Fresh AZ-800 Dumps | Reliable AZ-800 Exam Cost

Our Administering Windows Server Hybrid Core Infrastructure study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit AZ-800 exam questions. It points to the exam heart to solve your difficulty. So high quality materials can help you to pass your exam effectively, make you feel easy, to achieve your goal. With the AZ-800 Test Guide use feedback, it has 98%-100% pass rate. That's the truth from our customers. And it is easy to use for you only with 20 hours' to 30 hours' practice. After using the AZ-800 test guide, you will have the almost 100% assurance to take part in an examination. With high quality materials and practices, you will get easier to pass the exam.

The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our AZ-800 exam torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our AZ-800 study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.

Reliable AZ-800 Exam Cost & Latest AZ-800 Braindumps

Computers are getting faster and faster, which provides us great conveniences and all possibilities in our life and work. IT jobs are attractive. Microsoft AZ-800 exam guide materials help a lot of beginners or workers go through exam and get a useful certification, so that they can have a beginning for desiring positions. TestKingIT AZ-800 Exam Guide Materials are famous for its high passing rate and leading thousands of candidates to a successful exam process every year.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q200-Q205):

NEW QUESTION # 200

You have an on-premises server named Server1 that runs Windows Server and has internet connectivity.

You have an Azure subscription.

You need to monitor Server1 by using Azure Monitor.

Which resources should you create in the subscription, and what should you install on Server1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In the subscription, create:

An Azure Files storage account
A Log Analytics workspace
An Azure SQL database and a data collection rule
An Azure Blob Storage account and a data collection rule

On Server1, install:

The Azure Monitor agent
The Analytics gateway
The Device Health Attestation server role

Answer:

Explanation:

In the subscription, create:

An Azure Files storage account
A Log Analytics workspace
An Azure SQL database and a data collection rule
An Azure Blob Storage account and a data collection rule

On Server1, install:

The Azure Monitor agent
The Analytics gateway
The Device Health Attestation server role

NEW QUESTION # 201

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains the VPN servers shown in the following table.

Name	IP address
VPN1	172.16.0.254
VPN2	131.10.15.254
VPN3	10.10.0.254

You have a server named NPS1 that has Network Policy Server (NPS) installed. NPS1 has the following RADIUS clients:

```
Name              : NPSclient1
Address           : 172.16.0.254
AuthAttributeRequired : False
SharedSecret      : Pa55w.rd
VendorName        : RADIUS Standard
Enabled           : False

Name              : NPSclient2
Address           : 131.10.15.254
AuthAttributeRequired : False
SharedSecret      : Pa55w.rd
VendorName        : RADIUS Standard
Enabled           : True

Name              : NPSclient3
Address           : 172.16.1.254
AuthAttributeRequired : False
SharedSecret      : Pa55w.rd
VendorName        : RADIUS Standard
```

VPN1, VPN2, and VPN3 use NPS1 for RADIUS authentication. All the users in contoso.com are allowed to establish VPN connections. For each of the following statements, select Yes If the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 202

You deploy a single-domain Active Directory Domain Services (AD DS) forest named contoso.com.

You deploy five servers to the domain. You add the servers to a group named iTFarmHosts.

You plan to configure a Network Load Balancing (NIB) cluster named NLBCluster.contoso.com that will contain the five servers.

You need to ensure that the NLB service on the nodes of the cluster can use a group managed service account (gMSA) to authenticate.

Which three PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdiets from the list of cmdlets to the answer area and arrange them in the correct order.

Answer:

Explanation:

Answer Area

Add-KdsRootKey
New-ADServiceAccout
Install-ADServiceAccount

1 - Add-KdsRootKey
2 - New-ADServiceAccout
3 - Install-ADServiceAccount
Reference:
https://docs.microsoft.com/en-us/windows-server/security/group-managed-service-accounts/create-the-key-distribution-services-kds-root-key
https://docs.microsoft.com/en-us/windows-server/security/group-managed-service-accounts/getting-started-with-group-managed-service-accounts

NEW QUESTION # 203
You need to meet the technical requirements for VM3
On which volumes can you enable Data Deduplication?

- A. D, E, and F only
- B. C and D only
- C. C, D, E, and F
- D. D and E only
- E. D only

Answer: D

Explanation:
Reference:
https://docs.microsoft.com/en-us/windows-server/storage/data-deduplication/interop
Topic 1, Contoso Ltd
AD DS Environment
The network contains an on-premises Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains two domains named contoso.com and canada.contoso.com. The forest contains the domain controllers shown in the following table.

Name	Domain	Active Directory site
DC1	contoso.com	Seattle
DC2	contoso.com	Los Angeles
DC3	canada.contoso.com	Montreal
DC4	contoso.com	Montreal
DC5	canada.contoso.com	Seattle

All the domain controllers are global catalog servers.
Server Infrastructure
The network contains the servers shown in the following table.

Name	Organizational unit (OU)	Server role	Domain	Active Directory site
Server1	Member Servers	None	canada.contoso.com	Montreal
Server2	Member Servers	Hyper-V	canada.contoso.com	Montreal
Server3	Member Servers	None	canada.contoso.com	Montreal

A server named Server4 runs Windows Server and is in a workgroup. Windows Firewall on Servei4 uses the private profile.

