#### **NEW QUESTION # 45**

Universal Containers wants to prevent the lunch break from interfering with existing scheduled work.

How should a Consultant configure the Scheduling Policy to ensure a 30-minute lunch break that begins every day after 1 PM?

- A. Create a recurring Service Appointment.
- B. Create Resource Absences every day.
- C. Use appropriate Resource Operating Hours.
- **D. Use the Resource Availability Rule.**

**Answer: D**

Explanation:

Resource Availability Rules are rules that define when resources are available for service appointments based on their working hours, absences, breaks, travel time, etc. [77]. Using the Resource Availability Rule would allow configuring the Scheduling Policy to ensure a 30-minute lunch break that begins every day after 1 PM by setting up criteria such as break duration equals 30 minutes and break start time after 1 PM [78]. Creating a recurring Service Appointment would not ensure a 30-minute lunch break that begins every day after 1 PM.

Recurring Service Appointments are service appointments that repeat at regular intervals such as daily, weekly, or monthly [79]. Using appropriate Resource Operating Hours would not ensure a 30-minute lunch break that begins every day after 1 PM.

Resource Operating Hours are records that define when resources are available for work based on their time zones, business hours, holidays, etc.[80]. Creating Resource Absences every day would not ensure a 30-minute lunch break that begins every day after 1 PM. Resource Absences are records that mark resources as unavailable for work for specific time periods due to sickness, vacation, or other reasons[81].
