Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q202-Q207):

NEW QUESTION # 202

Scenario: A Citrix ADC is configured with Interface 1/1 and bound to VLAN 40. A Citrix Administrator has executed the following command: bind vlan 20 -ifnum 1/1 What is the result of executing the command on the Citrix ADC?

- A. Interface 1/1 is bound to VLAN 20, and native VLAN is 20.
- B. Interface 1/1 is bound to VLAN 20, and native VLAN is NOT changed.
- C. Interface 1/1 is bound to VLAN 20, and native VLAN is 40.
- D. Interface 1/1 is bound to VLAN 20, and native VLAN is 1.

Answer: C

NEW QUESTION # 203

Scenario: A Citrix Administrator is in the process of migrating the existing 7.15 LTSR Virtual Delivery Agent (VDA) machines used on premises to Citrix Cloud. The administrator has created a new manual machine catalog and Delivery Group in Citrix Cloud and pointed to the existing Device Collection in Citrix Provisioning. The administrator also restarted the VDA machines. What could prevent the VDA machines from registering in Citrix Cloud?

- A. The VDA on the master image has NOT been updated to a later version.
- B. The Citrix policies have NOT been migrated to Citrix Cloud.
- C. One of the two Cloud Connectors is down and unresponsive.
- D. The VDA master image was NOT updated to communicate with the Cloud Connectors.

Answer: D

Explanation:

When migrating existing VDAs to Citrix Cloud, the administrator must update the VDA software on the master image to communicate with the Cloud Connectors. This ensures that the VDAs can register with the Delivery Controllers in Citrix Cloud. If the VDA software is not updated, the VDAs will not be able to register with Citrix Cloud.

NEW QUESTION # 204

When users log on to Citrix Receiver, they are NOT able to see their line-of-business application by default and are frequently calling the help desk to locate the application.

Which phrase can a Citrix Administrator add to the application properties, so that line-of-business application is added to Favorites and users cannot remove the application from Favorites?

- A. "KEYWORDS: Auto"
- B. "KEYWORDS: Featured"
- C. "KEYWORDS: Prefer"
- D. "KEYWORDS: Mandatory"

Answer: D

NEW QUESTION # 205

A Citrix Administrator has created a new Delivery Controller and needs to join it to an existing Site to increase site redundancy. Which SQL permissions will the administrator need?

- A. securityadmin and db_owner
- B. dbcreator and db_accessadmin
- C. db_owner and db_datawriter
- D. securityadmin and dbm_monitor

Answer: A

Explanation:

The new Delivery Controller must have the securityadmin fixed server role on the SQL Server instance (to create and manage database logins) and the db_owner fixed database role on the existing Site databases (to join and configure the site schema).

Scenario: A Lead Citrix Administrator for a large company hired a new administrator for the team to help manage a Citrix Virtual Desktops infrastructure. The new administrator will need to manage user sessions and power-manage machines within the Delivery Group but should NOT be able to create any new objects.
Which role should the lead administrator create for the new administrator?

- A. Host Administrator
- B. Delivery Group Administrator
- C. Machine Catalog Administrator
- **D. Help Desk Administrator**
