질문 # 38

When you format a list report component, which actions can you perform? Note: There are 3 correct answers to this question.

- A. Change the order of columns.
- B. Change column headers.
- C. Adjust column widths.
- D. Change column types.
- E. Save formats to a template.

정답: A,B,C

설명:

* List Report Formatting OverviewList report components in SAP SuccessFactors allow detailed data visualization in a tabular format. Formatting enhances usability and readability.

* Formatting Options

* Change the Order of Columns: Columns in a list report can be rearranged to prioritize specific data.

* Adjust Column Widths: Column widths can be resized to fit content or optimize display space.

* Change Column Headers: Column headers can be renamed or updated to improve clarity and alignment with report requirements.

* Explanation of Correct Answers

* Option A: Correct, as reordering columns is a standard customization feature.

* Option C: Correct, because column width adjustment is supported for better layout and content display.

* Option D: Correct, since column headers can be edited to reflect data labels better.

* Explanation of Incorrect Options

* Option B: Incorrect, because column types (e.g., text to numeric) cannot be changed directly in a list report component.

* Option E: Incorrect, as list report formatting changes cannot be saved as templates for reuse.

질문 # 39

A table report is shared with a user. That user CANNOT see the table report in the Report Center list. Which role-based permission has NOT been set correctly for this user?

- A. Create Report access to the domain
- B. Run Report access to the domain
- C. Access to Insights
- D. Ability to manage Tiles and Dashboards

정답: B

설명:

When a user cannot see a table report in the Report Center list, the issue typically stems from insufficient role-based permissions (RBP) granted to the user for accessing reports in that domain. Specifically:

- * Understand Role-Based Permissions (RBP):
- * In SAP SuccessFactors, reports and analytics visibility is governed by RBP settings. These settings ensure that users only see the reports and data they are authorized to access.
- * Permissions are categorized into domains such as "Employee Central," "Performance Management," etc.
- * Key Permissions for Reports in the Report Center: To view or run reports in Report Center, users need:
- * Run Report Access: This allows users to execute reports for domains they are permitted to access.
- * Create Report Access: This enables users to create or modify reports.
- * Manage Tiles and Dashboards Access: This is necessary for interacting with dashboards and tiles, not table reports specifically.
- * Access to Insights: This refers to viewing analytic insights and does not directly impact table report visibility.
- * Diagnosing the Issue:
- * The given scenario describes a user being unable to view a shared table report.
- * The most likely cause is the absence of Run Report access to the domain associated with the table report.
- * Without this permission, the system restricts the user from running or even viewing the report, even if it has been shared with them.
- * Steps to Resolve:
- * Navigate to Admin Center # Manage Permission Roles.
- * Select the permission role assigned to the user in question.
- * Click Permissions # Reports Permissions.
- * Verify that the Run Report Permission is granted for the specific domain associated with the shared report.
- * If not, enable this permission and save the changes.
- * Test Access:
- * After updating the permissions, the user should be able to view the table report in the Report Center.
- * SAP SuccessFactors Help Portal: Role-Based Permissions
- * SAP SuccessFactors People Analytics Reporting Guide (Latest Release): Check for details on report permissions and their implications.
- * SAP KBA 2461114: Troubleshooting Report Center permissions.
- * Learning Path: SAP Open Learning on SuccessFactors RBP and Analytics (openSAP).

Step-by-Step Analysis: References and Documentation: This explanation ensures that the resolution is precise, supported by standard SAP practices, and verifiable through official SAP documentation.

질문 # 40

When constructing an expression for a calculated column in Query Designer, which syntax should you use to enter a date?

- A. #MM-DD-YYYY#
- B. #YYYY-MM-DD#
- C. #DD-MM-YYYY#
- D. #MMM-DD-YYYY#

정답: B

질문 # 41

You are building a performance report with the Story report type. In reviewing the Performance Management schema, you notice that the 2019 Performance Review Table is listed in the Available Data section. You begin the query by adding the Basic User Information table from the User schema. You notice that the 2019 Performance Review Table is NO longer listed in the Available Data section. Why is the 2019 Performance Review table NOT in the list?

- A. Only related or joined tables appear as available.
- B. The table does NOT have a Report Object Configuration Entity record.
- C. You do NOT have RBP permission to the fields of the table.
- D. You do NOT have the data access permission to the schema.

정답: A

설명:

* Schema and Table Relationships

* In SAP SuccessFactors Story Reporting, tables are only displayed in the Available Data section if they have a direct relationship or join with the selected starting table (in this case, Basic User Information).

- * Why the 2019 Performance Review Table is Missing
 - * Since the Basic User Information table is selected, only tables directly related to it will appear.
The 2019 Performance Review Table is likely not joined directly to the User schema.
 - * Why Other Options are Incorrect
 - * B (No Report Object Configuration Entity record): The table is present in the schema, so it must have a valid ROCE record.
 - * C (No RBP permission): This would prevent any access to the table but does not explain its absence from the Available Data section.
 - * D (No data access permission): This would restrict data access, not the visibility of the table.

질문 # 42

When you share a tile, how can the user view that tile? Note: There are 3 correct answers to this question.

- A. Homepage
- B. Canvas Report
- C. iOS SF app
- D. Custom table report
- E. Dashboard

정답: A,C,E

설명:

When you share a tile in SAP SuccessFactors, the recipient can view the tile in the following ways:

- * Homepage (C):
- * Shared tiles can appear on the recipient's homepage if configured appropriately.
- * iOS SF App (D):
- * Tiles are accessible through the SAP SuccessFactors mobile application, enabling on-the-go access to reports and visualizations.
- * Dashboard (E):
- * Tiles can be added to dashboards, where users can view multiple tiles and reports in one interface.
