Formal GH-300 Test, GH-300 Authentic Exam Hub

As far as the GitHub Copilot (GH-300) exam questions are concerned, these Microsoft GH-300 exam questions are designed and verified by the experience and qualified GH-300 exam trainers. They work together and strive hard to maintain the top standard of GH-300 Exam Practice questions all the time. So you rest assured that with the DumpStillValid Microsoft GH-300 exam questions you will ace your GH-300 exam preparation and feel confident to solve all questions in the final Microsoft GH-300 exam.

Microsoft GitHub Copilot Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which of the following are true about code suggestions? (Each correct answer presents part of the solution. Choose two.)

- A. Code suggestions are limited to single-line suggestions

- B. You can use keyboard shortcuts to accept the next word in a suggestion
- C. Alternative code suggestions can be shown in a new tab
- D. Code suggestions will always compile or run without modifications
- E. Code suggestions are guaranteed to not expose known security vulnerabilities

Answer: B,C

Explanation:

Exact extracts:

* "You can accept individual words, lines, or entire suggestions with keyboard shortcuts." References: GitHub Copilot editor usage documentation.

NEW QUESTION # 116

A social media manager wants to use AI to filter content. How can they promote transparency in the platform's AI operations?

- A. By focusing on user satisfaction with the content filtering.
- B. By regularly updating the AI filtering algorithm.
- C. By relying on a well-regarded AI development company.
- D. By providing clear explanations about the types of content the AI is designed to filter and how it arrives at its conclusion.

Answer: D

Explanation:

Exact extracts:

* "Transparency. AI systems should be understandable."

References: Microsoft Responsible AI guidelines and transparency notes.

NEW QUESTION # 117

Identify the right use cases where GitHub Copilot Chat is most effective. (Each correct answer presents part of the solution. Choose two.)

- A. Creation of a unit test scenario for newly developed Python code
- B. Explain a legacy COBOL code and translate the code to another language like Python.
- C. Create a technical requirement specification from the business requirement documentation
- D. Creation of end-to-end performance testing scenarios for a web application

Answer: A,B

Explanation:

GitHub Copilot Chat is effective for explaining and translating legacy code and generating unit test scenarios for new code.

NEW QUESTION # 118

In what way can GitHub Copilot and GitHub Copilot Chat aid developers in modernizing applications?

- A. GitHub Copilot can create and deploy full-stack applications based on a single query.
- B. GitHub Copilot can suggest modern programming patterns based on your code.
- C. GitHub Copilot can refactor applications to align with upcoming standards.
- D. GitHub Copilot can directly convert legacy applications into cloud-native architectures.

Answer: B

Explanation:

GitHub Copilot and GitHub Copilot Chat are powerful AI-driven tools designed to assist developers by providing context-aware code suggestions and interactive support. Specifically, in the context of modernizing applications, GitHub Copilot excels at analyzing existing code and suggesting modern programming patterns, best practices, and syntax improvements that align with contemporary development standards. For example, it can recommend updates to outdated constructs, propose more efficient algorithms, or suggest frameworks and libraries that are widely used in modern application development.

* Why not A? GitHub Copilot does not "directly convert" legacy applications into cloud-native architectures. It can assist by

suggesting code changes or patterns that support such a transition, but it doesn't autonomously perform the full conversion process, which involves architectural decisions and deployment steps beyond its scope.

* Why not C? While GitHub Copilot can generate code snippets and even larger portions of an application, it cannot create and deploy full-stack applications from a single query. It requires developer input, refinement, and integration to achieve a complete, deployable solution.

* Why not D? GitHub Copilot can assist with refactoring by suggesting improvements to existing code, but it doesn't inherently "align with upcoming standards" in a predictive sense. Its suggestions are based on current best practices and the data it was trained on, not future standards that are yet to be defined.

Thus, this is the most accurate and realistic way GitHub Copilot aids developers in modernizing applications, leveraging its ability to provide relevant, context-based suggestions to update and improve codebases.

Reference: GitHub Copilot documentation on application modernization.

NEW QUESTION # 119

How can the insights gained from the metrics API be used to improve the development process in conjunction with GitHub Copilot?

- A. Insights on the types of coding languages where GitHub Copilot is most helpful.
- **B. Detailed analysis of GitHub Copilot's suggestions vs. manual coding.**
- C. Automated generation of complete project documentation.
- D. Real-time debugging and error resolution statistics.

Answer: B

Explanation:

"The Copilot metrics API provides insights into how suggestions are being accepted and used, enabling teams to analyze the relative impact of Copilot-generated code versus manually written code." This confirms option D is correct, as the API enables analysis of Copilot versus manual coding.

References: GitHub Copilot metrics API documentation.

NEW QUESTION # 120

.....

Our experts have worked hard for several years to formulate GH-300 exam braindumps for all examiners. Our GH-300 study materials not only target but also cover all knowledge points. And our practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of GH-300 practice materials, so that you can strengthen the training for weak links. In this way, you can more confident for your success since you have improved your ability.

Formal GH-300 Test: <https://www.dumpstillvalid.com/GH-300-prep4sure-review.html>

We are committed to helping you pass the exam, and you can pass the exam just one time by using GH-300 exam materials of us, Advantages for passing the Microsoft Formal GH-300 Test Formal GH-300 Test - GitHub Copilot exam, I believe our GH-300 practice test questions are high-quality and low-price, What's more, we will often offer abundant discounts of GH-300 study guide to express our gratitude to our customers.

Basic Switching Function, The next step that you GH-300 should consider is to start breaking out the application services for additional performance, We are committed to helping you pass the exam, and you can pass the exam just one time by using GH-300 Exam Materials of us.

Use Desktop Microsoft GH-300 Practice Test Software To Identify Gaps In Knowledge

Advantages for passing the Microsoft GitHub Copilot exam, I believe our GH-300 practice test questions are high-quality and low-price, What's more, we will often offer abundant discounts of GH-300 study guide to express our gratitude to our customers.

All that we have done is just to help you easily pass the GH-300 exam.
