

SAP C-ACDET-2506 dumps & Testinsides C-ACDET-2506 PDF & C-ACDET-2506 actual test

What's more, part of that Lead2PassExam C-ACDET-2506 dumps now are free: <https://drive.google.com/open?id=1Cs8TBpfj8jq4rDaFskwqTyxOMO7BEpCG>

Propulsion occurs when using our C-ACDET-2506 practice materials. They can even broaden amplitude of your horizon in this line. Of course, knowledge will accrue to you from our C-ACDET-2506 practice materials. There is no inextricably problem within our C-ACDET-2506 practice materials. Motivated by them downloaded from our website, more than 98 percent of clients conquered the difficulties. So can you.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Latest C-ACDET-2506 Exam Vce, Test C-ACDET-2506 Question

We are popular not only because we own the special and well-designed C-ACDET-2506 exam materials but also for we can provide you with well-rounded services beyond your imagination. At the very beginning, we have an authoritative production team and our C-ACDET-2506 study guide is revised by hundreds of experts, which means that you can receive a tailor-made C-ACDET-2506 Study Material according to the changes in the syllabus and the latest development in theory and breakthroughs. Without doubt, our C-ACDET-2506 practice torrent keep up with the latest information.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q44-Q49):

NEW QUESTION # 44

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- **B. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location**
- C. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- D. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

Answer: B

NEW QUESTION # 45

Which of the following considerations are important when creating custom fields? (Select 2 correct answers)

- A. Published field changes can be reverted via Un-publish to free up memory
- B. The data type of a field can be dynamically changed, depending on data type availability
- **C. There's a limit to the number of fields, by data type, that can be added to a class**
- **D. When a field has been created and published, that field type has been consumed from the number of available fields on the class**

Answer: C,D

Explanation:

SAP Ariba allocates a finite number of field "slots" per data type for each class. When a custom field is created and published, it consumes one of these slots. Therefore, there are limits to how many fields of each type you can create per class. The data type cannot be changed after creation, and un-publishing does not reclaim the allocated slot; you must delete the field to free resources. Planning field usage carefully avoids hitting these system limits.

NEW QUESTION # 46

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Enable field property "Use relationship chooser" in the Advanced tab

- B. Load Relation types and Relation entries
- C. Enable field property "Enable for Template Field Setter" in the Advanced tab
- **D. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab**
- E. Define a Visibility Condition in the Conditions tab

Answer: D

NEW QUESTION # 47

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- **A. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**
- B. All standard fields are reportable by default.
- C. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- D. The system makes all fields reportable after a system refresh.

Answer: A

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 48

A French translation of a custom field label needs to be updated. Where do you update it?

- A. Field Configuration Label
- B. Layout tab
- C. Customization Manager → Views
- **D. AML & Translations Upload**

Answer: D

NEW QUESTION # 49

.....

In reaction to the phenomenon, therefore, the C-ACDET-2506 test material is reasonable arrangement each time the user study time, as far as possible let users avoid using our latest C-ACDET-2506 exam torrent for a long period of time, it can better let the user attention relatively concentrated time efficient learning. The C-ACDET-2506 practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the C-ACDET-2506 test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.
