## Prepare Juniper JN0-452 Exam To Get Certification

Juniper Certification JN0-452 Exam is very popular among the IT people to enroll in the exam. Passing Juniper certification JN0-452 exam can not only chang your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.

## Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q114-Q119):

### NEW QUESTION # 114

What is the fundamental architectural principle of Juniper Mist that distinguishes it from legacy controller-based WLAN systems?

- A. It uses a microservices cloud for management and control, while the data plane can be handled either locally at the AP or

centrally via Mist Edge.

- B. All user data traffic is required to be backhauled to the Juniper Mist cloud for processing and security inspection.
- C. All access points must first be provisioned through a CLI before connecting to the cloud.
- D. Firmware updates for access points and configuration changes are pushed from an on-premises controller appliance.

**Answer: A**

#### NEW QUESTION # 115

The customer wants to broadcast a WLAN at a certain time and day of the week.

Which statement is correct in this scenario?

- A. Mist supports this function with an additional subscription.
- B. **SSID scheduling should be configured.**
- C. Third-party integration is required to achieve this requirement.
- D. APs need to be upgraded for this feature.

**Answer: B**

#### NEW QUESTION # 116

All the access points (APs) on the site will obtain an IP address for the Management VLAN. You notice an additional IP address for each configured VLAN on the AP.

Which statement is correct in this scenario?

- A. **The Local Status Page has been enabled in the AP setting under the Site configuration.**
- B. The AP MAC has a DHCP reservation.
- C. This behavior is enabled by default under the Site configuration.
- D. The AP is configured to support wireless mesh.

**Answer: A**

Explanation:

According to the Mist documentation<sup>1</sup>, a Mist AP will pull a management IP address from the Native VLAN by default. However, if the Local Status Page is configured for the Site, all the site APs will pull their own IP address from the Management VLAN, but also addresses for each of the VLANs configured on the AP. This is because each AP creates a Switch Virtual Interface (SVI) for each VLAN on its eth0 interface.

The Local Status Page is a feature that allows you to access information about an AP's status and configuration through a web browser by connecting to its IP address<sup>2</sup>. This feature can be enabled or disabled at the site level under Site Settings > Access Points > Advanced Settings.

#### NEW QUESTION # 117

An administrator is deploying a floorplan for accurate vBLE location services. They have already uploaded the floorplan image and correctly placed and oriented all the APs. What is the critical next step they must perform to ensure the location engine can make accurate calculations?

- A. **Set the scale of the floorplan using a known physical distance.**
- B. Create location zones for all major areas.
- C. Add wayfinding paths.
- D. Validate the AP firmware versions.

**Answer: A**

#### NEW QUESTION # 118

Which two Mist APs would be used for BLE location? (Choose two.)

- A. AP12
- B. **AP33**

- C. AP43
- D. AP32

**Answer: B,C**

## NEW QUESTION # 119

In addition, you can print these Juniper JN0-452 PDF questions for paper study in this format of TroytecDumps product frees you from restrictions of time and place as you can study JN0-452 exam questions from your comfort zone in your spare time. The second version is the web-based format of the Juniper JN0-452 Practice Test. Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.
