Take Your Exam Preparation to the Next Level with AB-730 Web-Based Practice Test

ITdumpsfree has become the front-runner of this career and help exam candidates around the world win in valuable time. With years of experience dealing with AB-730 exam, they have thorough grasp of knowledge which appears clearly in our AB-730 exam questions. All AB-730 study materials you should know are written in them with three versions to choose from. In case there are any changes happened to the AB-730 Exam, the experts keep close eyes on trends of it and compile new updates constantly. It means we will provide the new updates freely for you later.

Microsoft AI Business Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

Select the answer that correctly completes the sentence.

☐

Answer:

Explanation:

☐

NEW QUESTION # 24

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

NEW QUESTION # 25

You plan to summarize a proposal for a partnership between your company and another company.

You need to use Microsoft 365 Copilot to summarize the information in the proposal as a bulleted list of three to five key points for a project kickoff meeting. Each bullet point must be concise and simply worded.

Which two details should you include in the prompt?

- A. profiles of both companies generated by using the Researcher agent
- B. a list of contact details for key stakeholders of the partnership
- C. a specific knowledge source to ground the response
- D. concise instructions for what to do with the proposal

Answer: C,D

Explanation:

Effective prompting in Microsoft 365 Copilot requires two critical components: clear instructions and grounding in authoritative content. Microsoft guidance emphasizes that prompts should explicitly state the desired output format, tone, length, and purpose. In this case, specifying "a bulleted list of three to five concise, simply worded key points" represents concise instructions, making option B essential.

Additionally, grounding the response in a specific knowledge source-such as attaching or referencing the proposal document-ensures factual accuracy and reduces hallucination. Option D ensures Copilot uses the actual proposal content rather than relying on generalized model knowledge.

Profiles and stakeholder contact details are unrelated to summarization requirements. Therefore, the correct selections are B and D.

NEW QUESTION # 26

You sign in to the Microsoft 365 Copilot app by using your work account as shown in the exhibit.

A colleague tells you that when they open the Microsoft 365 Copilot app, they have access to the Researcher agent. You need to access the Researcher agent.

What should you do?

- A. Sign in to the Copilot app by using a personal account.
- B. Request a Microsoft 365 Copilot license from an administrator.
- C. From Microsoft Edge, use your work account to sign in to <https://copilot.microsoft.com>.
- D. Select Explore agents and then search for Researcher.

Answer: D

Explanation:

In Microsoft 365 Copilot, agents such as Researcher are accessed through the Agents experience within the Copilot app. If the user interface does not immediately display a specific agent, the correct action is to browse or search the available agents catalog. The exhibit shows the left navigation pane with an Explore agents option.

According to Microsoft AI Business Professional guidance, built-in and custom agents can be discovered and enabled through the Explore agents section. If the user already has the appropriate Copilot license and is signed in with their work account, there is no need to switch accounts or request another license.

Signing in through a browser does not change feature availability, and using a personal account would remove access to organizational features. Therefore, to access the Researcher agent, you should select Explore agents and search for Researcher.

NEW QUESTION # 27

You are a project coordinator for a small consulting firm.

You are responsible for tracking client communications, managing project timelines, and preparing weekly status updates for internal stakeholders.

You have a Microsoft 365 Copilot license.

You create an agent to help you monitor project milestones, follow up on client emails, and generate weekly summary reports.

With whom can you share the agent?

- A. any person who has a valid email address
- **B. only the people in your organization**
- C. only Microsoft Teams channel members
- D. the people in your organization and people that have personal Microsoft accounts

Answer: B

Explanation:

Microsoft 365 Copilot agents operate within the security, compliance, and identity boundaries of a Microsoft 365 tenant. Custom agents created in the Microsoft 365 Copilot app are governed by organizational policies, role-based access control, and Microsoft Entra ID authentication.

According to Microsoft AI Business Professional guidance, Copilot agents are designed for enterprise use and are shared within the organization unless administrators configure broader sharing capabilities. External sharing with personal Microsoft accounts or arbitrary email addresses is not supported by default due to security, data protection, and compliance requirements.

Because the agent in this scenario interacts with organizational data such as client emails, project milestones, and internal reports, access must remain restricted to authenticated users within the same tenant. This ensures that sensitive business information remains protected and that data access respects existing permissions.

Therefore, the agent can be shared only with people in your organization, making option D the correct answer.

NEW QUESTION # 28

.....

To eliminate the chances of mistakes and prepare well for exams you must use AB-730 practice test software. There are two types of AI Business Professional AB-730 practice test software: You can install Microsoft AB-730 practice test software on all window-based PCs. On the other hand, a web-based AI Business Professional Networking Solutions AB-730 practice test can be used without the installation of any software. Practicing with these AB-730 practice exams software seems like you are taking a Real AB-730 Exam. This software allows you to take multiple Microsoft AB-730 exam attempts. At the end of each AI Business Professional AB-730 exam attempt, you can check your progress. These Microsoft AB-730 practice tests assist you to know how to manage your time and complete the AI Business Professional AB-730 exam within the specified time limit.
