It is a challenging exam and not a traditional exam. But complete ISTQB ISTQB-CTFL exam preparation can enable you to crack the ISTQB ISTQB-CTFL exam easily. For the quick and complete ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) exam preparation you can trust ISTQB-CTFL Exam Practice test questions. The ISTQB ISTQB-CTFL exam practice test questions have already helped many ISTQB ISTQB-CTFL exam candidates in their preparation and success.

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q119-Q124):

NEW QUESTION # 119

You are responsible for applying the correct technique for a review of the requirements document for a project to develop a new software application. You identify the reviewers and the required roles, including the meeting leader, who is the requirements document author, and a separate role for a scribe. Additionally, you decide to take a relatively informal approach to the requirements review. The goal of the review is to find defects in the requirements document, such as omissions, Inconsistencies, and duplications. Another goal of the review is to improve the software application's usability and accessibility by considering the various stakeholders' viewpoints.

Which of the following statements BEST describes this scenario?

- A. This scenario is using a pair review type and a perspective-based review technique
- B. This scenario is using a pair review type and a checklist-based review technique

- C. This scenario is using a walkthrough review type and a perspective-based review technique
- D. This scenario is using a walkthrough review type and a checklist-based review technique

Answer: C

Explanation:

This scenario is using a walkthrough review type and a perspective-based review technique. In a walkthrough, the author of the document leads the meeting and it typically includes a meeting leader and a scribe, as described. This type of review is informal, focuses on discussion, and often involves scenario-based reading of the document to understand different user perspectives (ISTQB Main Web).References:

NEW QUESTION # 120

Out of the following, what is not needed to specify in defect report?

- A. How to fix the defect
- B. How to reproduce the defect
- C. Severity and priority
- D. Test environment details

Answer: A

Explanation:

A defect report is a document that records the details of a defect found during testing. A defect report typically contains the following items:

* Identifier: A unique identifier for the defect report

* Summary: A concise summary of the defect

* Description: A detailed description of the defect, including the steps to reproduce it, the expected and actual results, and any relevant screenshots or logs

* Severity: The degree of impact that the defect has on the system

* Priority: The level of urgency for resolving the defect

* Status: The current state of the defect, such as new, open, resolved, closed, etc.

* Resolution: The action taken to resolve the defect, such as fix, workaround, reject, etc. Out of these items, the one that is not needed to specify in a defect report is how to fix the defect. How to fix the defect is a technical solution that is usually determined by the developer who is assigned to resolve the defect. How to fix the defect is not part of the defect report, but rather part of the code change or patch that is delivered to fix the defect. The other items are needed to specify in a defect report, as they provide essential information for identifying, tracking and resolving defects. NEW QUESTION # 121

Who of the following has the best knowledge to decide what tests in a test project should be automated?

- A. The developer
- B. The test leader
- C. The development manager
- D. The customer

Answer: B

Explanation:

The test leader is the person who is responsible for planning, monitoring, and controlling the test activities and resources in a test project. The test leader should have the best knowledge of the test objectives, scope, risks, resources, schedule, and quality criteria. The test leader should also be aware of the test automation criteria, such as the execution frequency, the test support, the team education, the roles and responsibilities, and the devs and testers collaboration1. Based on these factors, the test leader can decide which tests are suitable for automation and which are not, and prioritize them accordingly. The test leader can also coordinate with the test automation engineers, the developers, and the stakeholders to ensure the alignment of the test automation strategy with the test project goals and expectations. NEW QUESTION # 122

Which ONE of the following options MOST ACCURATELY describes branch testing?

