

# Designing Microsoft Azure Infrastructure Solutions Updated Study Material & AZ-305 Online Test Simulator & Designing Microsoft Azure Infrastructure Solutions Valid Exam Answers

What's more, part of that ActualTorrent AZ-305 dumps now are free: <https://drive.google.com/open?id=1H54tkkMIMZaLxt4pvG5II4EPrNhsYUs4>

Sometimes if you want to pass an important test, to try your best to exercise more questions is very necessary, which will be met by our AZ-305 exam software, and the professional answer analysis also can help you have a better understanding. the multiple versions of free demo of AZ-305 Exam Materials can be offered in our website. Try to find which version is most to your taste; we believe that our joint efforts can make you pass AZ-305 certification exam.

## Who is this Microsoft AZ-305 exam for?

This Microsoft AZ-305 exam is designed for IT professionals who are currently working on the Azure platform. These professionals can be system administrators, network administrators, developers, architects, and consultants. They can also be working as a project manager, solution architect, system integrator, and enterprise architect. **AZ-305 exam dumps** are suitable for everyone who is interested in gaining this Microsoft Azure Infrastructure Solutions Certification. You can use the braindumps to get prepared for the Microsoft AZ-305 Certification Exam. The customer support team can also use this exam to verify their technical skills. Network architecture professionals can also take this exam. Messaging-driven business applications can use this exam to test their technical knowledge.

## New Microsoft AZ-305 Test Sims - New AZ-305 Test Testking

If you are not satisfied with the function of PDF version which just only provide you the questions and answers, the APP version of AZ-305 exam cram materials can offer you more. APP version can not only simulate the real test scene but also point out your mistakes and notice you to practice many times. This version of Microsoft AZ-305 Exam Cram materials is rather powerful. If you

are willing, you can mark your performance every day and adjust your studying and preparation relatively. AZ-305 exam cram materials will try our best to satisfy your demand.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Hotspot Question

You have two Azure subscriptions named Prod and Dev. Prod contains resources for a production environment. Dev contains resources for a development environment.

You plan to deploy a Volume Shadow Copy Service (VSS)-aware app named App1. App1 will be hosted on virtual machines that run Windows Server 2022. The deployment of App1 to Dev will use multiple disks on each virtual machine. The deployment of App1 to Prod will use shared disks on the virtual machines.

You need to recommend a backup solution for App1. The solution must meet the following requirements:

- Ensure that the virtual machines in Dev support up to three on-demand backups per hour.
- Ensure that the virtual machines in Prod are backed up every four hours.
- Provide application-consistent backups.
- Minimize administrative effort.

What should you include in the recommendation for each environment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: Azure Backup for virtual machines

The deployment of App1 to Prod will use shared disks on the virtual machines.

Ensure that the virtual machines in Prod are backed up every four hours.

If you require application-consistent backup of virtual machine including the data disks, or an option to restore an entire virtual machine from backup, restore a file or folder, or restore to a secondary region, then use the Azure VM backup solution. Note: Azure Backup offers side-by-side support for backup of managed disks using Disk Backup in addition to Azure VM backup solutions.

This is useful when you need once-a-day application consistent backups of virtual machines and also more frequent backups of OS disks or a specific data disk that are crash consistent, and don't impact the production application performance.

Box 2: Managed snapshots

The deployment of App1 to Dev will use multiple disks on each virtual machine.

Ensure that the virtual machines in Dev support up to three on-demand backups per hour.

### NEW QUESTION # 19

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy various Azure App Service instances that will use Azure SQL databases. The App Service instances will be deployed at the same time as the Azure SQL databases.

The company has a regulatory requirement to deploy the App Service instances only to specific Azure regions. The resources for the App Service instances must reside in the same region.

You need to recommend a solution to meet the regulatory requirement.

Solution: You recommend using an Azure Policy initiative to enforce the location of resource groups.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

**NEW QUESTION # 20**

You have an on-premises network.

You have an Azure subscription.

You plan to centralize the collection and analytics of Azure and on-premises resources by using Log Analytics.

You are evaluating the cost implications of using the Basic log data plan versus the Analytics log data plan.

What will increase costs by using the Basic log data plan, and what will reduce costs by using the Basic log data plan? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

**NEW QUESTION # 21**

You are designing an application that will use Azure Linux virtual machines to analyze video files. The files will be uploaded from corporate offices that connect to Azure by using ExpressRoute.

You plan to provision an Azure Storage account to host the files.

You need to ensure that the storage account meets the following requirements:

\* Supports video files of up to 7 TB

\* Provides the highest availability possible

\* Ensures that storage is optimized for the large video files

\* Ensures that files from the on-premises network are uploaded by using ExpressRoute How should you configure the storage account? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 22**

You have the resources shown in the following table.

CDB1 hosts a container that stores continuously updated operational data.

You are designing a solution that will use ASI to analyze the operational data daily.

You need to recommend a solution to analyze the data without affecting the performance of the operational data store.

What should you include in the recommendation?

- A. Azure Cosmos DB change feed
- B. Azure Synapse Analytics with PolyBase data loading
- C. Azure Data Factory with Azure Cosmos DB and Azure Synapse Analytics connectors
- **D. Azure Synapse Link for Azure Cosmos DB**

**Answer: D**

**NEW QUESTION # 23**

.....

These Microsoft AZ-305 exam questions give you an idea about the final Microsoft AZ-305 exam questions formats, exam question structures, and best possible answers, and you will also enhance your exam time management skills. Finally, at the end of AZ-305 Exam Practice test you will be ready to pass the final AZ-305 exam easily. Best of luck in Designing Microsoft Azure Infrastructure Solutions (AZ-305) exam and professional career!!!
