The existence of our MuleSoft-Integration-Architect-I learning guide is regarded as in favor of your efficiency of passing the MuleSoft-Integration-Architect-I exam. At the same time, our company is becoming increasingly obvious degree of helping the exam candidates with passing rate up to 98 to 100 percent. All our behaviors are aiming squarely at improving your chance of success. We are trying to developing our quality of the MuleSoft-Integration-Architect-I Exam Questions all the time and perfecting every detail of our service on the MuleSoft-Integration-Architect-I training engine.

Salesforce MuleSoft-Integration-Architect-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Designing Integration Solutions to Meet Security Requirements: This topic emphasizes securing access to the Anypoint Platform and APIs, using Anypoint Security, counteracting security vulnerabilities, and understanding audit logging capabilities.
Topic 2	<ul style="list-style-type: none"> • Applying DevOps Practices and Operating Integration Solutions: Its sub-topics are related to designing CI • CD pipelines with MuleSoft plugins, automating interactions with Anypoint Platform, designing logging configurations, and identifying Anypoint Monitoring features.

Topic 3	<ul style="list-style-type: none"> • Designing Integration Solutions to Meet Performance Requirements: This topic covers meeting performance and capacity goals, using streaming features, and processing large message sequences.
Topic 4	<ul style="list-style-type: none"> • Designing and Developing Mule Applications: It includes selecting application properties, using fundamental features, designing with core routers, understanding the Salesforce Connector, and leveraging core connectors.
Topic 5	<ul style="list-style-type: none"> • Designing Automated Tests for Mule Applications: This topic covers unit test suites, and scenarios for integration and performance testing.

MuleSoft-Integration-Architect-I Latest Braindumps | MuleSoft-Integration-Architect-I New Soft Simulations

Comparing to the training institution, our website can ensure you pass the Salesforce actual test with less time and money. You just need to use spare time to practice the MuleSoft-Integration-Architect-I exam questions and remember key points of test answers. If you get a bad result in the MuleSoft-Integration-Architect-I Practice Test, we will full refund you to reduce the loss of your money.

Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q110-Q115):

NEW QUESTION # 110

An application deployed to a runtime fabric environment with two cluster replicas is designed to periodically trigger of flow for processing a high-volume set of records from the source system and synchronize with the SaaS system using the Batch job scope. After processing 1000 records in a periodic synchronization of 1 lakh records, the replicas in which batch job instance was started went down due to unexpected failure in the runtime fabric environment. What is the consequence of losing the replicas that run the Batch job instance?

- A. A new replacement replica will be available and will be process all 1,00,000 records from scratch leading to duplicate record processing
- B. The second replicas will take over processing the remaining 99000 records
- C. The remaining 99000 records will be lost and left and processed
- D. A new placement replica will be available and will take or processing the remaining 99,000 records

Answer: B

NEW QUESTION # 111

Additional nodes are being added to an existing customer-hosted Mule runtime cluster to improve performance. Mule applications deployed to this cluster are invoked by API clients through a load balancer. What is also required to carry out this change?

- A. New firewall rules must be configured to accommodate communication between API clients and the new nodes
- B. A new load balancer must be provisioned to allow traffic to the new nodes in a round-robin fashion
- C. External monitoring tools or log aggregators must be configured to recognize the new nodes
- D. API implementations using an object store must be adjusted to recognize the new nodes and persist to them

Answer: C

Explanation:

- * Clustering is a group of servers or mule runtime which acts as a single unit.
- * Mulesoft Enterprise Edition supports scalable clustering to provide high availability for the Mulesoft application.
- * In simple terms, virtual servers composed of multiple nodes and they communicate and share information through a distributed shared memory grid.
- * By default, Mulesoft ensures the High availability of applications if clustering implemented.

* Let's consider the scenario one of the nodes in cluster crashed or goes down and under maintenance. In such cases, Mulesoft will ensure that requests are processed by other nodes in the cluster. Mulesoft clustering also ensures that the request is load balanced between all the nodes in a cluster.

* Clustering is only supported by on-premise Mule runtime and it is not supported in Cloudhub.

Correct answer is External monitoring tools or log aggregators must be configured to recognize the new nodes

* Rest of the options are automatically taken care of when a new node is added in cluster.

NEW QUESTION # 112

According to MuleSoft, which system integration term describes the method, format, and protocol used for communication between two system?

- A. interaction
- B. Message
- C. Interface
- D. Component

Answer: C

NEW QUESTION # 113

An organization is successfully using API led connectivity, however, as the application network grows, all the manually performed tasks to publish share and discover, register, apply policies to, and deploy an API are becoming repetitive pictures driving the organization to automate this process using efficient CI/CD pipeline. Considering Anypoint platforms capabilities how should the organization approach automating is API lifecycle?

- A. Use Exchange rest api's for API management and MavenforAPI deployment
- B. Use runtime manager rest apis for API management and mavenforAPI deployment
- C. Use Maven with a custom configuration required for the API lifecycle
- D. Use Anypoint CLI or Anypoint Platform REST apis with scripting language such as groovy

Answer: A

NEW QUESTION # 114

What best describes the Fully Qualified Domain Names (FQDNs), also known as DNS entries, created when a Mule application is deployed to the CloudHub Shared Worker Cloud?

- A. A fixed number of FQDNs are created, IRRESPECTIVE of the environment and VPC design
- B. The FQDNs are determined by both the application name and the region
- C. The FQDNs are determined by the application name, but can be modified by an administrator after deployment
- D. The FQDNs are determined by the application name chosen, IRRESPECTIVE of the region

Answer: B

Explanation:

Every Mule application deployed to CloudHub receives a DNS entry pointing to the CloudHub. The DNS entry is a CNAME for the CloudHub Shared Load Balancer in the region to which the Mule application is deployed. When we deploy the application on CloudHub, we get a generic url to access the endpoints. Generic URL looks as below:

<application-name>.<region>.cloudhub.io <application-name> is the deployed application name which is unique across all the MuleSoft clients. <region> is the region name in which an application is deployed.

The public CloudHub (shared) load balancer already redirects these requests, where myApp is the name of the Mule application deployment to CloudHub: HTTP requests to http://myApp.<region>.cloudhub.io redirects to

http://mule-worker-myApp.<region>.cloudhub.io:8081

HTTPS traffic to https://myApp.<region>.cloudhub.io redirects to

https://mule-worker-myApp.<region>.cloudhub.io:8082

NEW QUESTION # 115

.....

For some difficult points of the MuleSoft-Integration-Architect-I exam questions which you may feel hard to understand or easy to confuse for too similar with the others. In order to help you memorize the MuleSoft-Integration-Architect-I guide materials better, we have detailed explanations of the difficult questions such as illustration, charts and referring website. Every year some knowledge of the MuleSoft-Integration-Architect-I Practice Braindumps is reoccurring over and over. You must ensure that you master them completely.
