SAP Certified Associate - Implementation Consultant - Managed gateway for spend management and SAP Business Network Sample Questions (Q57-Q62):

NEW QUESTION # 57

For which of the following fields are default XPath paths available for the PurchaseOrderExportRequest document type in custom-based routing? Note: There are 2 correct answers to this question.

- A. Purchase Org
- B. CompanyCode
- C. Purchase Group
- D. VendorID

Answer: B,D

NEW QUESTION # 58

You're running the Interface Setup program in SAP Ariba Buying and Invoicing integration via Managed Gateway for Spend&Network. Which interfaces should you select for the ERP-initiated purchase requisition feature? Note: There are 2 correct answers to this question.

- A. ERP Response to Procurement
- B. Requisition Export Request
- C. Procurement Response to ERP
- D. ERP-initiated Pur. Requisition

Answer: A,D

NEW QUESTION # 59

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note: There are 2 correct answers to this question.

- A. IDOC
- B. RFC
- C. SOAP
- D. OData

Answer: C,D

NEW QUESTION # 60

Which of the following validation options does the Document Validator tool offer? Note: There are 3 correct answers to this question.

- A. User Login Credentials
- B. Content Validation
- C. Transformation
- D. Schema Validation
- E. Tax Calculation

Answer: B,C,D

Explanation:

I wasn't able to find a definitive reference on learning.sap.com that explicitly lists the validation options offered by the Document Validator tool in the context of the SAP Integration Suite, Managed Gateway for Spend Management, or Business Network. The material I could access doesn't clearly enumerate these options.

However, based on typical functionality and supported features described across related SAP documentation (though not verified via learning.sap.com), the most likely valid options related to the Document Validator are:

*A. Schema Validation

*B. Content Validation

*C. Transformation

Options like D. User Login Credentials and E. Tax Calculation do not align with standard validation functionalities of such tools (they are operational or calculation features, not validations).

I cannot confirm these definitively from learning.sap.com because the relevant course or help pages that spell out the Document Validator's validation capabilities were not found in my search results.

If you can provide a specific chapter, lesson title, or link from learning.sap.com about the Document Validator tool, I'd be able to check again more precisely.

NEW QUESTION # 61

Which of the following are the mandatory fields under the Inbound to Backend section when defining a connection for the Transport Type Add-On? Note: There are 3 correct answers to this question.

- A. Port
- B. URL
- C. Client ID
- D. Product
- E. Document Type

Answer: A,D,E

NEW QUESTION # 62

.....
