1Z0-106 Exam Torrent | Free 1Z0-106 Vce Dumps

With our 1Z0-106 exam questions, the most important and the most effective reward is that you can pass the exam and get the 1Z0-106 certification. And it is also what all of the candidates care about. At the same time, you can also get some more practical skills. Your work efficiency will increase and your life will be more capable. Our 1Z0-106 Guide questions are such a very versatile product to change your life and make you become better.

Oracle Linux 8 Advanced System Administration Sample Questions (Q21-Q26):

NEW QUESTION # 21

Examine these Kubernetes components:

Which option correctly matches the components with their description?

- A. 1-c, 2-f, 3-d, 4-b, 5-e, 6-a
- B. 1-d, 2-f, 3-e, 4-a, 5-c, 6-b

- C. 1-a, 2-d, 3-b, 4-c, 5-e, 6-f
- **D. 1-d, 2-f, 3-c, 4-e, 5-a, 6-b**
- E. 1-b, 2-a, 3-e, 4-c, 5-f, 6-d

Answer: D

NEW QUESTION # 22

Which two statements are true about removing a physical volume (PV) from a volume group (VG)?

- A. It can be removed when an active VG has mounted file systems by running vgexport.
- B. It can be removed when it is part of an active VG.
- C. It cannot be removed when it is part of an active VG.
- **D. It can be removed only after removing it from its VG by using vgreduce.**
- **E. It can be removed when an inactive logical volume is on the VG.**

Answer: D,E

Explanation:

To remove a physical volume (PV) from a volume group (VG), it must first be removed using the `vgreduce` command. This operation ensures that the VG no longer contains any references to the PV being removed.

Explanation of Answer D: A physical volume can be removed if there are no active logical volumes (LVs) on the VG that require space from that PV. If the LV is inactive, the PV can be safely removed from the VG.

NEW QUESTION # 23

Examine these commands and output:

```
# cat /etc/auto.master
/net -hosts
/- auto.direct ro
# cat /etc/auto.direct
/nfs1 host01:/export/share1
/nfs2 -sync host01:/export/share2
/nfs3 host02:/export/share3
```

Automounter must be used to mount these filesystems. Which mount options will it use?

- A. All three filesystems are mounted read-only, sync.
- B. /nfs1 and /nfs3 are mounted read-only, async while /nfs2 is mounted read-write, sync.
- **C. /nfs1 and /nfs3 are mounted read-only, async while /nfs2 is mounted read-only, sync.**
- D. All three filesystems are mounted read-only, async.
- E. All three filesystems are mounted read-write, sync.

Answer: C

Explanation:

Understanding the Automounter Configuration:

```
/etc/auto.master:
/net -hosts
/- auto.direct ro
* The /- auto.direct ro line indicates:
* Mount Point Prefix/ (direct mounts)
* Map File:auto.direct
* Global Mount Options:ro (read-only)
/etc/auto.direct:
/nfs1 host01:/export/share1
/nfs2 -sync host01:/export/share2
/nfs3 host02:/export/share3
* /nfs1 and /nfs3:
* No specific mount options in auto.direct.
* Inherit the ro option from /etc/auto.master.
* /nfs2:
```

- * Specifies -sync option in auto.direct.
 - * Inherits ro from /etc/auto.master.
 - * Mount options are ro, sync.
- Mount Options Resolution:
- * Global Options (ro) apply to all entries unless overridden.
 - * Per-Entry Options in auto.direct override or supplement global options.

Effective Mount Options:

- * /nfs1:
- * ro (from /etc/auto.master)
- * Default NFS options (async unless sync is specified)
- * /nfs2:
- * ro (from /etc/auto.master)
- * sync (specified in auto.direct)
- * /nfs3:
- * ro (from /etc/auto.master)
- * Default NFS options (async)

Oracle Linux Reference:

* OracleLinux 8: Configuring File Systems-Automounter Configuration:

"Options specified in the master map apply to all entries in the map unless overridden by entries in the map itself."

* NFS Default Options:

"By default, NFS mounts are asynchronous (async) unless the sync option is specified." Conclusion:

* /nfs1 and /nfs3: Mounted with ro, async.

* /nfs2: Mounted with ro, sync.

* Correct Option: A

NEW QUESTION # 24

Examine this output:

```
Last metadata expiration check: 4:30:21 ago on Mon 26 Oct 2020 03:09:52 PM GMT Installed Packages Name : gzip Release : 9.e8 Architecture : x86_64 Size : 412 k Source : gzip-1.9-9.e8.src.rpm Repository : @System From repo : anaconda Summary : The GNU data compression program URL : http://www.gzip.org/ License : GPLv3+ and GFDL Description : The gzip package contains the popular GNU gzip data compression program. Gzipped files have a .gz extension.
```

Gzip should be installed on your system, because it is a very commonly used data compression program.

Which command generated it?

- A. `dnf search /usr/bin/gzip`
- B. `dnf list /usr/bin/gzip`
- C. `dnf info /usr/bin/gzip`
- D. `dnf provides /usr/bin/gzip`

Answer: C

NEW QUESTION # 25

Examine this command:

```
# nft add rule inet filter input tcp dport 80 drop
```

Which two statements are true upon execution?

- A. All traffic inbound on port 80 is dropped.
- B. The rule is applied to both IPv4 and IPv6 packets.
- C. TCP packets inbound on port 80 are dropped.
- D. The rule applies to the input table.
- E. TCP packets outbound on port 80 are dropped.
- F. The rule updates the configuration on disk.

Answer: B,C

NEW QUESTION # 26

.....

In order to serve you better, we have a complete service system for you if you purchasing 1Z0-106 learning materials. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. After your payment for 1Z0-106 exam dumps, you can receive your downloading link and password within ten minutes, if you don't receive, you can contact with us, and we will solve it for you. You can enjoy free update for 365 days after buying 1Z0-106 Exam Dumps, and the update version will be sent to your email automatically. If you have any questions about 1Z0-106 exam dumps after buying, you can contact with our after-sale service.
