## High Pass Rate EMEA-Advanced-Support Exam Questions Convey All Important Information of EMEA-Advanced-Support Exam

The purchase process of our EMEA-Advanced-Support question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. The PDF version of our EMEA-Advanced-Support study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our EMEA-

Advanced-Support question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our EMEA-Advanced-Support exam torrent. Maybe you think it does not prove the practicality of the PDF version, do not worry, we are going to tell us another special function about the PDF version of our EMEA-Advanced-Support study tool.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Which FortiGate feature supports load balancing across multiple WAN links?

- A. Link Aggregation
- B. Virtual Routing
- C. SD-WAN
- D. Multi-Path Routing

**Answer: C**

Explanation:

FortiGate's SD-WAN feature enables load balancing and intelligent traffic steering across multiple WAN links based on criteria like bandwidth, latency, or application. Link Aggregation (B) bonds interfaces, Virtual Routing (C) is VRF, and Multi-Path Routing (D) is not a standard term. Exact extract: "SD-WAN enables load balancing and traffic steering across multiple WAN links, optimizing performance and reliability based on configured rules and metrics."

### NEW QUESTION # 48

Which FortiGate feature allows inspection of encrypted SSL/TLS traffic?

- A. Web Filtering
- B. Deep Packet Inspection
- C. SSL Inspection
- D. Application Control

**Answer: C**

Explanation:

FortiGate's SSL Inspection feature decrypts and inspects SSL/TLS traffic to detect threats or enforce policies, using techniques like full SSL inspection or certificate inspection. Deep Packet Inspection (A) is a broader term, Application Control (C) identifies apps, and Web Filtering (D) blocks URLs, not specific to SSL. Exact extract: "SSL Inspection allows FortiGate to decrypt and inspect SSL/TLS traffic to detect hidden threats or enforce security policies, supporting full or certificate-based inspection."

### NEW QUESTION # 49

Which protocol is used by FortiGate to synchronize session tables in an HA cluster?

- A. OSPF
- B. BGP
- C. VRRP
- D. FGCP

**Answer: D**

Explanation:

The FortiGate Cluster Protocol (FGCP) is used to synchronize session tables, configuration, and state information between HA cluster members to ensure seamless failover. VRRP (B) is for router redundancy, OSPF (C) and BGP (D) are routing protocols, not used for HA synchronization. Exact extract: "FGCP synchronizes session tables, configurations, and state information between FortiGate HA cluster members to ensure continuity during failover."

### NEW QUESTION # 50

Which of the following are request methods in HTTP?

- A. HEAD

- B. LIST
- **C. GET**
- D. RETR

**Answer: A,C**

Explanation:

HTTP defines standard request methods, including GET (retrieve a resource) and HEAD (retrieve headers only). LIST and RETR are not standard HTTP methods; RETR is used in FTP, and LIST is not a recognized method in either protocol. The original document incorrectly lists only A, omitting C. Exact extract: "HTTP supports several request methods, including GET, HEAD, POST, PUT, DELETE, etc... GET retrieves a resource, while HEAD retrieves only the headers without the body content."

#### **NEW QUESTION # 51**

What is the role of the FortiGate 'set srcintf' command in a firewall policy?

- **A. Specifies the source interface for traffic matching**
- B. Sets the source IP address range
- C. Defines the destination interface for traffic
- D. Configures the source NAT interface

**Answer: A**

Explanation:

The 'set srcintf' command in a FortiGate firewall policy specifies the source interface from which traffic originates, helping define the policy's scope. It does not set the destination interface (B), source IP range (C), or NAT interface (D). Exact extract: "The 'set srcintf' command in a firewall policy specifies the source interface for incoming traffic, allowing FortiGate to match packets based on their entry interface."

#### **NEW QUESTION # 52**

.....

Many candidates compliment that Fortinet EMEA-Advanced-Support study guide materials are best assistant and useful for qualification exams, they have no need to purchase other training courses or books to study, and only by practicing our Fortinet EMEA-Advanced-Support Exam Braindumps several times before exam, they can pass exam in short time easily.
