This is because with CheckPoint 156-315.81 Certification, you will be able to communicate effectively with other professionals who are working on the same field of IT security as you are. They will understand what you are saying better than non-certified professionals who do not know how to communicate with other people in the same field of expertise as theirs. **CheckPoint 156-315.81 exam dumps** is a perfect place to start your preparation. The questions and answers are written by the expert team so that you can easily understand and memorize the concepts of the exam. The questions are designed to cover all the areas of the exam and you will not face any problem in passing the exam.

## CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q207-Q212):

### NEW QUESTION # 207

Which statement is WRONG regarding the usage of the Central Deployment in SmartConsole?

- A. You can install Jumbo Hotfix accumulators with the Central Deployment in SmartConsole.
- **B. Only be installed Hotfixes can with the Central Deployment in SmartConsole**
- C. You can upgrade your cluster without user intervention with the Central Deployment in SmartConsole from R80.40 to R81.20.
- D. You can install Hotfixes with the Central Deployment in SmartConsole

**Answer: B**

Explanation:

The statement that is wrong regarding the usage of the Central Deployment in SmartConsole is that only be installed Hotfixes can with the Central Deployment in SmartConsole. This is wrong because Central Deployment can also be used to install Jumbo Hotfix accumulators, upgrade clusters, and perform other operations on multiple gateways simultaneously. Central Deployment simplifies and automates the deployment process and reduces human errors and downtime. Reference: [Check Point Security Expert R81 Administration Guide], page 23.

### NEW QUESTION # 208

The system administrator of a company is trying to find out why acceleration is not working for the traffic. The traffic is allowed according to the rule base and checked for viruses. But it is not accelerated.

What is the most likely reason that the traffic is not accelerated?

- **A. The connection required a Security server.**
- B. There is a virus found. Traffic is still allowed but not accelerated.
- C. Acceleration is not enabled.
- D. The traffic is originating from the gateway itself.

**Answer: A**

Explanation:

According to the Check Point R81 release notes, acceleration is not supported for connections that require a Security server, such as HTTPS Inspection, Content Awareness, or Anti-Virus. The Security server performs deep inspection and modification of the traffic, which prevents acceleration. The other options are either false or not the most likely reason. Reference: Check Point R81

### NEW QUESTION # 209

Which statement is NOT TRUE about Delta synchronization?

- A. Transfers changes in the Kernel tables between cluster members.
- B. Quicker than Full sync
- C. Using UDP Multicast or Broadcast on port 8116
- **D. Using UDP Multicast or Broadcast on port 8161**

**Answer: D**

### NEW QUESTION # 210

Which command shows only the table names of all kernel tables?

- A. fwtab-t
- B. fw tab -n
- **C. fw tab -s**
- D. fw tab -k

**Answer: C**
