## Exam XK0-006 Testking & XK0-006 New Exam Camp

Our XK0-006 study materials have plenty of advantages. For example, in order to meet the needs of different groups of people, we provide customers with three different versions of XK0-006 study materials, which contain the same questions and answers. You can choose the one that best suits you according to your study habits. Secondly, the passing rate of our XK0-006 Study Materials is very high. Generally speaking, 98 % - 99 % of the users can successfully pass the exam, obtaining the corresponding certificate.

## CompTIA Linux+ Certification Exam Sample Questions (Q23-Q28):

### NEW QUESTION # 23

Which of the following best describes a use case for playbooks in a Linux system?

- A. To provide the security information required for a container
- B. To provide the storage volume information required for a pod
- C. To provide the instructions for implementing version control on a repository
- **D. To provide a set of tasks and configurations to deploy an application**

**Answer: D**

Explanation:

In Ansible, a playbook is a YAML file that defines tasks, configurations, and automation workflows. It is commonly used to deploy applications, configure systems, and manage infrastructure on Linux systems.

### NEW QUESTION # 24

Which of the following best describes the role of initrd?

- A. It is required to initialize a random device within a Linux system.

- B. It contains basic kernel modules and drivers required to start the system.
- C. It contains trusted certificates and secret keys of the system.
- D. It is required to connect to the system via SSH.

**Answer: B**

Explanation:

initrd (initial ramdisk) provides essential kernel modules and drivers (e.g., for storage and filesystems) needed during the early boot process before the root filesystem is mounted.

#### NEW QUESTION # 25

A systems administrator needs to write a script that counts the number of times "FAIL" appears in a log file. If "FAIL" appears zero times, then the administrator would like to print the message "SUCCESS." Given the following:

```
if [ $(grep -c FAIL /var/file.log) ____ 0 ]
then
    echo SUCCESS
else
    echo FAIL
fi
```

Which of the following should be used before the zero to complete the script?

- A. -lt
- B. -ne
- C. -eq
- D. -gt

**Answer: C**

Explanation:

The test should check if the count of "FAIL" equals zero. The operator -eq is used for numeric equality in shell conditionals, so [ \$(grep -c FAIL /var/file.log) -eq 0 ] correctly evaluates whether the count is zero.

#### NEW QUESTION # 26

A systems administrator is deploying a web server using the following code:

```
Name "Web Server"
description "The role contain Nodes, which act as a web server"
run_List "Recipe[ntp]"
default_attributes "ntp" => {
  'ntpdate'=> {
    'disable' => true
  }
}
```

Which of the following technologies is the administrator using to create this web server?

- A. Ansible
- B. Terraform
- C. Chef
- D. Puppet

**Answer: C**

Explanation:

The code uses Chef's Ruby DSL for defining a role with name, description, run\_list, and default\_attributes, which are constructs specific to Chef.

### NEW QUESTION # 27

A systems administrator wants to prevent the current contents of a file from being overwritten and wants to allow new additions at the end of the file. Which of the following commands should the administrator use?

- A. `chattr +a file`
- B. `setenforce file`
- C. `chmod +t file`
- D. `setfacl -m m:~ file`

**Answer: A**

Explanation:

The `chattr +a` command sets the append-only attribute on a file. This prevents overwriting or deletion of existing contents, while still allowing new data to be appended to the end of the file.

### NEW QUESTION # 28

.....

Just imagine that if you get the XK0-006 certification, then getting high salary and promotion will completely have no problem.
