Salesforce Certified Experience Cloud Consultant Sample Questions (Q73-Q78):

NEW QUESTION # 73

Universal Containers (UC) has been using Salesforce to manage its sales and service processes. UC also an Experience Cloud site to interact with its customers. UC has now acquired Cloud Kicks (CK) Retail to grow its business, CK also uses Salesforce and a self-service site built on the experience Cloud to allow its customers to log support requests. UC now wants its customers to be able to use CK's self-service site so they can have a more integrated experience.

What should an Experience Cloud consultant recommend so that UC's can log in to CK;s site?

- A. Use a third-party identity provider to establish SSO between the two Experience Cloud sites, since Salesforce can only be used as a service provider.
- B. Create separate user account for UC customer in CK's Experience Cloud site, since SSO cannot be established between two Experience Cloud sites.
- C. Create custom Apex handlers using login method from site class to sign in users from one community to the other.
- **D. Establish SSO between the two Experience Cloud sites by using one org as an identity provider and the other org as a service.**

Answer: D

NEW QUESTION # 74

What does a system administrator need to do when creating Experience Cloud users?

- A. Add user to an account as a user record.
- B. Click the "Log In to Site as User" button.
- **C. Add user to an account asa contact record.**
- D. Assign Partner Community Plus license to the user.

Answer: C

NEW QUESTION # 75

Northern Trail outfitters (NTO) aims to provide personalization by encouraging its individual customers to self-register in its B2C Experience site. NTO is not looking to create a placeholder account.

NTO Experience consultant has set up self-registration in its Login and Registration pages. NTO's site manager has configured the "Allow external users to self-register" option. NTO uses Customer Community Plus Licenses.

Which two steps are needed to complete self-registration in NTO's Experience site?

Choose 2 answers

- A. Ensure that the Contact field is empty in the registration section.
- **B. Ensure that the Account field is empty in the registration section.**
- **C. Contact Sales customer Support to enable Person Accounts.**
- D. Contact Salesforce Customer Support to enable Communities SelfRegistration Controller.

Answer: B,C

NEW QUESTION # 76

Universal Containers is looking to onboard three new partners to the community.

* Each partner have a branded experience containing their colors and logo.

* Gold and silver partners should have access to the Leads inbox component, but Bronze partners should not.

* Bronze partners should not have access to the Leas tab.

How should an administrator solve for these requirements?

- A. Create branding sets, audience targeting and a custom Navigation menu component.
- B. Create branding sets, audience targeting, and navigation menu targeting.
- **C. Create branding sets, a separate page variation for each partner, and a custom Navigation Menu component.**
- D. Create a separate community for each partner with audience targeting.

Answer: C

NEW QUESTION # 77

How can Sharing Sets be used to share records with Customer Community users?

- **A. Create one Sharing Set and add the objects to share in the Sharing Set.**
- B. Create one Set per object and add the Customer Community profiles to each Sharing Set.
- C. Create one Sharing Set, select the 'All Objects options for the Sharing Set, and add the Customer Community profiles to the Sharing Set.
- D. Create one Sharing Set and use a Sharing Rule to share records with users in the Sharing Set.

Answer: A

Explanation:

To share records with Customer Community users using Sharing Sets, you should create one Sharing Set and add the objects to share in the Sharing Set. A Sharing Set is a feature that allows you to share records with Customer Community users based on common account or contact fields. For example, you can share records with users who have the same account ID or contact ID as the record owner. To use Sharing Sets, you need to create one Sharing Set and add the objects that you want to share in the Sharing Set. You can then define the access level and criteria for each object.
