COH-285퍼펙트 공부 & COH-285자격증공부

Pass4Test에서 출시한 Cohesity인증 COH-285덤프는Cohesity인증 COH-285시험에 대비하여 IT전문가들이 제작한 최신버전 공부자료로서 시험패스율이 100%입니다.Pass4Test는 고품질 Cohesity인증 COH-285덤프를 가장 친근한 가격으로 미래의 IT전문가들께 제공해드립니다. Pass4Test의 소원대로 멋진 IT전문가도 거듭나세요.

Cohesity COH-285 시험요강:

주제	소개
주제 1	• Troubleshoot NetBackup: This section of the exam measures skills of NetBackup administrators and focuses on resolving issues that occur during backup and recovery operations. It covers the interpretation of status codes and job details to diagnose failed jobs. The section also explains how to troubleshoot devices and media and how to validate connectivity between primary servers, media servers, and client systems. Candidates learn to address common problems in disaster recovery situations, including tasks related to recovering the NetBackup catalog.
주제 2	• Tune NetBackup: This section of the exam measures skills of system engineers and focuses on analyzing performance related factors in a NetBackup environment. It introduces performance assessment and optimization practices to help candidates identify bottlenecks and improve overall efficiency. Tuning NetBackup includes making adjustments that lead to more stable and faster backup and recovery operations.

주제 3	• Configure NetBackup: This section of the exam measures the skills of system administrators and focuses on the configuration tasks required to set up and manage a NetBackup environment. It covers the setup of primary, media, and client settings along with essential host properties, including the use of security certificates. The section explains how to configure disk storage, cloud storage, and storage unit groups to support stable backup operations. It also includes the configuration of standard and advanced backup policies and protection plans. Candidates are expected to understand specialized backup solutions such as synthetic backups, True Image Restore, multiple data streams, checkpoint restart, and different duplication methods that involve storage lifecycle policies, disk staging, and replication features.
주제 4	• Monitor and Maintain NetBackup: This section of the exam measures skills of operations personnel and focuses on the monitoring and maintenance tasks necessary to keep a NetBackup environment healthy. The topics include the core concepts of image management and the use of the NetBackup Administration Console to verify images, expire them, import backup data, and perform manual duplication. The section explains how to manage both disk and cloud storage within NetBackup and highlights the use of reports for verification and monitoring. It also covers administrative controls for running, cancelling, suspending, resuming, and prioritizing backup or duplication jobs. Candidates learn how to initiate and monitor restore operations and understand the security management features such as role based access control and host ID certificates.

최신 Cohesity Protection Professional COH-285 무료 샘플문제 (Q161-Q166):

질문 # 161

How can you prioritize, cancel, suspend, resume, restart, retry, or manually run backup and duplication jobs?

- A. Use the NetBackup command line to prioritize, cancel, suspend, resume, restart, retry, or manually run backup and duplication jobs.
- B. Use the NetBackup administration console to prioritize, cancel, suspend, resume, restart, retry, or manually run backup and duplication jobs.
- C. Use both the NetBackup administration console and the NetBackup command line to prioritize, cancel, suspend, resume, restart, retry, or manually run backup and duplication jobs.

정답: C

질문 # 162

NetBackup has frozen some of the tapes added to the robot.

Which log must be enabled to determine why the tapes were frozen?

- A. bptm
- B. ltid
- C. robots
- D. vmd

정답: A

질문 # 163

Refer to the Exhibit.

An administrator is trying to access client properties on the NetBackup Administration Console and receives the following message:

When checking the services on the master server, the administrator sees that the PBX service is down.

Which two commands can the administrator use to increase the PBX log level to determine the reason for the message above? (Choose two.)

- A. vxpbx_exchanged
- B. vxlogcfg
- C. pbx_exchange
- D. pbxcfg
- E. vxlogmgr

정답: B,E

질문 # 164

A backup job is showing the following error message:

Dec 5, 2018 4:11:02 PM - Info nbjm (pid=40455) starting backup job (jobid=369) for client WINTN3QANTSQ1B.vrtslab.br, policy Oracle_SO_Dedup, schedule FULL Dec 5, 2018 4:11:02 PM - Info nbjm (pid=40455) requesting STANDARD_RESOURCE resources from RB for backup job (jobid=369, request id: {201EBB46-F8B9-11E8-B5BA-A118CF05FA8E}) Dec 5, 2018 4:11:02 PM - requesting resource __ANY__ Dec 5, 2018 4:11:02 PM - requesting resource nbumasterapp.vrtslab.br.NBU_CLIENT.MAXJOBS.WINTN3QANTSQ1B.vrtslab.br Dec 5, 2018 4:11:02 PM - Error nbjm (pid=40455) NBU status: 2111, EMM status: All storage units are configured with On Demand Only and are not eligible for jobs requesting ANY storage unit All storage units are configured with On Demand Only and are not eligible for jobs requesting ANY storage unit (2111) Which two actions can an administrator perform to ensure the backup completes successfully? (Select two.)

- A. increase the Multiplexing value on the storage unit
- B. increase the "Limit I/O streams" parameter on the disk volume
- C. ensure at least one storage unit is without the On Demand Only option selected
- D. assign a specific Storage Unit for that policy
- E. increase the "Maximum concurrent jobs" parameter on the storage unit

정답: C,D

질문 # 165

A NetBackup environment with a single tape storage unit is experiencing performance issues when running full backups of a Windows file server with over a million small files. Backups for all other clients on the same network are performing adequately. What should the administrator modify to improve performance for the client?

- A. enable Windows Change Journal
- B. modify data buffer settings for the data path
- C. use Flashbackup-Windows policy type
- D. enable the Use Accelerator policy attribute

정답: A
