

Get Free Updates For 1 year For Oracle 1Z0-1075-26 Exam Questions

If you do not receive our 1Z0-1075-26 exam questions after purchase, please contact our staff and we will deal with your problem immediately. The download process of 1Z0-1075-26 practice engine does not take you a long time. We have some of the best engineers in the industry, and the system they build will guarantee you a smooth download of our 1Z0-1075-26 Guide questions. After that, please arrange your own study time. Together with our 1Z0-1075-26 practice engine, start your own learning journey.

Oracle 1Z0-1075-26 Exam Syllabus Topics:

Section	Weight	Objectives
Implementing Manufacturing Setups	25%	- Configuring Oracle Manufacturing • 1. Setting up Work Definitions • 2. Configuring Manufacturing Plant - Key features and capabilities of Oracle Manufacturing • 1. Project-Specific Manufacturing process • 2. Fundamentals of Manufacturing
Using AI/ML/Mobile and Other Automation Features	5%	- Business value and capabilities of AI/ML/Mobile and automation features
Implementing Applications that Enable Manufacturing	20%	- Key features and capabilities of Supply Chain Applications for Manufacturing • 1. Role of Supply Chain Applications in Manufacturing - Configuring Supply Chain Applications for Manufacturing • 1. Configuring Quality Management • 2. Setting up Maintenance • 3. Setting up Talent Management

Implementing Common Supply Chain Capabilities	20%	- Configuring Oracle Supply Chain Management • 1. Managing Data Access and Security • 2. Configuring common objects • 3. Managing Item Structure - Key features and capabilities of Oracle Supply Chain Management • 1. Basics of Inventory Management • 2. Purpose of Item Structure • 3. Role of Functional Setup Manager
Enabling Redwood Capabilities	5%	- Enabling Redwood capabilities and configuration implications
Executing Production with Manufacturing	25%	- Key features and capabilities of Work Orders • 1. Fundamentals of Work Orders - Executing Work Orders • 1. Executing Work Orders • 2. Managing Material Availability • 3. Executing Production

1Z0-1075-26 Reliable Test Sims | 1Z0-1075-26 Trustworthy Dumps

It would be really helpful to purchase Oracle Manufacturing Cloud 2026 Implementation Professional exam dumps right away. If you buy this Oracle Certification Exams product right now, we'll provide you with up to 1 year of free updates for 1Z0-1075-26 authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the 1Z0-1075-26 Exam Dumps. The 1Z0-1075-26 actual questions we sell also come with a free demo.

Oracle Manufacturing Cloud 2026 Implementation Professional Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which statement is NOT true about user-defined work order statuses?

- A. The system automatically updates user-defined work order statuses.
- B. They are displayed on work order reports.
- C. All the new statuses are searchable so you can filter your job and manage the work order life cycle more easily.
- D. It is not recommended to update the name of the system status.

Answer: A

Explanation:

User-defined work order statuses provide flexibility in managing the lifecycle of work orders in Oracle Manufacturing Cloud.

However, the following is not true:

The system does not automatically update user-defined work order statuses. These statuses are manually updated by users to reflect the work order's progress through custom-defined states.

Correct statements:

Displayed on work order reports: User-defined statuses are visible in work order reports, allowing users to track the status of different orders.

Name changes to system status: It is not recommended to alter system-defined status names as it could disrupt core system processes and workflows.

Searchability of new statuses: User-defined statuses are searchable, making it easier to manage and track work orders.

NEW QUESTION # 40

Production operations need operators to execute the right steps to produce quality products, so want to use "View Document Items on a Dispatch List." Which statement is NOT true?

- A. You will always see the active revision of the attachment from currently effective revision of the document from Master Organization.
- B. You can view the document item attachment in the dispatch list and on the Manage Supplier Operations page by using the attachment icon.
- C. You can add attachments to the document item and invoke the engineering change order to release the latest revision of the document item and attachment.
- D. You cannot view the document item attachment on the Manage Supplier Operations page.

Answer: A

Explanation:

When using the "View Document Items on a Dispatch List" functionality, production operators can view and access necessary document attachments to ensure correct steps in the manufacturing process. The statement that is not true is:

Statement B is incorrect because you do not always see the active revision of the attachment from the currently effective revision in the Master Organization. The revision displayed in the dispatch list may depend on the specific version that was assigned to the work order or operation at the time of creation, not necessarily the most current revision in the Master Organization.

Correct statements:

Statement A: Document attachments cannot be viewed on the Manage Supplier Operations page.

Statement C: Attachments can be added to document items, and updates can be managed through engineering change orders.

Statement D: Document item attachments are viewable both in the dispatch list and on the Manage Supplier Operations page via the attachment icon.

NEW QUESTION # 41

An employee is responsible for dealing with different manufacturing practices and processes, machines, tools, and equipment that turn raw material into a product.

Which seeded job role must you assign to this employee?

- A. Manufacturing Supervisor
- B. Manufacturing Engineer
- C. Production Supervisor
- D. Production Operator
- E. Production Engineer

Answer: B

Explanation:

In Oracle Manufacturing Cloud, the Manufacturing Engineer role is responsible for dealing with various manufacturing practices, processes, machines, tools, and equipment that transform raw materials into finished products. This role focuses on defining and managing production processes, resources, and operations in manufacturing plants.

Manufacturing Engineer: This role involves creating and maintaining manufacturing processes, production resources, and work instructions. It ensures that products are manufactured efficiently and in compliance with quality standards.

NEW QUESTION # 42

A Production Operator needs to review the materials issued, resources charged, and operations performed for a job that was executed in the previous shift.

Which task should the operator select to review all the transactions in a single place for both work order and orderless execution?

- A. Manage Work Orders
- B. Review Dispatch List
- C. Review Production Transaction History
- D. Report Resource, Material, and Operation Transactions

Answer: C

Explanation:

To review all the transactions associated with a job, including materials issued, resources charged, and operations performed, the

Production Operator should select Review Production Transaction History. This task provides a comprehensive overview of all transaction types, whether for work order or orderless execution, in a single place.

Review Production Transaction History offers a detailed record of all activities performed during a work order or orderless transaction, making it easy for operators to audit and review the work executed in previous shifts.

Incorrect options:

Report Resource, Material, and Operation Transactions (A) is used for recording transactions, not for reviewing historical data. Manage Work Orders (B) and Review Dispatch List (D) provide more general management and operational details, but not the comprehensive transactional history.

NEW QUESTION # 43

Which three requirements are fulfilled by nonstandard work orders?

- A. Rescheduling
- B. Rework
- C. Repair
- D. Prototype

Answer: B,C,D

Explanation:

Nonstandard work orders in Oracle Manufacturing Cloud are used for specialized tasks that do not follow typical production processes. The following are the main requirements fulfilled by nonstandard work orders:

Repair: Nonstandard work orders can be used for maintenance and repair tasks to fix or refurbish defective or damaged items.

Rework: These work orders are also used for rework processes, where a product needs to be reprocessed to meet quality standards or specifications.

Prototype: Nonstandard work orders can handle prototype production, where items are produced in small quantities for testing and development before mass production.

Rescheduling (A) is typically handled by standard work orders in the production schedule rather than through nonstandard work orders.

NEW QUESTION # 44

.....

Dear customers, you may think it is out of your league before such as winning the 1Z0-1075-26 exam practice is possible within a week or a 1Z0-1075-26 practice material could have passing rate over 98 percent. This time it will not be illusions for you anymore. You can learn some authentic knowledge with our high accuracy and efficiency 1Z0-1075-26 simulating questions and help you get authentic knowledge of the exam.
