ISACA CDPSE인증시험은 전문적인 관련지식을 테스트하는 인증 시험입니다. ExamPassdump는 여러분이ISACA CDPSE인증시험을 통과할 수 있도록 도와주는 사이트입니다. 여러분은 응시 전 저희의 문제와 답만 잘 장악한다면 빠른 시일 내에 많은 성과가 있을 것입니다.

ISACA CDPSE (Certified Data Privacy Solutions Engineer) 시험은 전문가들이 데이터 프라이버시 솔루션을 설계하고 구현하는 데 필요한 지식과 기술을 갖추도록 인증하는 프로그램입니다. 이 인증은 전 세계적으로 인정받으며, 소유자가 조직 내에서 효과적인 데이터 프라이버시 솔루션을 구현할 수 있다는 것을 나타냅니다. CDPSE 시험은 데이터 프라이버시 거버넌스, 데이터 보호, 데이터 보존 및 데이터 폐기 등의 주제를 다룹니다. 시험은 후보자의 프라이버시 위험 분석 및 완화 능력, 프라이버시 정책 및 절차의 작성 및 구현 능력, 그리고 프라이버시 규정 준수 모니터링 및 보고 능력을 테스트하기 위해 설계되었습니다.

## CDPSE퍼펙트 덤프 최신버전 & CDPSE시험대비덤프

ExamPassdump는 전문적인 IT인증시험덤프를 제공하는 사이트입니다.CDPSE인증시험을 패스하려면 아주 현명한 선택입니다. ExamPassdump에서는CDPSE관련 자료도 제공함으로 여러분처럼 IT 인증 시험에 관심이 많은 분들에게 아주 유용한 자료이자 학습가이드입니다. ExamPassdump는 또 여러분이 원하도 필요로 하는 최신 최고버전

의 CDPSE 문제와 답을 제공합니다.

CDPSE 시험은 데이터 개인 정보 보호 거버넌스, 데이터 보호, 개인 정보 보호 규정 및 위험 관리를 포함한 광범위한 주제를 다룹니다. 시험은 4 개의 도메인으로 나뉘며 각 도메인은 특정 데이터 개인 정보 보호 엔지니어링 영역에 중점을 둡니다. 이러한 도메인에는 개인 정보 보호 거버넌스, 개인 정보 보호 아키텍처, 데이터 개인 정보 보호 운영 및 데이터 보호 구현이 포함됩니다. 응시자는 인증을 받기 위해 각 도메인 각각에 대한 지식과 숙련도를 보여 주어야 합니다.

ISACA CDPSE (Certified Data Privacy Solutions Engineer) 인증 시험은 데이터 개인 정보 및 보안을 전문으로 하는 개인을 위한 전 세계적으로 인정된 인증입니다. CDPSE 인증 프로그램은 ISACA (Information Systems Audit and Control Association)에 의해 개발되고 관리됩니다. ISACA (Global Governance, Audit 및 Cybersecurity Professional의 주요 협회).

## 최신 Isaca Certification CDPSE 무료 샘플 문제 (Q197-Q202):

### 질문 # 197

Which of the following is the PRIMARY benefit of implementing policies and procedures for system hardening?

- A. It increases system resiliency.
- B. It eliminates attack motivation for data.
- C. It reduces exposure of data.
- D. It reduces external threats to data.

정답: A

#### 설명:

Explanation

System hardening is a process of applying security measures and configurations to a system to reduce its attack surface and enhance its resistance to threats. System hardening can include disabling unnecessary services, removing default accounts, applying patches and updates, enforcing strong passwords and encryption, and implementing firewalls and antivirus software. The primary benefit of system hardening is that it increases system resiliency, which is the ability of a system to withstand or recover from adverse events that could affect its functionality or performance. The other options are not the primary benefits of system hardening, although they may be secondary benefits or outcomes. System hardening does not necessarily reduce external threats to data, as threats can originate from various sources and vectors. System hardening may reduce exposure of data, but only if the data is stored or processed by the system. System hardening does not eliminate attack motivation for data, as attackers may have different motives and incentives for targeting data. , p. 91-92 References: : CDPSE Review Manual (Digital Version)

### 질문 # 198

Which of the following is MOST likely to present a valid use case for keeping a customer's personal data after contract termination?

