NEW QUESTION # 26

UPS2000-G6-20kVA supports a maximum of () parallel connections and has good scalability.

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 27

Which of the following network components in OpenStack interconnects with iMaster NCE-Fabric?

- **A. Neutron**
- B. Nova
- C. Cinder
- D. Keystone

Answer: A

Explanation:

In Huawei CloudFabric solutions integrated with OpenStack, Neutron is the key component responsible for network service management and integration with external network controllers such as iMaster NCE-Fabric .

Neutron provides APIs for creating and managing network resources such as:

Networks (VXLAN/BD)

Subnets

Ports

Routers

iMaster NCE-Fabric integrates with Neutron via northbound APIs , allowing it to automatically translate cloud network requests into underlay and overlay configurations (e.g., VXLAN, EVPN, routing policies) on physical network devices.

Other components:

Nova (A) manages compute resources (VM lifecycle)

Keystone (B) handles authentication and identity services

Cinder (C) provides block storage services

These components do not directly interact with network controllers for fabric provisioning.

Huawei emphasizes tight integration between Neutron and iMaster NCE-Fabric to enable automated, policy- driven network deployment , which is essential for cloud data center operations.

Therefore, the correct answer is D (Neutron) .

NEW QUESTION # 28

All-flash data centers accelerate enterprise digital transformation, and SSD has gradually become the mainstream in the market.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

Huawei data center solutions emphasize the transition toward all-flash data centers as a key enabler of enterprise digital transformation. Traditional HDD-based storage systems cannot meet the performance requirements of modern applications such as AI, big data analytics, cloud computing, and real-time services .

SSD (Solid-State Drive) technology provides significant advantages over HDDs, including:

- Ultra-low latency (microseconds vs milliseconds)
- High IOPS (Input/Output Operations Per Second)
- Better reliability and durability (no mechanical parts)
- Lower power consumption and higher density

As a result, SSDs have become the mainstream storage medium in modern data centers, especially in Huawei' s all-flash storage solutions (e.g., OceanStor Dorado) .

All-flash data centers enable:

- Faster application response times
- Improved user experience
- Efficient support for AI and distributed workloads
- Simplified storage architecture

Huawei promotes integrating all-flash storage with intelligent lossless networks (RoCE-based) to achieve end- to-end high-performance infrastructure.

Therefore, the statement is TRUE .
