With the ISC CC exam practice test questions, you can easily speed up your CC exam preparation and be ready to solve all the final ISC CC exam questions. As far as the top features of ISC CC Exam Practice test questions are concerned, these CC exam questions are real and verified by experience exam trainers.

## ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Access Control Concepts: This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Security Operations: This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Security Principles:</b> This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Network Security:</b> This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP</li> <li>• IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Business Continuity (BC), Disaster Recovery (DR) &amp; Incident Response Concepts:</b> This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.</li> </ul>

You will gain a clear idea of every ISC CC exam topic by practicing with Web-based and desktop ISC CC practice test software. You can take ISC CC Practice Exam many times to analyze and overcome your weaknesses before the final ISC CC exam.

## ISC Certified in Cybersecurity (CC) Sample Questions (Q314-Q319):

### NEW QUESTION # 314

What is the difference between BCP and DRP

- A. BCP is about restoring IT and communications back to full operations after a disruption, while DRP is about maintaining critical business functions
- B. DRP and BCP are the same
- C. DRP is about restoring IT and communications back to full operations after a disruption, while BCP is about maintaining critical business functions
- D. BCP is about maintaining critical business functions before a disaster occurs

**Answer: C**

### NEW QUESTION # 315

Removing the design belief that the network has any trusted space. Security is managed at each possible level, representing the most granular asset. Micro segmentation of workloads is a tool of the model

- A. AII
- B. Least Privileges
- C. Zero Trust
- D. Defence in Depth

**Answer: C**

#### NEW QUESTION # 316

A company security team detected a cyber attack against its information systems and activates a set of procedures to mitigate the attack. What type of plan is this?

- A. Disaster recovery plan
- B. Business continuity plan
- C. Incident response plan
- D. Security operation plan

**Answer: C**

#### NEW QUESTION # 317

Bruce is the branch manager of a bank. Bruce wants to determine which personnel at the branch can get access to systems, and under which conditions they can get access. Which access control methodology would allow Bruce to make this determination?

- A. Defense-in-depth
- B. Discretionary access control (DAC)
- C. Mandatory access control (MAC)
- D. Role-based access control (RBAC)

**Answer: B**

#### NEW QUESTION # 318

What is the main purpose of using multi-factor authentication (MFA) in a security system?

- A. To ensure data integrity
- B. To protect against malware
- C. To prevent data breaches
- D. To add an extra layer of security to user authentication

**Answer: D**

#### NEW QUESTION # 319

.....

Some candidates may purchase our CC software test simulator for their companies. They will ask us how many personal computers our soft version can be installed. In fact we have no limit for computer quantity. So if you purchase our CC software test simulator, it supports multi-users at the same time. It can be installed on computers without any limits. If you are a training school, it is suitable for your teachers to present and explain casually. Good CC software test simulator have high passing rate and Exams-boost are looking forward to your long-term cooperation.