- A. For the purpose of medical research
- B. Ease of onboarding when the customer returns
- C. A required retention period due to regulations
- D. A forthcoming campaign to win back customers

정답: C

#### 설명:

Data retention is a process of keeping personal data for a specified period of time for legitimate purposes, such as legal obligations, contractual agreements, business operations or historical records. Data retention should be based on the principle of data minimization, which requires limiting the collection, storage and processing of personal data to what is necessary and relevant for the intended purposes. Data retention should also comply with the principle of storage limitation, which requires deleting or disposing of personal data when it is no longer needed or justified. The most likely valid use case for keeping a customer's personal data after contract termination is a required retention period due to regulations, such as tax laws, financial laws, health laws or consumer protection laws, that mandate the organization to retain certain types of customer data for a certain period of time after the end of the contractual relationship. The other options are not valid use cases for keeping a customer's personal data after contract termination, as they do not meet the criteria of necessity, relevance or justification. For the purpose of medical research, the organization would need to obtain the consent of the customer or have another legal basis for processing their personal data for a different purpose than the original contract. A forthcoming campaign to win back customers or ease of onboarding when the customer returns are not legitimate purposes for retaining customer data after contract termination, as they are not related to the original contract and may violate the customer's privacy rights and preferences. , p. 99-100 Reference: : CDPSE Review Manual (Digital Version)

**질문 # 199**

A migration of personal data involving a data source with outdated documentation has been approved by senior management. Which of the following should be done NEXT?

- A. Ensure appropriate data classification.
- B. Review data flow post migration.
- C. Check the documentation version history for anomalies.
- D. Engage an external auditor to review the source data.

**정답: A**

**설명:**

Ensuring appropriate data classification should be done next after a migration of personal data involving a data source with outdated documentation has been approved by senior management, as it helps to identify the types, locations, and owners of the data, and to apply the appropriate privacy controls and measures based on the data classification level. Data classification also facilitates the data discovery, data minimization, data retention, and data disposal processes<sup>15</sup>. Reference: 1 Domain 3, Task 2; 5 Page 9

**질문 # 200**

Which of the following should be done FIRST when developing an organization-wide strategy to address data privacy risk?

- A. Gather privacy requirements from legal counsel.
- B. Obtain executive support.
- C. Create a comprehensive data inventory.
- D. Develop a data privacy policy.

**정답: B**

**설명:**

Obtaining executive support is the first step in developing an organization-wide strategy to address data privacy risk, as it ensures that the privacy program has the necessary resources, authority, and alignment with the organization's goals and objectives. Without executive support, the privacy program may face challenges in implementing and enforcing privacy policies, procedures, and controls across the organization. Reference: 2 Domain 1, Task 1

**질문 # 201**

Which of the following is the PRIMARY reason to use public key infrastructure (PKI) for protection against a man-in-the-middle attack?

- A. It provides a secure connection on an insecure network
- B. It makes public key cryptography feasible.
- C. It contains schemes for revoking keys.
- D. It uses Transport Layer Security (TLS).

**정답: B**

**설명:**

Explanation

Public key infrastructure (PKI) is a system that enables the use of public key cryptography, which is a method of encrypting and authenticating data using a pair of keys: a public key and a private key. Public key cryptography can protect against man-in-the-middle (MITM) attacks, which are attacks where an attacker intercepts and modifies the communication between two parties. PKI makes public key cryptography feasible by providing a way to generate, distribute, verify, and revoke public keys. PKI also uses digital certificates, which are documents that bind a public key to an identity, and certificate authorities, which are trusted entities that issue and validate certificates. By using PKI, the parties can ensure that they are communicating with the intended recipient and that the data has not been tampered with by an attacker.
