

Oracle 1Z0-1084-25 Exam Experience & Best 1Z0-1084-25 Practice

P.S. Free & New 1Z0-1084-25 dumps are available on Google Drive shared by CertkingdomPDF: <https://drive.google.com/open?id=1IZXRcTcc1De2Zp6LwzKMsRHJkJasOmPc>

Do you want to find a job that really fulfills your ambitions? That's because you haven't found an opportunity to improve your ability to lay a solid foundation for a good career. Our 1Z0-1084-25 learning materials are carefully compiled by industry experts based on the examination questions and industry trends in the past few years. The knowledge points are comprehensive and focused. You don't have to worry about our learning from 1Z0-1084-25 Exam Question. We assure you that our 1Z0-1084-25 learning materials are easy to understand and use the fewest questions to convey the most important information.

We are committed to helping you pass the exam and get the certificate as soon as possible. 1Z0-1084-25 exam bootcamp of us have the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam. 1Z0-1084-25 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the 1Z0-1084-25 exam bootcamp.

Best Oracle 1Z0-1084-25 Practice | 1Z0-1084-25 Reliable Study Materials

As we all know, if we want to pass a exam successfully, preparation is necessity, especially for the 1Z0-1084-25 exam. Our product will help you to improve your efficiency for the preparation of the 1Z0-1084-25 exam with list the knowledge points of the exam. And this will help the candidates to handle the the basic knowledge, so that you can pass the 1Z0-1084-25 Exam more easily, and the practice materials is free update for one year, and money back guarantee. Possession of the practice materials of our company, it means that you are not worry about the 1Z0-1084-25 exam, since the experts of experienced knowledge are guiding you. So just take action now.

Oracle Cloud Infrastructure 2025 Developer Professional Sample Questions (Q88-Q93):

NEW QUESTION # 88

You have two microservices, A and B running in production. Service A relies on APIs from service B. You want to test changes to service A without deploying all of its dependencies, which includes service B. Which approach should you take to test service A?

- A. This is not possible because service B is a dependency.
- B. Test using a previous test version of service B.

- C. Test using an API mock of service B.
- D. Test using the current production version of service B.

Answer: C

Explanation:

The correct answer is: Test using an API mock of service B. To test service A without deploying all of its dependencies, including service B, you can use an API mock of service B. An API mock is a simulated version of the API that mimics the behavior of the actual service. By using an API mock, you can isolate the testing of service A and simulate the responses and behavior of service B's APIs. With an API mock, you can define the expected responses and behavior of service B's APIs, allowing you to test the integration between service A and the mocked version of service B. This approach enables you to verify the functionality of service A without relying on the availability or changes in the actual service B. By decoupling the dependencies and using an API mock, you can perform independent testing of service A, ensuring its functionality in isolation.

NEW QUESTION # 89

You are building a cloud native serverless travel application with multiple Oracle Functions in Java, Python, and Node.js. You need to build and deploy these functions to a single application named travel-app. Which command will help you complete this task successfully?

- A. `fn deploy--app travel-app --all`
- B. `fn app --app travel-app deploy --ext java pyjs`
- C. `fn app deploy --app travel-app --all`
- D. `fn function deploy app travel-app--all`

Answer: A

Explanation:

The correct answer is: `fn deploy --app travel-app --all` Explanation: To build and deploy multiple Oracle Functions as part of a single application named "travel-app," you can use the `fn deploy` command with the appropriate options. The command `fn deploy --app travel-app --all` is the correct syntax. Here's what each part of the command does: `fn deploy`: This command is used to deploy functions and applications in Oracle Functions. `--app travel-app`: This option specifies the application name as "travel-app," indicating that you want to deploy functions to this application. `--all`: This option indicates that you want to deploy all the functions within the application. By using `fn deploy --app travel-app --all`, you can build and deploy all the functions in your travel application across different programming languages (Java, Python, and Node.js) to the "travel-app" application in Oracle Functions.

NEW QUESTION # 90

Which THREE are valid statements regarding the OCI Container Engine for Kubernetes (OKE) service? (Choose three.)

- A. There is a limit of three clusters within each region, but there is no limit on the number of nodes and pods you can create within each cluster.
- B. OKE cannot use existing network resources for the creation of a new cluster.
- C. You must have access to an Oracle Cloud Infrastructure tenancy. Your tenancy must have sufficient quota on different types of resources.
- D. OKE automatically creates and configures new network resources for the new cluster.

