The customization feature of these Cisco Certified Design Expert (CCDE) Written Exam (400-007) practice questions (desktop & web-based) allows users to change the settings of their mock exams as per their preferences. Customers of Prep4sures can attempt multiple 400-007 Exam Questions till their satisfaction. On each attempt, our 400-007 practice exam will give your results on the spot.

Cisco Certified Design Expert (CCDE v3.0) Written certification exam, also known as the Cisco 400-007 exam, is designed for experienced network architects and designers who want to validate their skills and knowledge in designing complex network infrastructures. 400-007 exam tests the candidates' ability to design, implement and troubleshoot networks of various sizes and complexities, including enterprise campus and data center networks, service provider networks, and security infrastructures. Cisco Certified Design Expert (CCDE) Written Exam certification is intended for professionals who are responsible for designing and implementing network solutions that meet the business's needs while addressing technical and budgetary constraints.

Cisco 400-007 certification exam is a highly sought-after certification in the IT industry, specifically for network design experts. Cisco Certified Design Expert (CCDE) Written Exam certification exam is designed to test the skills and knowledge of candidates in designing and implementing advanced network infrastructure solutions. The CCDE v3.0 certification is intended for those who have extensive experience in network design and architecture and are looking to validate their skills and knowledge.

Cisco Certified Design Expert (CCDE v3.0) Written exam, also known as the Cisco 400-007 Exam, is a certification exam designed to test the knowledge and skills of network design experts. 400-007 exam is an important step for those who want to become certified experts in designing complex network infrastructure, including enterprise networks, service provider networks, and data centers. The CCDE certification is recognized globally and is highly valued by many organizations and employers.

**Prepare for 400-007 with Cisco's Realistic Exam Questions and Get Accurate Answers**

We provide you with free update for one year for 400-007 study guide, that is to say, there no need for you to spend extra money on update version. The update version for 400-007 exam materials will be sent to your email automatically. In addition, 400-007 exam dumps are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. You can use the 400-007 Exam Materials at ease. We have online and offline service, and if you have any questions for 400-007 training materials, don't hesitate to consult us.

## Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q436-Q441):

### NEW QUESTION # 436

Refer to the exhibit.

An engineer is designing the network for a multihomed customer running in AS 111. The AS does not have any other ASs connected to it. Which technology is more comprehensive to use in the design to make sure that the AS is not being used as a transit AS?

- A. Include an AS path access list to send routes to the neighboring ASs that only have AS 111 in the AS path field.
- B. Include a prefix list to only receive routes from neighboring ASs.
- C. Use the local preference attribute to configure your AS as a non-transit AS.
- D. Configure the AS-set attribute to allow only routes from AS 111 to be propagated to the neighbor ASs.

**Answer: A**

Explanation:

