

# New Oracle 1Z0-771 Exam Dumps | 1Z0-771 Braindump Free

BONUS!!! Download part of Real4exams 1Z0-771 dumps for free: <https://drive.google.com/open?id=1hOr0r4oKdDXzlBbqYfXhHQu6HZ23X4HJ>

Our 1Z0-771 vce dumps constantly get updated according to the changes of exam requirement from the certification center. Our experts created 1Z0-771 practice exam to help our candidates get used to the formal test and face the challenge with great confidence. One-year free updating of 1Z0-771 Test Answers will be allowed after payment and one or two days' preparation before test will be recommend.

## Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul>
Topic 18	<ul style="list-style-type: none"> <li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>

## Pass Your Oracle 1Z0-771 Exam on the First Try with Real4exams

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our 1Z0-771 study torrent have different function. We believe that you must find the version that is suitable for you. Now I am willing to show you the special function of the PDF version of 1Z0-771 test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our Oracle APEX Cloud Developer Professional guide torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our 1Z0-771 study torrent by the PDF version and print it on papers. We believe that it will be very helpful for you to protect your eyes. In addition, the PDF version also has many other special functions. If you use the PDF version of our 1Z0-771 test torrent, you will find more special function about the PDF version.

## Oracle APEX Cloud Developer Professional Sample Questions (Q51-Q56):

### NEW QUESTION # 51

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- A. To build applications using natural language powered by Generative AI
- B. To author SQL powered by Generative AI
- C. To create a REST-enabled database object
- D. To create a Working Copy of your application

**Answer: A,B**

Explanation:

Enabling "Used by App Builder" for a Generative AI Server allows:

Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.

Build applications using natural language: Enables natural language prompts to create app components.

Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

### NEW QUESTION # 52

Which client credentials are used for authentication during the 'Check Syntax' process?

- A. APEX Workspace Admin credentials
- B. APEX Developer credentials
- C. Database schema credentials

**Answer: C**

Explanation:

The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.

APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.

APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.

This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

### NEW QUESTION # 53

Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX\_PWA.PUSH\_QUEUE
- B. APEX\_PWA.PURGE\_QUEUE

- C. APEX\_PWA.HAS\_PUSH\_SUBSCRIPTION

**Answer: A**

Explanation:

The APEX\_PWA package manages Push Notifications:

B . APEX\_PWA.PUSH\_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX\_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes).

Example: APEX\_PWA.PUSH\_QUEUE; ensures a "Meeting now!" alert goes out instantly.

A . APEX\_PWA.HAS\_PUSH\_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.

C . APEX\_PWA.PURGE\_QUEUE: Clears the queue, discarding unsent messages, not sending them.

Technical Insight: PUSH\_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.

Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.

Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

**NEW QUESTION # 54**

Which two approaches can be used to create custom stored procedures in SQL Workshop?

- A. Using Object Browser
- B. Using SQL Scripts
- C. Using Quick SQL
- D. Using Data Workshop

**Answer: A,B**

Explanation:

In SQL Workshop, custom stored procedures can be created using:

SQL Scripts: Allows developers to write and execute PL/SQL code directly to define stored procedures.

Object Browser: Provides a GUI to create and edit database objects, including stored procedures, by defining their specifications and bodies.

Quick SQL is for generating table DDL, not stored procedures, and Data Workshop is for loading/unloading data, not creating procedures.

**NEW QUESTION # 55**

Which is a valid method of logging messages to the execution log in APEX applications?

- A. apex\_debug.info ('SAL for :ENAME || increased by 19.');
- B. apex\_automation.log\_info ('SAL for ' || :ENAME || ' increased by 19.');
- C. apex\_error.add\_error ('SAL for ' || :ENAME || ' increased by 19.');

**Answer: B**

Explanation:

Logging in APEX tracks runtime activity:

A . apex\_automation.log\_info: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows).

The syntax || :ENAME || concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in APEX\_AUTOMATION\_LOG, viewable in Monitoring.

B . apex\_debug.info: Logs to debug output, but the syntax is flawed (:ENAME || isn't concatenated properly; should be 'SAL for ' || :ENAME || ...). It's valid only when debugging is enabled (e.g., APEX\_DEBUG.ENABLE).

C . apex\_error.add\_error: Adds an error to the error stack for user display, not a log message.

Technical Insight: log\_info is non-intrusive, unlike apex\_debug, which requires debug mode, or apex\_error, which signals failure.

Use Case: Logging salary updates in a scheduled job without debug overhead.

Pitfall: Ensure :ENAME is in scope (e.g., page item).

**NEW QUESTION # 56**

.....

If you can get the certification for 1Z0-771 exam, then your competitive force in the job market and your salary can be improved. We can help you pass your exam in your first attempt and obtain the certification successfully. 1Z0-771 exam braindumps are high-quality, they cover almost all knowledge points for the exam, and you can master the major knowledge if you choose us. In addition, 1Z0-771 Test Dumps also contain certain quantity, and it will be enough for you to pass the exam. We offer you free demo for you to have a try, so that you can have a deeper understanding of what you are going to buy.