- A. In branch testing, the coverage items are branches, and the aim is to design test cases to exercise branches in the code until an acceptable level of coverage is achieved. Coverage is measured as the number of branches exercised by the test cases divided by the total number of branches expressed as a percentage.
- B. In branch testing, the coverage items are executable decisions. The aim is to design test cases that exercise statements in the code until an acceptable level of coverage is achieved. Coverage is expressed as a percentage.
- C. In branch testing, the coverage items are control flow transfers between decisions, and the aim is to design test cases to exercise flow transfers in the code until an acceptable level of coverage is achieved. Coverage is measured as the number of branches exercised by the test cases divided by the total number of branches expressed as a percentage.
- D. In branch testing, the coverage items are executable statements. The aim is to design test cases that exercise statements in the code until an acceptable level of coverage is achieved, expressed as a percentage.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: Branch testing is a structural testing technique that ensures each branch (decision point) in the control flow is executed at least once. The goal is to measure branch coverage, which is the number of branches exercised divided by the total number of branches.

* (A) describes statement testing, not branch testing.

* (B) and (D) introduce confusion between decisions and statements, whereas branch testing focuses on control flow branches.

In simple terms, branch testing checks that all possible decision outcomes (true/false) are executed, whereas statement testing only ensures that each line of code is executed.

NEW QUESTION # 123

Which ONE of the following options BEST describes Behavior-Driven Development (BDD)?

- A. Is primarily focused on non-functional testing techniques to ensure system reliability and performance.
- B. Defines test cases at a low level, close to the implementation, using unit test frameworks.
- C. Requires testing to be performed after development is completed to validate software functionality.
- D. Expresses the desired behavior of an application with test cases written in a simple form of natural language that is easy to understand by stakeholders-usually using the Given/When/Then format. Test cases are then automatically translated into executable tests.

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

BDD emphasizes collaboration between developers, testers, and business stakeholders to define system behavior in a readable format (A). It typically uses the Given-When-Then syntax. Unlike unit testing (B), BDD is at a higher level of abstraction. It does not focus solely on non-functional testing (C) and encourages early testing rather than post-development validation (D).

NEW QUESTION # 124

.....

In the 21st century, all kinds of examinations are filled with the life of every student or worker. We need to pass some exams to get the corresponding certificates like ISTQB-CTFL certification, so as to get the recognition of enterprises and society. However, passing an ISTQB-CTFL Exam is not easy, and a large number of people fail to pass it every year, as is the case with the ISTQB-CTFL exam. But if you choose to buy our ISTQB-CTFL study materials, you will pass the exam easily.

ISTQB-CTFL Latest Guide Files: <https://www.testvalid.com/ISTQB-CTFL-exam-collection.html>

Some of our customers are white-collar workers with no time to waste, and need a ISTQB ISTQB-CTFL Latest Guide Files certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills, Our complete coverage of knowledge points of ISTQB-CTFL: ISTQB Certified Tester Foundation Level (CTFL v4.0) exam cram will help most

of the candidates pass exams easily, but if by any chance you fail at the first attempt, we guarantee a full refund on your purchase, Our Foundation Level ISTQB-CTFL vce dumps questions are finished and summarized by our professional team and corrected by senior IT experts.

Leading a new team, For example, the Cocoa convention of two ISTQB-CTFL Vce Download stage allocation and initialization makes the GoF Abstract factory and Builder patterns trivial, Some of our customers are white-collar workers with no time to waste, and need a ISTQB ISTQB-CTFL certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills.

2026 Realistic ISTQB Valid ISTQB-CTFL Exam Forum Pass Guaranteed Quiz

Our complete coverage of knowledge points of ISTQB-CTFL: ISTQB Certified Tester Foundation Level (CTFL v4.0) exam cram will help most of the candidates pass exams easily, but if by any chance you fail at the first attempt, we guarantee a full refund on your purchase.

Our Foundation Level ISTQB-CTFL vce dumps questions are finished and summarized by our professional team and corrected by senior IT experts, At the same time, our industry experts will continue to update and supplement ISTQB-CTFL test question according to changes in the exam outline, so that you can concentrate on completing the review of all exam content without having to pay attention to changes in the outside world.

This does not matter, with the TestValid's ISTQB ISTQB-CTFL exam training materials in hand, you will pass the exam successfully.
