Our service team will update the C\_S4CPB\_2508 certification file periodically and provide one-year free update. Have known these advantages you may be curious to further understand the detailed information about our C\_S4CPB\_2508 training braindump and we list the detailed characteristics and functions of our C\_S4CPB\_2508 exam questions on the web for you to know.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q23-Q28):

### NEW QUESTION # 23

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer? Note: There are 3 correct answers to this question.

- A. Trial system
- B. Test system
- C. Starter system
- D. Development system
- E. Sandbox system

Answer: B,C,D

### NEW QUESTION # 24

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Infrastructure as a Service
- B. Software as a Service
- C. On premise
- D. Platform as a Service
- E. Private Cloud

Answer: A,C,E

### NEW QUESTION # 25

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf? Note: There are 2 correct answers to this question.

- A. An execution variant has not been maintained.
- B. Data marked for deletion is picked for execution.
- C. The test process failed the execution pre-check.

- D. The process steps have been reordered.

**Answer: A,D**

#### NEW QUESTION # 26

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question

- A. Scoping
- B. Fiscal year variant
- C. Configuration activities
- D. Group currency

**Answer: B,D**

Explanation:

Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the configuration for areas not equipped with preconfiguration content. References = SAP Central Business Configuration - Overview, page 6; Configuring with SAP Central Business Configuration

#### NEW QUESTION # 27

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. The selected deployment target
- B. The selected scope
- C. Added partner content
- D. System consistency checks

**Answer: A,B**

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

#### NEW QUESTION # 28

.....
