Marvelous Valid Test TDA-C01 Braindumps & Leader in Qualification Exams & 100% Pass-Rate TDA-C01: Tableau Certified Data Analyst

It is simple and concise study material. The Tableau Certified Data Analyst (TDA-C01) PDF Questions consist of actual exam questions. The TDA-C01 PDF is a printable format and is extremely portable. You can get a hard copy or share it on your smartphone, laptop, and tablet as needed. The Tableau TDA-C01 PDF is also regularly reviewed by our experts so that you never miss important changes from Tableau TDA-C01.

Tableau Certified Data Analyst Sample Questions (Q110-Q115):

NEW QUESTION # 110

You have a dataset that contains sales data. The following is a sample of the data.

You need to return a value of true if a month has sales greater than \$50 000. otherwise the formula must return a value of false. Which two formulas achieve the goal Choose two

- A. $[Sales] > 50000$
- B. $\text{MAX}([Sales], 50000)$
- C. $\text{IF}(\text{SUM}([Sales]) > 50000, \text{TRUE}, \text{FALSE})$

- D. $\text{SUM}([\text{Sales}]) \text{ IN } (50000)$

Answer: A,C

Explanation:

The two formulas that will return a value of true if a month has sales greater than \$50,000, otherwise the formula must return a value of false, are:

B: $\text{IIF}(\text{SUM}([\text{Sales}]) > 50000, \text{TRUE}, \text{FALSE})$ D. $[\text{Sales}] > 50000$

The IIF function is a logical function that returns one value if a condition is true, and another value if the condition is false. In this case, the condition is $\text{SUM}([\text{Sales}]) > 50000$, which means that the sum of sales for a month is greater than \$50,000. The function will return TRUE if the condition is true, and FALSE if the condition is false.

The comparison operator $>$ is a logical operator that returns TRUE if the left operand is greater than the right operand, and FALSE otherwise. In this case, the operands are $[\text{Sales}]$ and 50000, which means that the sales for a month are greater than \$50,000. The operator will return TRUE if the sales are greater than \$50,000, and FALSE otherwise.

The other options are not correct for this scenario. The IN function is a logical function that returns TRUE if a value is in a set of values, and FALSE otherwise. In this case, the value is $\text{SUM}([\text{Sales}])$, which is not in the set of values (50000). The function will always return FALSE. The MAX function is an aggregation function that returns the maximum value in a field or expression. In this case, the field or expression is $[\text{Sales}]$, 50000, which is not valid syntax. The function will return an error. References:

NEW QUESTION # 111

Open the link to Book1 found on the desktop. Open the Movie Durations worksheet.

Replace the existing data source with the Netflix_2019 data source.

- A. check the steps below in explanation

Answer: A

Explanation:

To replace the existing data source with the Netflix_2019 data source, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Movie Durations worksheet. Click on the Movie Durations tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the number of movies by duration for the existing data source.

Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the existing data source.

Click on the drop-down arrow next to the data source name at the top of the page and select Replace Data Source from the menu. This will open a dialog box that allows you to replace your data source with another one.

Select Netflix_2019 from the list of available data sources and click OK. This will replace your existing data source with the Netflix_2019 data source and update your worksheet accordingly. You may need to fix any broken fields or calculations that result from the replacement.

NEW QUESTION # 112

You have a data source that contains the following columns.

You want to sort customers based on the most expensive orders.

How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

Answer:

Explanation:

NEW QUESTION # 113

You need the top 10 values to appear in a different color. The top 10 values must be colored dynamically.

What should you do?

- A. Select the top 10 bars, and then change the color by selecting Color on the Marks card.
- B. Select the top 10 bars, create a set, and then drag the set to Color on the Marks card.
- C. **Create a set that has a top 10 condition, and then drag the set to Color on the Marks card.**
- D. Create a group field that groups the top 10 values into one group and the rest of the values into another group. Drag the group field to Color on the Marks card.

Answer: C

NEW QUESTION # 114

Open the link to Book1 found on the desktop. Open SalesVSProfit worksheet. Add a distribution band on Profit to show the standard deviation from- 1 to 1.

- A. Send us your
- B. Send us your feedback on it.

Answer: B

NEW QUESTION # 115

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our Tableau experts deem it impossible to drop the TDA-C01 exam, if you believe that you have learnt the contents of our TDA-C01 study guide and have revised your learning through the TDA-C01 Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our TDA-C01 study guide and their indispensability for all those who want success without any second thought.
