

400-007 Prep Torrent - Cisco Certified Design Expert (CCDE) Written Exam Exam Torrent & 400-007 Test Braindumps

2026 Latest Free4Dump 400-007 PDF Dumps and 400-007 Exam Engine Free Share: <https://drive.google.com/open?id=1H4pKxSpI20YBONuJ3cCmzsMouyz3Da3>

If you want to know the latest information for the exam timely, you can choose us, we can do that for you. We offer you free update for one year for 400-007 learning materials, so that you can obtain the latest information for the exam. Our system will send you the latest version automatically, and you just need to examine your email for the latest version. In addition, 400-007 Exam Materials are high-quality, and you can improve your efficiency by using them. We have online and offline service, and if you have any questions for 400-007 exam braindumps, you can contact us, and we will give you reply as quickly as we can.

Cisco 400-007 exam is a challenging certification test designed for experienced network designers and architects who want to demonstrate their advanced knowledge and skills in network design principles, methodologies, and best practices. 400-007 exam is part of the CCDE (Cisco Certified Design Expert) certification program, which focuses on expert-level network design and engineering skills. The CCDE certification is widely recognized as one of the most prestigious and sought-after credentials in the networking industry, and passing the 400-007 Exam is a key step towards achieving this certification.

Valid Braindumps 400-007 Book & Visual 400-007 Cert Test

Our 400-007 study materials are full of useful knowledge, which can meet your requirements of improvement. Also, it just takes about twenty to thirty hours for you to do exercises of the Cisco 400-007 Study Guide. The learning time is short but efficient. You will elevate your ability in the shortest time with the help of our Cisco 400-007 preparation questions.

Cisco 400-007 Exam is a four-hour exam that consists of multiple-choice questions and simulation-based questions. 400-007 exam is designed to test the candidate's ability to design network infrastructures that meet the business requirements of an organization. 400-007 exam is conducted in English and is available globally at Pearson VUE testing centers.

Cisco 400-007 certification exam is designed for those professionals who want to master the Cisco Certified Design Expert (CCDE v3.0) certification. The CCDE is an advanced-level certification, which is intended for experienced network design engineers, network architects, and other networking professionals. Cisco Certified Design Expert (CCDE) Written Exam certification is a validation of the candidate's ability to design and deploy complex network solutions. It is a globally recognized and highly respected certification, which can help networking professionals take their careers to the next level.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q206-Q211):

NEW QUESTION # 206

Which function is performed at the access layer of the three-layer hierarchical network design model?

- A. QoS classification and marking boundary
- B. redundancy and load balancing
- C. reliability -
- D. fault isolation
- E. fast transport

Answer: A

NEW QUESTION # 207

SDN is still maturing. Throughout the evolution of SDN, which two things will play a key role in enabling a successful deployment and avoiding performance visibility gaps in the infrastructure? (Choose two.)

- A. Rapid on-demand growth
- B. Dynamic real-time change
- C. Integration of device context
- D. Peer-to-peer controller infrastructure
- E. Falling back to old behaviors

Answer: B,C

Explanation:

* B (Dynamic real-time change):SDN must adapt dynamically as network demands and application requirements evolve.

* E (Integration of device context):Understanding device-level status, capabilities, and resource availability allows controllers to make informed decisions, reducing visibility gaps.

Other options explained:

* A: On-demand growth is a business benefit but not related to visibility/performance gaps.

* C: Reverting to legacy behaviors undermines SDN benefits.

* D: Peer-to-peer controllers help scale, but not directly tied to visibility gaps.

NEW QUESTION # 208

Company XYZ is designing the network for IPv6 security and they have these design requirements:

* A switch or router must deny access to traffic from sources with addresses that are correct, but are topologically incorrect

* Devices must block Neighbor Discovery Protocol resolution for destination addresses that are not found in the binding table.