Answer: A,C,D

Explanation:

The valid statements regarding the OCI Container Engine for Kubernetes (OKE) service are: OKE automatically creates and configures new network resources for the new cluster. When creating a new OKE cluster, the service automatically provisions and configures the necessary network resources, such as VCNs, subnets, route tables, security lists, and load balancers, to support the cluster. Your tenancy must have sufficient quota on different types of resources. Before creating an OKE cluster, you need to ensure that your Oracle Cloud Infrastructure (OCI) tenancy has sufficient quota for the required resources, such as compute instances, block storage, networking resources, and load balancers. You must have access to an Oracle Cloud Infrastructure tenancy. To use the OKE service, you need to have access to an OCI tenancy. This means you must have a valid OCI account and the necessary permissions to create and manage resources within the tenancy. The following statements are not valid: OKE cannot use existing network resources for the creation of a new cluster. OKE creates new network resources specifically for the cluster, and it does not support using existing network resources. There is a limit of three clusters within each region, but there is no limit on the number of nodes and pods you can create within each cluster. This statement is incorrect. There is no specific limit on the number of clusters

you can create within a region in OKE. However, there may be certain limits or quotas on resources that can impact the number of clusters you can create.

NEW QUESTION # 91

Which is ONE of the differences between a microservice and a serverless function?

- A. Microservices are stateless while serverless functions are stateful.
- B. Microservices always use a data store while serverless functions never use a data store.
- C. Microservices are triggered by events while serverless functions are not.
- D. Microservices are used for long running operations while serverless functions are used for short running operations.

Answer: D

Explanation:

The correct answer is: Microservices are used for long running operations while serverless functions are used for short running operations. One of the key differences between microservices and serverless functions is the duration of their execution.

Microservices are typically designed to handle long-running operations and may continuously run and process requests as part of a larger system. They are often deployed and managed as long-lived services. On the other hand, serverless functions are designed to handle short-lived operations or tasks that execute in response to specific events or triggers. They are event-driven and execute only when invoked, providing a lightweight and ephemeral computing model. Serverless functions are often used for executing small, isolated pieces of code without the need for managing infrastructure or scaling concerns. While both microservices and serverless functions can be stateless or stateful depending on the specific implementation, the key distinction lies in the typical duration and execution pattern of these components within an application architecture.

NEW QUESTION # 92

Who is responsible for patching, upgrading, and maintaining the worker nodes in Oracle Cloud Infrastructure (OCI) Container Engine for Kubernetes (OKE)? (Choose the best answer.)

- A. Independent Software Vendors
- B. It is automated
- C. Oracle Support
- D. The user

Answer: D

Explanation:

The user is responsible for patching, upgrading, and maintaining the worker nodes in Oracle Cloud Infrastructure (OCI) Container Engine for Kubernetes (OKE). In OKE, the user has control over the worker nodes, which are the compute instances that run the Kubernetes worker components. As the user, you are responsible for managing and maintaining these worker nodes, including tasks such as patching the underlying operating system, upgrading Kubernetes versions, and performing any necessary maintenance activities. While Oracle provides the underlying infrastructure and support services, including managing the control plane and ensuring the availability of the OKE service, the responsibility for managing the worker nodes lies with the user. This allows you to have control and flexibility in managing your Kubernetes environment according to your specific needs and requirements.

NEW QUESTION # 93

.....

For candidates who are going to buying 1Z0-1084-25 exam materials, the pass rate for the exam is quite important, and it will decide whether you can pass your exam successfully or not. Pass rate for is 98.65% for 1Z0-1084-25 exam materials, and if you choose us, we can help you pass the exam just one time. In addition 1Z0-1084-25 Exam Materials are high quality and accuracy, and they can improve your efficiency. We are pass guarantee and money back guarantee for 1Z0-1084-25 exam dumps, if you fail to pass the exam, we will give you full refund.

Best 1Z0-1084-25 Practice: <https://www.certkingdompdf.com/1Z0-1084-25-latest-certkingdom-dumps.html>

So you have no reason to worry that you will waste your money if you still don't get the Oracle 1Z0-1084-25 certificate after you buy it, Oracle 1Z0-1084-25 Exam Experience In addition, our company has established a strict quality standard, All in all we have confidence about 1Z0-1084-25 exam that we are the best, Please rest assured that our 1Z0-1084-25 exam prep and 1Z0-1084-25

Correcting an Old Photo CD Image, If the forwarding 1Z0-1084-25 page has already committed output to the browser by flushing the buffer, then the forwarding will fail, So you have no reason to worry that you will waste your money if you still don't get the Oracle 1Z0-1084-25 certificate after you buy it.

In addition, our company has established a strict quality standard, All in all we have confidence about 1Z0-1084-25 exam that we are the best, Please rest assured that our 1Z0-1084-25 exam prep and 1Z0-1084-25 training online will be the best choice for candidates.
