EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

What is a benefit of using vVols for VMware storage provisioning in PowerStore?

- A. Simplified power management
- B. Accelerated network speed
- C. Fine-grained control over VM storage
- D. Improved graphics rendering

Answer: C

NEW QUESTION # 77

A storage administrator has configured the addition of a VNX2 as a remote system for migration. What is the result of this configuration?

- A. PowerStore iSCSI initiators are registered on the VNX2 system
- B. Import sessions from the VNX2 are started for all Windows host accessed LUNs
- C. Import sessions from the VNX2 are scheduled for automatic cutover
- D. PowerStore Fibre Channel initiators are register on the VNX2 system

Answer: D

NEW QUESTION # 78

Which two NAS servers must be configured with DNS support? (Choose two.)

- A. Servers that are joined to Active Directory.
- B. Servers that are used for Multiprotocol access.
- C. Servers that are configured as Standalone.
- D. Servers that are used as FTP servers.
- E. Servers that are accessed through S3 protocol.

Answer: A,B

Explanation:

B . Servers that are joined to Active Directory:

DNS is required for resolving domain controllers' names when NAS servers are joined to an Active Directory domain. Proper DNS support ensures seamless integration and authentication within the domain.

D . Servers that are used for Multiprotocol access:

Multiprotocol access allows both SMB (CIFS) and NFS clients to access the same NAS server. DNS is essential for name resolution, especially in environments where SMB relies on domain-based configurations.

NEW QUESTION # 79

What is the minimum number of storage drives required for a base enclosure?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D
