Exam DS0-001 Material & Valid DS0-001 Test Questions

You should make progress to get what you want and move fast if you are a man with ambition. At the same time you will find that a wonderful aid will shorten your time greatly. To get the DS0-001 certification is considered as the most direct-viewing way to make big change in your professional profile, and we are the exact DS0-001 Exam Braindumps vendor. If you have a try on our free demos of our DS0-001 study guide, you will choose us!

CompTIA DataSys+ Certification Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46
Which of the following are the best resources for monitoring potential server issues? (Choose two.)

- A. User connections
- B. Memory usage
- C. Query execution
- D. Firewall usage
- E. CPU usage
- F. Index usage

Answer: B,E

Explanation:
The two resources that are best for monitoring potential server issues are CPU usage and memory usage. CPU usage is the percentage of time that the processor (CPU) of the server is busy executing instructions or processes. CPU usage indicates how much workload the server can handle and how fast it can process requests. High CPU usage may affect the performance or availability of the server and cause delays or errors. Memory usage is the amount of physical memory (RAM) or virtual memory (swap space) that the server uses to store data or run applications. Memory usage indicates how much space the server has to store temporary or intermediate data or results. High memory usage may affect the performance or availability of the server and cause swapping or paging. The other options are either not relevant or not direct indicators of server health. For example, user connections are the number of users who are connected to a database server at any given time; firewall usage is the amount of data that passes through a firewall device or software; index usage is the frequency or efficiency of using indexes on tables to speed up queries; query execution is the process of running SQL statements on a database server. Reference: CompTIA DataSys+ Course Outline, Domain 3.0 Database Management and Maintenance, Objective 3.2 Given a scenario, monitor database performance.

NEW QUESTION # 47
Which of the following would a database administrator monitor to gauge server health? (Choose two.)

- A. Transaction logs
- B. Network sniffer
- C. Memory usage
- D. Domain controllers
- E. Firewall traffic
- F. CPU usage

Answer: C,F

Explanation:
The two factors that the database administrator should monitor to gauge server health are CPU usage and memory usage. CPU usage is the percentage of time that the processor (CPU) of the server is busy executing instructions or processes. CPU usage indicates how much workload the server can handle and how fast it can process requests. High CPU usage may affect the performance or availability of the server and cause delays or errors. Memory usage is the amount of physical memory (RAM) or virtual memory (swap space) that the server uses to store data or run applications. Memory usage indicates how much space the server has to store temporary or intermediate data or results. High memory usage may affect the performance or availability of the server and cause swapping or paging. The other options are either not relevant or not direct indicators of server health. For example, transaction logs are files that record the changes made by transactions on the database; network sniffer is a tool that captures and analyzes network traffic; domain controllers are servers that manage user authentication and authorization in a network; firewall traffic is the amount of data that passes through a firewall device or software.

NEW QUESTION # 48
Which of the following database instances are initiated by default when a database administrator installs a SQL Server instance for the first time? (Choose two.)

- A. Index
- B. View
- C. Root
- D. Master

- E. Model
- F. Log

Answer: D,E

NEW QUESTION # 49

Several users received a message from the Chief Executive Officer asking them for their bank account details. Which of the following types of attacks is taking place?

- A. Denial of service
- B. Phishing
- C. Brute-force
- D. Malware

Answer: B

NEW QUESTION # 50

Following a security breach, a database administrator needs to ensure users cannot change data unless a request is approved by the management team. Which of the following principles addresses this issue?

- A. Elevated privilege
- B. Open access
- C. Least privilege
- D. Least resistance

Answer: C

Explanation:
The principle that addresses this issue is least privilege. Least privilege is a security principle that states that users should only have the minimum level of access or permissions required to perform their tasks or roles. By applying this principle, the administrator can ensure that users cannot change data unless they have been authorized by the management team through a request approval process. This prevents unauthorized or accidental modifications of data that may compromise its integrity or security. The other options are either opposite or unrelated to this principle. For example, open access means that users have unrestricted access to data; least resistance means that users have the easiest or most convenient access to data; elevated privilege means that users have higher or more permissions than they need. Reference: CompTIA DataSys+ Course Outline, Domain 4.0 Data and Database Security, Objective 4.1 Given a scenario, apply security principles and best practices for databases.

NEW QUESTION # 51

......

Hence, memorizing them will help you get prepared for the CompTIA DS0-001 examination in a short time. The product of ExamsLabs comes in PDF, desktop practice exam software, and CompTIA DataSys+ Certification Exam (DS0-001) web-based practice test. To give you a complete understanding of these formats, we have discussed their features below.

Exam DS0-001 Material: https://www.examslabs.com/CompTIA/CompTIA-DataSys/best-DS0-001-exam-dumps.html

CompTIA Practice DS0-001 Exam Fee Hope you can pass the exam as soon as possible, The fee for the examination is too much for students who want to have an Exam DS0-001 Material certificate and add skills to their profile, The software version is one of the different versions that is provided by our company, and the software version of the DS0-001 study materials is designed by all experts and professors who employed by our company, CompTIA Practice DS0-001 Exam Fee We can promise that quality first, service upmost.

Go back to paper maps, Choose the quickest DS0-001 path to solve high-impact problems, Hope you can pass the exam as soon as possible, The fee for the examination is too much for New DS0-001 Test Forum students who want to have an CompTIA DataSys+ certificate and add skills to their profile.
