As long as you are willing to exercise on a regular basis, the NIS-2-Directive-Lead-Implementer exam will be a piece of cake, because what our NIS-2-Directive-Lead-Implementer practice materials include is quintessential points about the exam. And our high pass rate as 98% to 100% are all proved data from our customers who had attended the NIS-2-Directive-Lead-Implementer Exam and got their success with the help of our NIS-2-Directive-Lead-Implementer study dumps. So just come on and join our success!

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q30-Q35):

NEW QUESTION # 30

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms.

According to scenario 1, SecureTech strongly emphasizes adopting a proactive cybersecurity approach, primarily focusing on preventing cyber threats before they escalate into incidents that could result in substantial material or non-material damage. Is this in alignment with the NIS 2 Directive?

- A. Yes, the NIS 2 Directive prioritizes proactive cybersecurity to prevent cyber threats from causing significant harm or damage.
- B. No, this NIS 2 Directive focuses only on identifying and mitigating incidents rather than cyber threats
- C. No, the NIS 2 Directive strongly emphasizes adopting a reactive cybersecurity approach

Answer: A

NEW QUESTION # 31

According to Article 7 of the NIS 2 Directive, what is one of the aspects that the national cybersecurity strategy adopted by Member States must include?

- A. A list of authorities and stakeholders
- B. Policies on foreign trade agreements
- C. Plans for infrastructure development

Answer: A

NEW QUESTION # 32

Which of the following disaster recovery phases places significant emphasis on training employees to effectively respond and recover from a disaster?

- A. Mitigation
- B. Preparedness
- C. Response

Answer: B

NEW QUESTION # 33

According to Article 20 of the NIS 2 Directive, what should members of management bodies of essential and important entities be trained on?

- A. Financial accounting principles
- B. Business development strategies
- C. Cybersecurity risk management practices

Answer: C

NEW QUESTION # 34

Scenario 7: CleanHydro is a forward-thinking company operating in the wastewater industry. Based in Stockholm, Sweden, the company is dedicated to revolutionizing wastewater treatment processes using advanced automated technology aiming to reduce environmental impact.

Recognizing the paramount importance of robust cybersecurity measures to protect its advanced technologies, CleanHydro is committed to ensuring compliance with the NIS 2 Directive. In line with this commitment, the company has initiated a comprehensive employee training program. To do so, the company adheres to Sweden's national cybersecurity strategy, which includes objectives, governance frameworks to guide strategy implementation and define roles and responsibilities at the national level, risk assessment mechanism, incident preparedness measures, a list of involved authorities and stakeholders, and coordination policies.

In addition, CleanHydro engaged GuardSecurity, an external cybersecurity consultancy firm, to evaluate and potentially improve the cybersecurity infrastructure of the company to ensure compliance with the NIS 2 Directive. GuardSecurity focused on strengthening the risk management process of the company.

The company started determining competence development needs by considering competence levels, comparing them with required competence levels, and then prioritizing actions to address competence gaps found based on risk-based thinking. Based on this determination, the company planned the competence development activities and defined the competence development program type and structure. To provide the training and awareness programs, the company contracted CyberSafe, a reputable training provider, to provide the necessary resources, such as relevant documentation or tools for effective training delivery. The company's top management convened a meeting to establish a comprehensive cybersecurity awareness training policy. It was decided that cybersecurity awareness training sessions would be conducted twice during the onboarding process for new employee to instill a culture of cybersecurity from the outset and following a cybersecurity incident.

In line with the NIS 2 compliance requirements, CleanHydro acknowledges the importance of engaging in communication with communities consisting of other essential and important entities. These communities are formed based on industry sectors, critical infrastructure sectors, or other relevant classifications. The company recognizes that this communication is vital for sharing and receiving crucial cybersecurity information that contributes to the overall security of wastewater management operations.

When developing its cybersecurity communication strategy and setting objectives, CleanHydro engaged with interested parties, including employees, suppliers, and service providers, to understand their concerns and gain insights. Additionally, the company identified potential stakeholders who has expressed interest in its activities, products, and services. These activities aimed to contribute to the achievement of the overall objectives of its cybersecurity communication strategy, ensuring that it effectively addressed the needs of all relevant parties.

According to scenario 7, how does CleanHydro align with the provisions of Article 29, Cybersecurity information-sharing arrangements, of the NIS 2 Directive?

- A. By involving employees, suppliers, and service providers in the process of developing cybersecurity communication strategy and objectives
- B. By engaging in communication with communities consisting of other essential and important entities regarding cybersecurity information
- C. By establishing a cybersecurity awareness training policy to build a cybersecurity culture

Answer: B
