Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q28-Q33):

NEW QUESTION # 28
Which status indicates that content will be seen in Production?

- A. Inactive
- B. Draft
- C. Archived
- D. Published

Answer: D

Explanation:
In OGL, only content with the "Published" status is visible in the Production environment. Inactive (option A) content is disabled, Draft (option B) is in development, and Archived (option C) is stored but not active. Publishing content makes it available to end users in the live system, aligning with OGL's content lifecycle management.

NEW QUESTION # 29
Preparing end users to look for help in OGL and preparing support contacts to guide users with OGL are best practices during which activity?

- A. OGL kickoff
- B. Refine phase
- C. Hypercare

Answer: C

Explanation:
Hypercare, the post-launch support period, is when best practices like preparing end users to use OGL's help features and training support contacts to assist with OGL are implemented. This phase focuses on smoothing the transition to live use, ensuring users know where to find assistance and support staff are equipped to guide them. The Refine phase (option A) is for content optimization, not user preparation, and the OGL kickoff (option C) is for project initiation, not post-launch support. Hypercare's emphasis on immediate user enablement and support readiness makes it the ideal context for these activities, ensuring a seamless go-live experience.

NEW QUESTION # 30
What type of documentation supports the implementation of a cloud application?

- A. Communications Plan
- B. Training Needs Assessment
- C. Cloud Applications Implementation Plan
- D. Training Needs Analysis

Answer: C

Explanation:
A Cloud Applications Implementation Plan directly supports cloud application deployment, outlining steps and strategies. Other options focus on training or communication, not implementation specifics.

NEW QUESTION # 31
Which applications are eligible to receive the OGL Included offering?

- A. Third-party applications
- B. Any Oracle applications
- C. Oracle Fusion SaaS applications

Answer: C

Explanation:
The OGL Included offering is specifically available for Oracle Fusion SaaS applications (option B), as it's bundled with these cloud solutions to enhance user guidance. Not all Oracle applications (option A) qualify, and third-party applications (option C) require separate integration, not the Included offering. This eligibility ties OGL's native support to Fusion's SaaS model, ensuring seamless deployment within Oracle's core cloud ecosystem.

NEW QUESTION # 32
What inputs should be considered when defining your OGL project scope and timelines?

- A. Email reminders from OGL console
- B. Team member work schedules
- C. Fusion quarterly release schedule
- D. Availability of test user accounts

Answer: C

Explanation:
The Fusion quarterly release schedule (option A) is a critical input for defining OGL project scope and timelines, as it dictates content updates and testing windows. Email reminders (option B), test user availability (option C), and team schedules (option D) are secondary or logistical, not scope-defining. The release schedule ensures alignment with application changes, anchoring the project's temporal framework.