Server2 hosts three virtual machines named VM1. VM2, and VM3.
VM3 is a file server that stores data in the volumes shown in the following table.

Name	File system
C	NTFS
D	NTFS
E	ReFS
F	ExFAT

Group Policies

The contoso.com domain has the Group Policies Objects (GPOs) shown in the following table.

Name	Minimum password length	Linked to
GPO1	14	OU1
GPO2	8	Member Servers
Default Domain Policy	10	contoso.com

Existing Identities

The forest contains the users shown in the following table.

Name	In OU	Member of
Contoso\Admin1	Contoso\OU1	Contoso\Enterprise Admins
Contoso\Admin2	Contoso\OU1	Contoso\Domain Admins
Canada\Admin3	Canada\OU2	Canada\Domain Admins
Contoso\User1	Contoso\OU3	Contoso\Domain Users

The forest contains the groups shown in the following table.

Name	Domain	Type
Group1	contoso.com	Universal security group
Group2	contoso.com	Global security group
Group3	contoso.com	Domain local security group
Group4	canada.contoso.com	Global distribution group
Group5	canada.contoso.com	Global distribution group
Group6	canada.contoso.com	Domain local distribution group

Current Problems

When an administrator signs in to the console of VM2 by using Virtual Machine Connection, and then disconnects from the session without signing out another administrator can connect to the console session as the currently signed-in user.

Requirements

Contoso identifies the following technical requirements:
* Change the replication schedule for all site links to 30 minutes.
* Promote Server1 to a domain controller in canada.contoso.com.
* Install and authorize Server3 as a DHCP server.
* Ensure that User! can manage the membership of all the groups in Contoso\OU3.
* Ensure that you can manage Server4 from Server1 by using PowerShell removing.
* Ensure that you can run virtual machines on VM1.
* Force users to provide credentials when they connect to VM2.
* On VM3, ensure that Data Deduplication on all volumes is possible.

NEW QUESTION # 204
Task 10
You need to configure Hyper-V to ensure that running virtual machines can be moved between SRV1 and SRV2 without downtime.
You do NOT need to move any virtual machines at this time.

Answer:

Explanation:
See the solution o fthis Task below
Explanation:
One possible solution to configure Hyper-V to ensure that running virtual machines can be moved between SRV1 and SRV2 without downtime is to use Live Migration. Live Migration is a feature of Hyper-V that allows you to move a running virtual machine from one host to another without any noticeable interruption of service. To set up Live Migration between SRV1 and SRV2, you need to perform the following steps:
On both SRV1 and SRV2, open Hyper-V Manager from the Administrative Tools menu or by typing virtmgmt.msc in the Run box.
In the left pane, right-click on the name of the server and select Hyper-V Settings.
In the Hyper-V Settings dialog box, select Live Migrations in the navigation pane.
Check the box Enable incoming and outgoing live migrations.

Under Authentication protocol, select the method that you want to use to authenticate the live migration traffic between the servers. You can choose either Kerberos or CredSSP. Kerberos does not require you to sign in to the source server before starting a live migration, but it requires you to configure constrained delegation on the domain controller. CredSSP does not require you to configure constrained delegation, but it requires you to sign in to the source server through a local console session, a Remote Desktop session, or a remote Windows PowerShell session. For more information on how to configure constrained delegation, see Configure constrained delegation.

Under Performance options, select the option that best suits your network configuration and performance requirements. You can choose either TCP/IP or Compression or SMB. TCP/IP uses a single TCP connection for the live migration traffic. Compression uses multiple TCP connections and compresses the live migration traffic to reduce the migration time and network bandwidth usage. SMB uses the Server Message Block (SMB) 3.0 protocol and can leverage SMB features such as SMB Multichannel and SMB Direct. For more information on how to choose the best performance option, see Choose a live migration performance option.

Under Advanced Features, you can optionally enable the Use any available network for live migration option, which allows Hyper-V to use any available network adapter on the source and destination servers for live migration. If you do not enable this option, you need to specify one or more network adapters to be used for live migration by clicking on the Add button and selecting the network adapter from the list. You can also change the order of preference by using the Move Up and Move Down buttons.

Click OK to apply the settings.

Now, you have configured Hyper-V to enable live migration between SRV1 and SRV2. You can use Hyper-V Manager or Windows PowerShell to initiate a live migration of a running virtual machine from one server to another.

NEW QUESTION # 205

......

When prepare a exam, we may face the situation like this: there are so many books in front of me, which one should I choose for preparing for the exam? If you are ready to attentd the AZ-800 exam, then just choose us, our product is the one you can trust, with the experienced professionals to expect and update, the quality of the product is quite high. Furthermore, our company respect the privacy of the customers, with our product, there is no need for you to worry about the probleml. Except for this, if you buy product for the AZ-800 Exam, you will get the free update for one year, and money back gurantee within 60 days after you buy it, so don't hesitate, just do it.