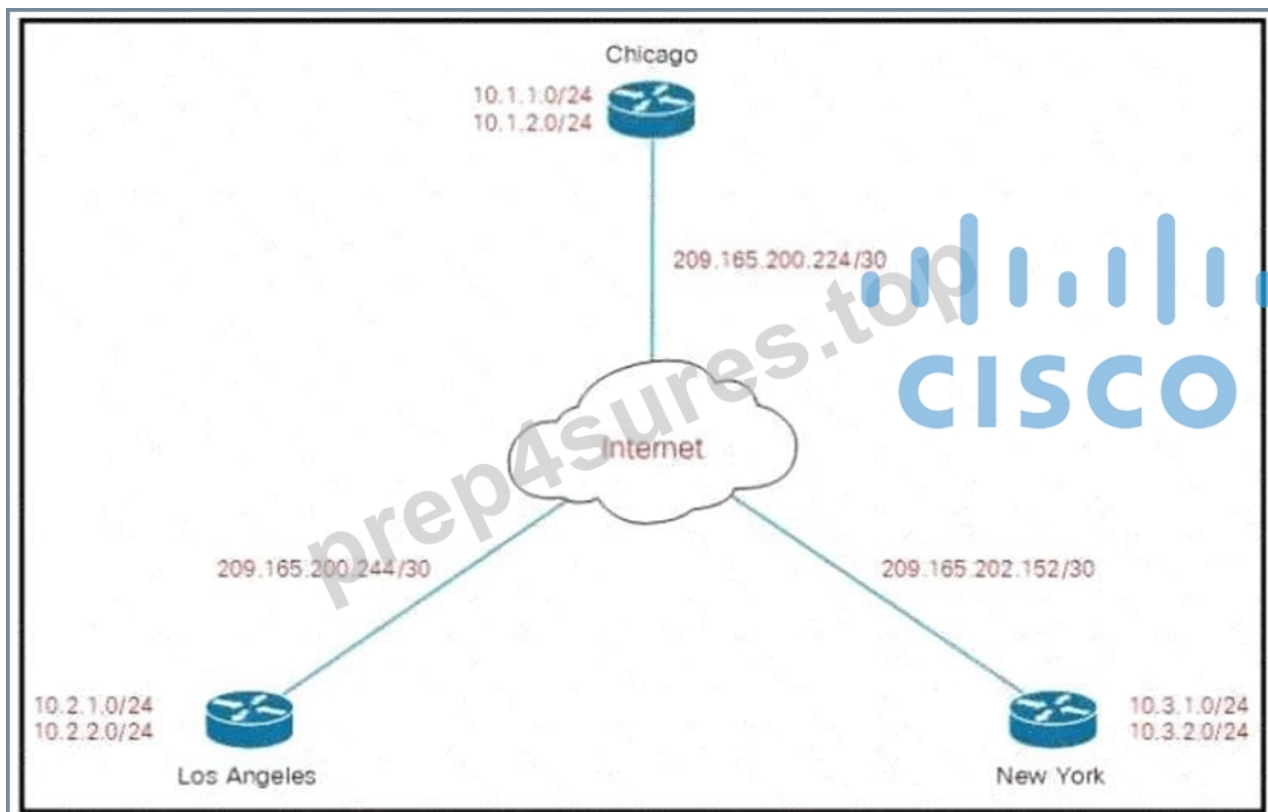

- \* The goal is to prevent AS 111 from being used as a transit AS.
- \* The most effective method is to use an AS path access list to filter outbound BGP advertisements, allowing only prefixes originated from AS 111 (AS path contains only AS 111).
- \* This ensures AS 111 only advertises its own prefixes and does not forward third-party prefixes between providers.

Why other options are incorrect:

- \* A: AS-set is used for aggregation, not for transit prevention.
- \* B: Local preference controls outbound path selection, not advertisement or transit.
- \* D: Prefix list on inbound filters received prefixes, but does not prevent transit.

-

NEW QUESTION # 437

Refer to the exhibit Company XYZ must design a DMVPN tunnel between the three sites Chicago is going to act as the NHS and the company wants DMVPN to detect peer endpoint failures Which technology should be used in the design?

- A. VPLS
- B. L2TPv3
- C. IP SLA
- D. GRE

**Answer: D**

#### NEW QUESTION # 438

Which two actions must be taken when assessing an existing wireless network implementation for its readiness to support voice traffic? (Choose two.)

- A. Check for uniform radio coverage across the floors.
- B. Check for high roaming delay.
- C. Identify frequent TX power changes.
- D. Check for latency over wireless.
- E. Check for high channel utilization.

**Answer: A,B**

Explanation:

\* A (Roaming delay):Voice requires seamless roaming with minimal handoff delay to avoid call drops.

\* B (Uniform radio coverage):Consistent signal coverage is essential for maintaining voice call quality throughout the facility.

Other options explained:

\* C: High channel utilization affects capacity but not directly the initial readiness assessment.

\* D: Latency is important but typically captured during ongoing performance testing, not pre-assessment.

\* E: TX power changes indicate instability but are not primary readiness criteria.

#### NEW QUESTION # 439

Which three tools are used for ongoing monitoring and maintenance of a voice and video environment? (Choose three.)

- A. active monitoring via synthetic probes to measure loss, latency, and jitter
- B. passive monitoring via synthetic probes to measure loss, latency, and jitter
- C. call management analysis to identify CAC failures and call quality issues
- D. call management analysis to identify network convergence-related failures
- E. flow-based analysis to measure bandwidth mix of applications and their flows
- F. flow-based analysis with PTP time-stamping to measure loss, latency, and jitter

Answer: A,C,E

#### NEW QUESTION # 440

A multinational organization has decided to migrate its business-critical operations to a hybrid cloud solution They are concerned about data governance, particularly regarding data sovereignty, ownership, and locale The company operates in multiple countries with strict data privacy regulations Which solution best ensures compliance with data governance regulations ' ?

- A. Distribute data across multiple data centers located in different countries based on user location
- B. Implement a private cloud solution with data centers within the company ' s own premises.
- C. Utilize a public cloud provider with data centers located in different countries around the world.
- D. Store all data in a single data center located in the country where the company is headquartered

Answer: A

#### NEW QUESTION # 441

.....

There are a lot of leading experts and professors in different field in our company. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class 400-007 practice materials for all customers. So we can promise that our 400-007 study materials will be the best study materials in the world. Our 400-007 Exam Questions have a high quality. If you decide to buy our 400-007 study materials, we can make sure that you will have the opportunity to enjoy the 400-007 study guide from team of experts.
