Salesforce Analytics-Arch-201 Well Prep: Salesforce Certified Tableau Architect - TestInsides Provides you a Simple & Safe Shopping Experience

This is your right to have money-back guarantee, namely once but a full refund with the transcript. Some people worry about the complex refund of our Analytics-Arch-201 exam practice, as a matter of fact, our refunding procedures are very simple. We will immediately refund if the buyer provide failure test proof just like failure score scan or screenshots. If you have any questions about our Analytics-Arch-201 Preparation quiz, please contact us by online service or email, we will reply as soon as possible.

Salesforce Certified Tableau Architect Sample Questions (Q83-Q88):

NEW QUESTION # 83
When recommending an automated deployment method for Tableau Server updates, which approach is most effective in ensuring minimal disruption and consistent application across a large organization?

- A. Using a network management tool like Microsoft SCCM to automate and standardize the deployment of updates
- B. Relying on manual installation by each server administrator to ensure individual control
- C. Setting up an internal website where administrators can download updates at their convenience
- D. Employing email notifications to prompt administrators to download and install updates individually

Answer: A

Explanation:
Using a network management tool like Microsoft SCCM to automate and standardize the deployment of updates Utilizing a network management tool such as Microsoft Sys-tem Center Configuration Manager (SCCM) is the most effective approach for automating and standardizing Tableau Server updates in a large organization. This method ensures that updates are applied consistently across all servers, reduces the risk of human error, and minimizes disruption to operations. Option A is incorrect because manual installation by each server administrator is time-consuming and prone to inconsistency. Option C is incorrect as email notifications rely on manual action by administrators, which can lead to delays and inconsistency in updates. Option D is incorrect because setting up an internal website for downloading updates does not ensure timely or standardized application across the organization.

NEW QUESTION # 84
When building an admin dashboard for tracking user engagement on Tableau Server, what is a vital metric to include?

- A. The average number of views created by users per month
- B. The server's uptime and downtime statistics
- C. The total number of active users on the server
- D. The disk space usage of the Tableau Server

Answer: A

Explanation:
The average number of views created by users per month For an admin dashboard aimed at tracking user engagement on Tableau Server, including the metric of the average number of views created by users per month is vital. This metric offers a clear insight into how actively users are interacting with and utilizing the server, thereby indicating the level of engagement and adoption. Option A is incorrect because disk space usage, while important, does not directly measure user engagement. Option C is incorrect as uptime and downtime statistics, while crucial for overall server health, do not directly indicate user engagement. Option D is incorrect because the total number of active users provides a static measure and does not reflect the dynamic nature of user engagement over time.

NEW QUESTION # 85
When configuring Tableau Server for use with a load balancer, what is an essential consideration to ensure effective load distribution and user session consistency?

- A. Allocating a separate subnet for the load balancer to enhance network performance
- B. Setting up the load balancer to redirect all write operations to a single node
- C. Configuring the load balancer to use a round-robin method for distributing requests across nodes
- D. Enabling sticky sessions on the load balancer to maintain user session consistency

Answer: D

Explanation:
Enabling sticky sessions on the load balancer to maintain user session consistent-cy Enabling sticky sessions on the load balancer is crucial when integrating with Tableau Server. It ensures that a user's session is consistently directed to the same server node during their interaction. This is important for maintaining session state and user experience, particularly when interacting with complex dashboards or during data input. Option A is incorrect because while round-robin dis-attribution is a common method, it does not address session consistency on its own. Option C is incorrect as redirecting all write operations to a single node can create a bottleneck and is not a standard practice for load balancing in Tableau Server environments. Option D is incorrect because allocating a separate subnet for the load balancer, while potentially beneficial for network organization, is not directly related to load balancing effectiveness for Tableau Server.

NEW QUESTION # 86
In a scenario where you need to change the 'Run As' service account for Tableau Server on a Windows system, what is a crucial step to ensure a smooth transition?

- A. Changing the password of the new 'Run As' account to match the old account
- B. Disabling the firewall settings on the Windows system during the account transition
- C. Temporarily granting the new 'Run As' account administrative privileges on the entire net-work
- D. Ensuring the new 'Run As' account has the correct permissions on the Tableau Server di-rectories and registry keys

Answer: D

Explanation:
Ensuring the new 'Run As' account has the correct permissions on the Tableau Server directories and registry keys When changing the 'Run As' service account for Tableau Server, it's crucial to ensure that the new account has the correct permissions on the Tableau Server directories and registry keys. This step is necessary to allow the new account to access and manage the server's files and settings effectively. Option A is incorrect because granting administrative privileges on the entire network is excessive and poses a security risk. Option C is incorrect as matching the passwords of the old and new accounts is not relevant to ensuring the correct permissions are set. Option D is incorrect because disabling firewall settings is not related to changing the 'Run As' service account and can compromise system security.

NEW QUESTION # 87
A rapidly expanding retail company is planning to deploy Tableau for its nationwide operations. What is the most important factor to consider for ensuring the scalability of the Tableau deployment?

- A. Limiting the number of users to control system load
- B. Using a single server regardless of increasing data and user requirements
- C. Choosing a deployment model that can scale with increasing data volume and user count
- D. Focusing only on current data requirements without considering future growth

Answer: C

Explanation:
Choosing a deployment model that can scale with increasing data volume and user count This option ensures that as the company grows, the Tableau deployment can accommodate increasing data volumes and a higher number of users, which is crucial for a rapidly expanding business. Option A is incorrect because limiting the number of users can hinder operational efficiency and business growth. Option B is incorrect as it fails to consider future growth, which is essential for a scalable and future-proof deployment. Option D is incorrect because relying on a single server for an expanding operation can lead to performance issues and does not support scalability.

NEW QUESTION # 88
......

The policy of "small profits "adopted by our company has enabled us to win the trust of all of our Analytics-Arch-201 customers, because we aim to achieve win-win situation between all of our customers and our company. And that is why even though our company has become the industry leader in this field for so many years and our Analytics-Arch-201 exam materials have enjoyed such a quick sale all around the world we still keep an affordable price for all of our customers and never want to take advantage of our famous brand. What is more, you can even get a discount on our Analytics-Arch-201 Test Torrent in some important festivals, please keep a close eye on our website, we will always give you a great surprise.
