Salesforce Certified Sharing and Visibility Architect Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which community function is impacted by having the Site User Visibility turned off in Sharing Settings?

- A. Searching for other external users.
- B. Updating their user profile.
- C. Searching for internal users.

Answer: A

Explanation:

* Site User Visibility Setting:

* When "Site User Visibility" is turned off, external users cannot search for or view other external users within the community.

* This setting helps maintain privacy and control user visibility.

* Why Option B is Correct:

* Disabling Site User Visibility directly impacts the ability to search for other external users.

* Why Others Are Incorrect:

* Option A: Updating their user profile is unrelated to this setting.

* Option C: Internal user visibility is not affected by this setting.

For further guidance, see Salesforce Community Sharing Settings documentation: <https://help.salesforce.com/>

NEW QUESTION # 11

Universal Containers (UC) has implemented Customer Community with customer community plus licenses for their distributors. Some distributors requested granting specific community users (agents) to view cases submitted by other agents of the same distributor.

Which feature only supports these requirements?

- A. Delegate external user
- B. Permission set to grant community admin permission
- C. Partner super user
- D. Partner community admin.

Answer: C

Explanation:

Explanation

Partner super user is the only feature that supports the requirement of granting specific community users (agents) to view cases submitted by other agents of the same distributor. Partner super users are community users who can access and edit data owned by other partner users in their account. They can also access reports and dashboards that display data from their account. Permission set to grant community admin permission, delegate external user, and partner community admin are not features that can achieve the same result.

NEW QUESTION # 12

The corporate identity and access team needs to audit User setup in the Salesforce org.

Which permission should be granted to this team so they can perform their audit?

- A. View All Data
- B. View permission on the User object
- C. View All Users

Answer: C

NEW QUESTION # 13

Universal Containers has junction object called "Job Production Facility", with 2 master-detail relationships to the Job and Production Facility custom objects. Both master records have a private sharing model.

What statement is true if a user's profile allows access (Create/Read) to the Job, but no access to the Production Facility Object?

- A. The user will not be able to see the junction object records or the field values.
- B. The user will be granted read access to the Production Facility record
- C. The user will see the junction object and the link to the Production Facility.
- D. The user will see the junction object but not the link to the Production Facility.

Answer: A

NEW QUESTION # 14

Universal Containers would like to control access to records and objects according to the following business requirements: * Sales users can view all Account records but only edit their own records.

* Sales managers view all Account records but only edit records of the team

* Service users can view all Account records that are not marked with a RecordType of Prospect.

Which organization-wide default configuration should a Salesforce architect recommend to fulfill these requirements?

- A. Public Read Only
- B. Public Read/Transfer
- C. Public Read Write
- D. Private

Answer: A

NEW QUESTION # 15

.....
