## Exam HPE7-A11 Cram - HPE7-A11 Test Pdf

In order to meet the demand of most of the IT employees, ValidVCE's IT experts team use their experience and knowledge to study the past few years HP certification HPE7-A11 exam questions. Finally, ValidVCE's latest HP HPE7-A11 simulation test, exercise questions and answers have come out. Our HP HPE7-A11 simulation test questions have 95% similarity answers with real exam questions and answers, which can help you 100% pass the exam. If you do not pass the exam, ValidVCE will full refund to you.

You can also free online download the part of ValidVCE's HP Certification HPE7-A11 Exam practice questions and answers as a try. After your understanding of our reliability, I believe you will quickly add ValidVCE's products to your cart. ValidVCE will achieve your dream.

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q24-Q29):

### NEW QUESTION # 24

Drag and Drop Question

What documents should be included in the solution proposal? (Place the correct items into the list at the right. Order is not important. Not all options will be used)

POSSIBLE OPTIONS

- architect's notes from meetings
- as-built rack drawings
- assumptions documented in design
- bill of materials
- data sheets of equipment proposed
- proposed topology diagram
- quote

CORRECT OPTIONS

- architect's notes from meetings
- as-built rack drawings
- assumptions documented in design
- bill of materials
- data sheets of equipment proposed
- proposed topology diagram
- quote

Answer:

Explanation:

POSSIBLE OPTIONS

CORRECT OPTIONS

- architect's notes from meetings
- as-built rack drawings
- assumptions documented in design
- bill of materials
- data sheets of equipment proposed
- proposed topology diagram
- quote

### NEW QUESTION # 25

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
  - Dila Health Center is located in City A- Mount Health Center is located in City B
  - Rock Health Center is located in City C
  - Branch clinics are located at different locations across the United States
- Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.
  - Seamless integration across wired, wireless, WAN, SD-Branch, IoT
  - Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
  - All-access points must support the following features and specifications: 802.11 ax (Wi-Fi 6E Certified)
  - Security options including WPA2/WPA3, 802.1X with Radius secure authentication
  - Identify and authenticate every wireless and wired device
  - End-to-end role-based security
  - Seamless mobility across the hospital for medical teams, patients, and visitors
  - Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
  - Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
  - Fully redundant branch solution with dynamic path selection to the hospital
- XYZ Regional Hospital recently acquired a new outpatient building located 900 feet (275 meters) from the main hospital with a clear line of sight but no feasible fiber connection between the two buildings.

The design requirements are as follows:

- Extend existing wireless SSIDs to the outpatient building.
  - Cloud management for all wired and wireless devices across both buildings.
- Which combination of products should the Network Architect recommend?

- **A. AOS-10 AP mesh and AOS-CX switches with foundation subscriptions**
- B. HPE Aruba Networking cellular bridges and AOS-CX switches with foundation subscriptions
- C. AOS-10 AP mesh, HPE Aruba Networking AirWave, and AOS-CX switches
- D. Instant AOS-8 AP mesh and AOS-CX switches with advanced subscriptions

**Answer: A**

Explanation:

AOS-10 AP mesh is the appropriate choice because it can extend connectivity between buildings where there is line of sight and no feasible fiber path, and Aruba documents AOS 10 cloud services and mesh-related AP capabilities under Central-managed AOS-10 operations. Cloud-based management of both the APs and AOS-CX switches is also supported through Aruba Central, and Foundation subscriptions are the standard licensing tier for managing those devices in Central.

### NEW QUESTION # 26

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.

Their US-based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x 8360-16Y2C in VSF (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) Based on the scenario, which switch would be a good access layer switch to recommend?

- A. 1950S
- B. CX 6100
- C. CX 6400
- **D. CX 6300F**
- E. 0

**Answer: D**

Explanation:

For a modern ESP-based two-tier design, the access layer should use an Aruba CX switch that supports VSF stacking, 10 GbE uplinks, and full Layer 3/PoE features. Among the options, the CX 6300F best matches these requirements and is the appropriate access switch to recommend.

### NEW QUESTION # 27

Which platform can be used to demo your solution to a customer? (Select three.)

- A. Aruba Innovation Zone
- B. Aruba Demo Experience Platform
- C. Aruba Solution Exchange
- D. Aruba Support Portal
- E. your own lab
- F. Aruba CX Switch Simulator

**Answer: A,B,F**

Explanation:

To demonstrate a solution to a customer, three platforms that can be effectively used are the Aruba CX Switch Simulator (Option B), Aruba Innovation Zone (Option C), and Aruba Demo Experience Platform (Option F). The Aruba CX Switch Simulator provides a virtual environment where customers can interact with the Aruba OS-CX interface, allowing them to explore features and configurations without the need for physical hardware. The Aruba Innovation Zone offers a space for experiencing the latest Aruba technologies and solutions in action, showcasing their capabilities in real-world scenarios. The Aruba Demo Experience Platform is designed to give customers a comprehensive look at Aruba's solutions, enabling interactive demos and simulations that highlight the benefits and functionalities of the products. These platforms provide valuable resources for customers to understand and evaluate Aruba solutions in a controlled and informative environment.

### NEW QUESTION # 28

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2- based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client would like to include Blue Dot location tracking in their four floors of corporate space.

The APs are not ideally placed to allow for smooth map transitions.

What could you add to provide better tracking? (Choose two.)

- A. more APs
- B. tags
- C. beacons
- D. UXI sensors

**Answer: A,C**

Explanation:

For improving Blue Dot location tracking in corporate spaces where access points (APs) are not ideally placed for smooth map transitions, adding more APs and deploying beacons are effective strategies. More APs can enhance the density and coverage of the Wi-Fi network, providing more data points for more accurate location tracking. Beacons, specifically designed for precise indoor positioning, can supplement Wi-Fi-based location services by broadcasting signals that mobile devices can use to determine their location with greater accuracy. This combination ensures better tracking and smoother map transitions within the corporate space, enhancing the overall effectiveness of the Blue Dot location tracking solution.

### NEW QUESTION # 29

.....

A lot of students have used our product and prepared successfully for the test. Every user has rated study material positively and passed the HPE7-A11 Exam. ValidVCE gives a guarantee to the customers that if they fail to pass the HPE Network Campus Access Professional Architect Exam (HPE7-A11) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.
