

Reliable L3M6 Test Dumps & L3M6 Valid Exam Online

BONUS!!! Download part of TestKingIT L3M6 dumps for free: <https://drive.google.com/open?id=1CXqOk9TYIbD7txkrMIT9igRTynx8qCM>

If you don't have enough time to study for your CIPS Socially Responsible Warehousing and Distribution exam, TestKingIT provides CIPS L3M6 Pdf questions. You may quickly download CIPS L3M6 exam questions in PDF format on your smartphone, tablet, or desktop. You can Print CIPS L3M6 pdf questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go. CIPS evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for CIPS L3M6 Exam Questions for three months after the purchase to ensure you are studying the most recent CIPS solutions.

CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.
Topic 2	<ul style="list-style-type: none">Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.

Topic 3	<ul style="list-style-type: none"> Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.
Topic 4	<ul style="list-style-type: none"> Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.

L3M6 Valid Exam Online, Technical L3M6 Training

If you are a new comer for our L3M6 practice engine, you may doubt a lot on the quality, the pass rate, the accuracy and so on. You can go for the free demos of the L3M6 learning braindumps and make sure that the quality of our L3M6 Exam Questions And Answers which can serve you the best. You are not required to pay any amount or getting registered with us for downloading free demos of our L3M6 training guide. They are all free for you to download.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q179-Q184):

NEW QUESTION # 179

What methods can an organization use to reduce a supply chain's negative impact on the environment? Select all that apply.

- A. Reducing energy consumption and emissions in transport by using less fuel
- B. Purchasing from environmentally aware and sustainable suppliers
- C. Standardizing product design for easier delivery
- D. Purchasing from non-environmentally aware and sustainable suppliers

Answer: A,B,C

Explanation:

Organizations can mitigate their supply chain's environmental impact through strategic methods, as outlined in the CIPS L3M6 module:

- * A. Purchasing from Environmentally Aware Suppliers: Sourcing from suppliers with sustainable practices (e.g., renewable energy use, ethical certifications) reduces upstream environmental harm, aligning with green procurement principles.
- * B. Non-Environmentally Aware Suppliers: This contradicts sustainability goals, as it perpetuates harmful practices (e.g., high emissions, waste), making it incorrect.
- * C. Standardizing Product Design: Simplifying designs (e.g., modular packaging) enhances transport efficiency, reducing fuel use and emissions-a practical sustainability tactic.
- * D. Reducing Energy Consumption: Using fuel-efficient vehicles or optimizing routes lowers emissions, a direct environmental benefit in logistics.

The exclusion of B reflects the focus on proactive environmental responsibility in LO2, emphasizing measurable reductions in ecological footprints.

Reference:

NEW QUESTION # 180

Buying traditional lightbulbs is OK because they're cheaper.

- A. FALSE

- B. TRUE

Answer: A

Explanation:

While traditional (incandescent) lightbulbs may be cheaper upfront, they are less energy-efficient and have a shorter lifespan compared to sustainable alternatives like LED bulbs. The CIPS L3M6 module stresses whole-life costing in sustainable procurement, where environmental impact and long-term costs outweigh initial savings. Choosing traditional bulbs contradicts CSR goals of reducing energy consumption and environmental harm.

Reference:

NEW QUESTION # 181

Which of the following are ways to reduce the impact on the environment of activities that produce carbon emissions? Select all that apply.

- A. Reduce water consumption
- B. All the above
- C. Recycle more waste so less ends up in landfill
- D. Reduce the amount of waste produced

Answer: B

Explanation:

Reducing carbon emissions involves multiple strategies, all of which apply here per the CIPS L3M6 module:

- * A. Recycling: Diverting waste from landfills reduces methane emissions (a potent greenhouse gas) from decomposition.
- * B. Waste Reduction: Less waste production lowers the energy and emissions tied to manufacturing and disposal processes.
- * C. Water Conservation: While indirectly linked, reducing water use cuts energy for pumping/treatment, lowering associated emissions.

These methods collectively address the environmental footprint of procurement and supply activities, supporting LO2's holistic approach to sustainability. For example, recycling steel in construction saves 74% of the energy used in virgin production, directly cutting emissions.

Reference:

NEW QUESTION # 182

Transportation is responsible for 13% of greenhouse emissions.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Transportation accounts for approximately 13% of global greenhouse gas emissions, per data cited in the CIPS L3M6 module (aligned with IPCC estimates). This includes road, air, rail, and maritime transport, with road vehicles dominating. In supply chains, logistics (e.g., trucking goods) significantly contributes, making this a true statement and a focal point in LO2 for emission reduction strategies like green transport adoption.

Reference:

NEW QUESTION # 183

The World Health Organization found that people who have a bad view out of their window are _____ % more likely to develop depression.

- A. 40%
- B. 20%
- C. 30%

- D. 10%

Answer: A

Explanation:

The WHO links poor visual environments (e.g., industrial views) to a 40% increased depression risk, per CIPS L3M6 module data. This ties to LO2's visual pollution focus—e.g., a warehouse blocking greenery affects mental health, reinforcing the need for sustainable site planning.

TestKingIT CIPS L3M6 practice test software is the answer if you want to score higher in the Socially Responsible Warehousing and Distribution (L3M6) exam and achieve your academic goals. Don't let the Socially Responsible Warehousing and Distribution (L3M6) certification exam stress you out! Prepare with our Socially Responsible Warehousing and Distribution (L3M6) exam dumps and boost your confidence in the Socially Responsible Warehousing and Distribution (L3M6) exam. We guarantee your road toward success by helping you prepare for the CIPS L3M6 certification exam. Use the best TestKingIT CIPS L3M6 practice questions to pass your Socially Responsible Warehousing and Distribution (L3M6) exam with flying colors!
