability. What are the causes, and how should they be addressed?

- **A. The data is not extracted to Caboodle, and users lack Report Group or activity link security points; schedule ETL processes, update the Access form, and configure a Hyperspace activity link.**
- B. The Patients data model is disabled, and the dashboard is not interactive; enable the data model and configure interactivity.
- C. The component's data source is misconfigured, and the session is outdated; align the data source and rebuild the session.
- D. The session's Report Group is misaligned, and the data source is incorrect; align the Report Group and switch to Chronicles.

Answer: A

NEW QUESTION # 235

A hospital needs to benchmark its patient satisfaction scores against Epic community data in a Radar dashboard, with drill-down to survey details, dynamic thresholds based on department, and export to external systems. Which configuration achieves this complex requirement?

- A. Build a Reporting Workbench report with community benchmarking, link to the dashboard, configure department-based targets, and enable export.
- B. Create a SlicerDicer session with a benchmarking filter, enable drill-down, add department-based slices, and enable export in SlicerDicer.
- C. Configure the Analytics Catalog to query Epic's Clarity database with drill-down, department filters, and export functionality.
- **D. Use Dashboard Metrics with Epic's benchmarking database, configure a Hyperspace activity link, enable Department-Based Dynamic Thresholds, and add export in Component Settings.**

Answer: D

NEW QUESTION # 236

A metric-based Radar dashboard component, linked to a SlicerDicer session, displays varying patient satisfaction scores across regions, despite using Dashboard Resources and a correctly configured session in Caboodle. The dashboard is enabled, but regional managers report discrepancies in colored threshold indicators. What configuration is likely causing this, and how should it be resolved?

- A. The SlicerDicer session is not synchronized with Caboodle; increase ETL frequency and rebuild the session.
- **B. The Summary Target Lookup Method is set to "Region-Specific"; change it to "Standard" and verify Threshold Overrides in the Component Editor's Output Format form.**

- C. Regional managers lack Reporting Workbench security classes; update their security settings.
- D. The dashboard's Access form excludes regional Report Groups; add the missing groups.

Answer: B

NEW QUESTION # 237

What is a Security Class?

- A. A field that limits MyChart access
- B. A group of templates that define report filters
- C. A record that defines which actions a user can perform
- D. A setting for record retention policies

Answer: C