Which two IPv4 security features are recommended for this company? (Choose two)

- A. IPv6 DHCP Guard
- B. IPv6 Destination Guard
- C. IPv6 RA Guard
- D. IPv6 Source Guard
- E. IPv6 Prefix Guard

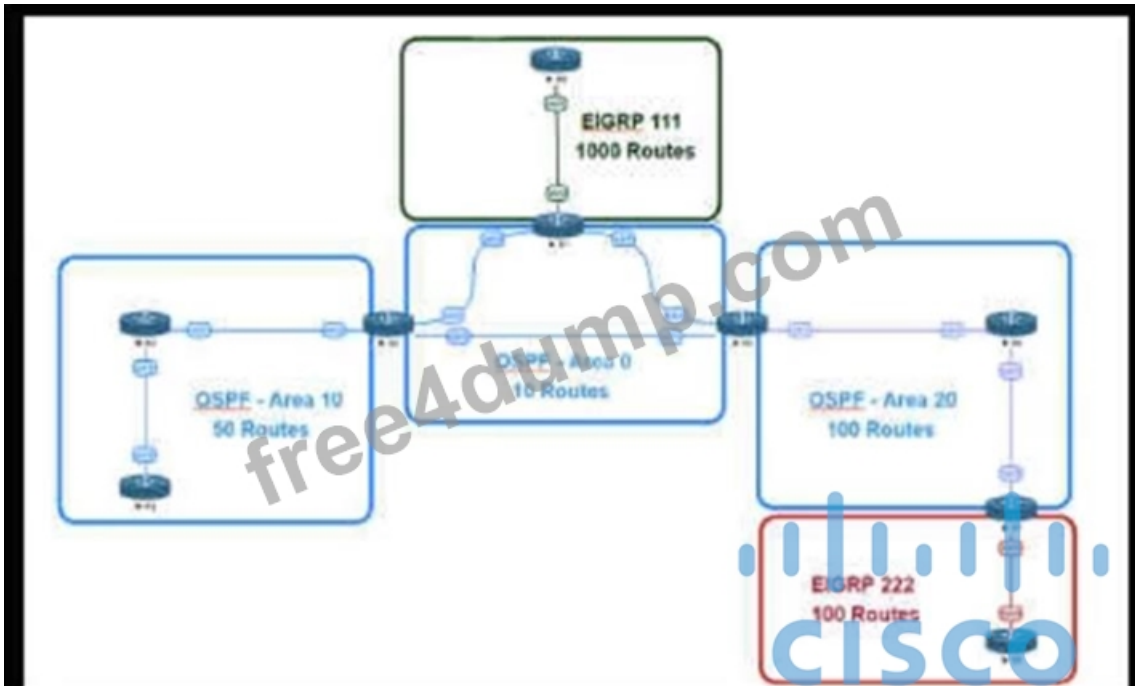

Answer: B,E

Explanation:

https://www.cisco.com/c/dam/global/ja_jp/td/docs/ios-xml/ios/ipv6_fhsec/configuration/xs-16/ip6f-xe-16-book.pdf

NEW QUESTION # 209

Refer to the exhibit.

An engineer is designing a multiarea OSPF network for a client who also has a large EIGRP domain. EIGRP routes are getting redistributed into OSPF. OSPF area 20 has routers with limited memory and CPU resources.

The engineer wants to block routes from EIGRP 111 from propagating into area 20 and allow EIGRP 222 routes to flow in. Which OSPF area type fulfills this design requirement?

- A. type 3 LSA filtering on the ABR between area 0 and area 20
- **B. area 20 as a stub area**
- C. area 20 as a NSSA area
- D. type 5 LSA filtering on the ASBR between EIGRP 111 and area 0

Answer: B

NEW QUESTION # 210

Which encoding format does Cisco IOS XE software support for NETCONF?

- A. It supports YAML encoding for NETCONF
- **B. It supports XML encoding for NETCONF**
- C. It supports JSON encoding for NETCONF
- D. It supports HTML encoding for NETCONF

Answer: B

Explanation:

NETCONF (Network Configuration Protocol) is a standardized protocol used for automating configuration and management of network devices. According to IETF standards (RFC 6241), the required encoding for NETCONF is:

* XML (Extensible Markup Language)

Cisco IOS XE supports NETCONF over SSH and uses XML to structure both configuration data and RPC messages. XML allows strict schema validation (via YANG models), extensibility, and rich hierarchical structure required for modern network automation.

Other formats:

* HTML is not a data encoding method.

* YAML is typically used with configuration management tools, not NETCONF.

* JSON is supported in RESTCONF, not in traditional NETCONF.

NEW QUESTION # 211
