MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q102-Q107):

NEW QUESTION # 102

A substance or material that is capable of posing an unreasonable risk to health, safety, and property when transported in commerce is

- **A. HAZMAT**
- B. PHMSA
- C. dangerous goods
- D. HAZCOM

Answer: A

Explanation:

CLT uses the U.S. term "hazardous material (HAZMAT)" for substances posing unreasonable risks in transportation; internationally the term "dangerous goods" is common. PHMSA is the regulating agency within USDOT, and HAZCOM refers to OSHA's Hazard Communication standard, not the material itself. Thus, the definition aligns with HAZMAT.

Reference:

NEW QUESTION # 103

Federal DOT regulations pertain to transport of

- A. HAZMAT
- B. Truck
- C. Water
- D. Air

Answer: A

Explanation:

The U.S. Department of Transportation (DOT), through the Pipeline and Hazardous Materials Safety Administration (PHMSA), regulates the transportation of hazardous materials (HAZMAT) in commerce. CLT 4.0 emphasizes that all individuals involved in preparing, loading, transporting, or receiving hazardous goods must comply with DOT standards for classification, labeling, packaging, and documentation. These regulations ensure materials posing risks to health, safety, and property are properly contained and communicated throughout the supply chain. DOT's HMR (Hazardous Materials Regulations, 49 CFR Parts 171-180) set out training, packaging standards, and placarding systems used on all transport vehicles. While other agencies oversee workplace safety or environmental issues, DOT specifically governs transportation safety across all modes-truck, rail, air, and vessel.

NEW QUESTION # 104

The document prepared by the shipper and signed by the consignee when the freight is received at its destination is called a

- A. Purchase Order
- B. Packing List
- C. Bill of Lading
- D. Carrier Requisition

Answer: C

Explanation:

The Bill of Lading serves as the central contract of carriage between shipper and carrier, as defined in the CLT "Dispatch and Tracking" module. It documents shipment details-such as shipper, consignee, commodity, weight, and handling instructions-and must be signed upon receipt. The consignee's signature confirms acceptance, completing the shipment lifecycle. It simultaneously acts as a receipt for goods, evidence of a contract, and a title document. The packing list itemizes contents; the purchase order initiates procurement; the carrier requisition is not an official transport form. Thus, the Bill of Lading uniquely meets all required delivery confirmation criteria.

NEW QUESTION # 105

Which of the following is the most basic Automated Storage and Retrieval System (AS/RS) used to store and retrieve materials that has an operator present?

- A. The Mezzanine
- B. Vertical Lift Module (VLM)
- C. A-Frame dispensing system
- D. Man-on-Board

Answer: D

Explanation:

The Man-on-Board AS/RS represents the simplest automated retrieval system where an operator rides on the storage/retrieval machine to manually select or place loads. CLT's "Automated Systems" section identifies this as a semi-automated system that combines human control with mechanical assistance for efficiency and precision. It contrasts with fully automated AS/RS where retrieval is entirely computer-controlled. The Man-on-Board system is ideal for large or variable-sized items requiring human judgment. CLT emphasizes that even with operator presence, safety protocols-such as harnessing, emergency stops, and restricted access-must be followed. This system provides a transitional solution between manual storage and full automation, improving throughput while maintaining operator involvement.

NEW QUESTION # 106

E-commerce enables the company to

- A. get driving directions
- B. look up information on the Internet
- C. exchange email
- D. exchange goods and services online

Answer: D

Explanation:

In the CLT "Order Processing" section, e-commerce is described as the digital mechanism allowing businesses to buy, sell, and exchange goods, services, and data through online systems. It forms the foundation for electronic ordering, payment, and customer communication. Unlike basic internet use or email exchange, e-commerce platforms connect directly with warehouse management and order processing systems to automate inventory updates, order confirmations, and shipping notifications. This integration supports real-time data flow between customers and logistics facilities, enhancing order accuracy, visibility, and responsiveness.

NEW QUESTION # 107

• • • • •

If you master our CLT quiz torrent and pass the exam it proves that you have excellent working abilities and can be suitable for a good job. You will earn a high salary in a short time. Besides, you will get a quick promotion in a short period because you have excellent working abilities and can do the job well. You will be respected by your colleagues, your boss, your relatives, your friends and the society. All in all, buying our CLT Test Prep can not only help you pass the exam but also help realize your dream about your career and your future.
