At QuestionsTube, you can read HPE7-A03 free demo questions in pdf file, so you can check the questions and answers before deciding to download the HP HPE7-A03 practice questions. These free demo questions are parts of the HPE7-A03 exam questions. Download and read them carefully, you will find that the HPE7-A03 test questions of QuestionsTube will be your great learning materials online. Share some HPE7-A03 exam online questions below.

1. EMEA-DISTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).

What's more, part of that NewPassLeader HPE7-A03 dumps now are free: <https://drive.google.com/open?id=1T1NHYGB-xe1-XR2LZG57s-4WzZ4Ztnfx>

Our users are all over the world and they have completed their exams through the help of our HPE7-A03 study guide. As you can see the feedbacks from our loyal customers, all of them are grateful to our HPE7-A03 exam braindumps and become successful people with the HPE7-A03 Certification. And what are you waiting for? Just selecting our HPE7-A03 learning materials, the next one to get an international certificate is you!

HP HPE7-A03 Exam Syllabus Topics:

Section	Weight	Objectives
Propose the Solution	21%	- Develop implementation roadmap - Create design documentation and diagrams - Present solution and business value - Address alternatives and risk mitigation
Analyze Requirements	26%	- Map requirements to technical capabilities - Evaluate design options and trade-offs - Perform capacity and performance analysis - Document assumptions and limitations

Discover Requirements	21%	- Assess current infrastructure and constraints - Collect technical, operational and compliance requirements - Identify dependencies and risk factors - Define project goals and business objectives
Architect the Solution	32%	- Plan redundancy, security and high availability - Design high-level network topology - Verify alignment with requirements - Select Aruba products and solutions - Define overlay and underlay architecture

365 Days Of Free Updates To HP HPE7-A03 Exam Questions

We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the HP HPE7-A03 exam preparation. NewPassLeader provides you with HP HPE7-A03 Exam Questions in 3 different formats to open up your study options and suit your preparation tempo.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and

1Z5 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City
- Dila Health Center Is located in City A
- Mount Health Center is located In City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting
- Seamless integration across wired, wireless. WAN, S0-8branch. IoT
- * Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options Including WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:
- fully redundant NAC solution for management and authentication
- wireless and wired authentication for the main hospital will be handled locally The IT director of XYZ Regional Hospital is interested in a solution for nurse workstation tracking. What solution would meet the customer's requirements? (Select three.)

- A. Aruba User Experience Insight
- B. Airwave
- C. Aruba Tags Configuration App
- D. Asset Tracking Subscription
- E. Map Subscription

- F. Client insight

Answer: A,D,E

Explanation:

For nurse workstation tracking, Aruba User Experience Insight can provide insights into how applications and network services are performing, which can help in understanding user experiences across the hospital network. The Asset Tracking Subscription is a crucial component for keeping track of physical assets such as nurse workstations. The Map Subscription would complement the asset tracking by providing detailed maps of the hospital's interior, enabling precise location tracking of the workstations. These solutions together would allow the hospital to effectively track and manage their resources, ensuring that nurses can find workstations quickly and efficiently, which is essential in a fast-paced medical environment.

NEW QUESTION # 76

What is one use case for designing a 2-tier campus LAM instead of using a 3-tier?

- A. The network has grown beyond a few building aggregation points
- **B. The campus has small buildings with only a few wiring closets.**
- C. Cross-campus traffic has grown beyond the capacity of a single collapsed core
- D. Access aggregation points are not scaling to meet traffic demands.

Answer: B

Explanation:

A 2-tier campus LAN architecture, consisting of the core and access layers, is typically suitable for smaller campuses or networks with limited numbers of wiring closets. This simplified architecture eliminates the need for a dedicated aggregation layer, which is more common in larger, more complex network environments (the 3-tier architecture). In a small campus setting with only a few wiring closets, a 2-tier design can provide sufficient performance and scalability, reducing complexity and potentially lowering costs. This architecture allows for direct connectivity between the access layer, where end devices connect to the network, and the core layer, which routes traffic to and from the campus network. The use of a 2-tier architecture in such scenarios is driven by the network's size and the simplicity of its requirements, making it an efficient and effective choice.

NEW QUESTION # 77

What are the considerations when using existing MMF and upgrading to equipment capable of 10 GbE speeds? (Select two)

- A. redundant fiber tube into cabinet
- **B. type of MMF fiber**
- C. type of fiber connector
- D. single fiber tube into cabinet
- **E. length of MMF fiber**

Answer: B,E

NEW QUESTION # 78

Hotspot Question

Based on this campus design, which layer is the most appropriate to be designed as a Border Persona, considering an EVPN VXLAN Fabric?

Answer:

Explanation:

NEW QUESTION # 79

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors

will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to include Blue Dot location tracking in their four floors of corporate space. The APs are not ideally placed to allow for smooth map transitions.

What could you add to provide better tracking? (Select two.)

- A. UXI sensors
- B. beacons
- C. more APs
- D. tags

Answer: B,C

Explanation:

For improving Blue Dot location tracking in corporate spaces where access points (APs) are not ideally placed for smooth map transitions, adding more APs and deploying beacons are effective strategies. More APs can enhance the density and coverage of the Wi-Fi network, providing more data points for more accurate location tracking. Beacons, specifically designed for precise indoor positioning, can supplement Wi-Fi-based location services by broadcasting signals that mobile devices can use to determine their location with greater accuracy.

This combination ensures better tracking and smoother map transitions within the corporate space, enhancing the overall effectiveness of the Blue Dot location tracking solution.

NEW QUESTION # 80

.....

Taking the Aruba Certified Campus Access Architect Exam HPE7-A03 test and beginning Aruba Certified Campus Access Architect Exam HPE7-A03 exam preparation with the suggested HPE7-A03 exam preparation materials is the best and quickest course of action. You can rely on HP HPE7-A03 Exam Questions Aruba Certified Campus Access Architect Exam HPE7-A03 for thorough HPE7-A03 exam preparation.
