NEW QUESTION # 30

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- A. Multi-tenant server

- B. Perpetual license
- C. Software installation on customer site
- D. Lower total cost of ownership

Answer: A,D

Explanation:

A public cloud is a type of cloud computing in which a third-party service provider makes computing resources available to users over the public Internet. Some characteristics of public cloud are:

* Multi-tenant server: Public cloud uses shared infrastructure, where multiple users or organizations can access the same resources, such as compute, storage, or applications. The data and applications of each user are isolated and secured from others. This allows for efficient utilization of resources and scalability.

* Lower total cost of ownership: Public cloud reduces the upfront and operational costs of IT, as users do not need to purchase, install, or maintain hardware or software. Users only pay for the resources they use, and can benefit from the economies of scale and continuous innovation of the cloud service provider.
