

# VMware 2V0-17.25 Exam | Free 2V0-17.25 Study Material - Spend your Little Time and Energy to Prepare for 2V0-17.25

The image shows the QA4EXAM logo at the top left. Below it is a photograph of three people working together at a desk with multiple monitors. To the right of the photo is the text "ALL Questions & Answers" in bold. Below this are five bullet points: "All Actual Questions", "Free Demo Questions", "Practice Test & PDF", "3 Months Free Updates", and "One Click Download". At the bottom right is a blue button with the text "www.qa4exam.com VISIT NOW" and a globe icon.

Close to 100% passing rate is the best gift that our customers give us. We also hope our 2V0-17.25 exam materials can help more ambitious people pass 2V0-17.25 exam. Our professional team checks the update of every exam materials every day, so please rest assured that the 2V0-17.25 Exam software you are using must contain the latest and most information.

## VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li></ul>

## Reliable 2V0-17.25 Exam Prep - Valid 2V0-17.25 Test Voucher

Do you upset about the difficulty of VMware practice questions? Do you disappointed at losing exam after long-time preparation? We can help you from these troubles with our Latest 2V0-17.25 Learning Materials and test answers. You will find valid 2V0-17.25 real questions and detailed explanations in Fast2test, which ensure you clear exam easily.

## VMware Cloud Foundation 9.0 Administrator Sample Questions (Q64-Q69):

### NEW QUESTION # 64

An administrator has been tasked with deploying a VCF-Aware VMware Aria Suite Lifecycle within a newly provisioned VMware Cloud Foundation environment.

Which four details will the Cloud Administrator require to complete the deployment via SDDC Manager? (Choose four.)

- A. The FQDN of the Aria Suite Lifecycle appliance
- B. The password for the root account
- C. The password for the admin@local account
- D. The FQDN of the Aria Suite Lifecycle cluster
- E. A free IP address on the VMware NSX Tier 0
- F. The password for the vcfadmin@local account
- G. A free IP Address within the cross-region virtual network segment

**Answer: A,B,D,F**

Explanation:

The fully qualified domain name (FQDN) of the Aria Suite Lifecycle appliance and cluster are necessary for proper configuration and integration within the VMware Cloud Foundation environment. The password for the root account is required to authenticate and provide administrative access to the environment.

The password for the vcfadmin@local account is needed to perform administrative tasks related to VMware Cloud Foundation (VCF).

### NEW QUESTION # 65

Resource Pools in vSphere primarily help in:

- A. Organizing and dividing compute resources among groups of VMs
- B. Creating VLANs dynamically for each virtual machine
- C. Securing the VM traffic by isolating virtual networks
- D. Enabling real-time replication of data across multiple hosts

**Answer: A**

Explanation:

Resource Pools allow administrators to group virtual machines and apply specific CPU and memory resource constraints, helping ensure certain performance levels or service quality for different workloads.

### NEW QUESTION # 66

An administrator must ensure the network team can fully utilize the Network Operations feature in VCF. What component must be installed and configured?

- A. VCF Operations for Networks
- B. vDefend Firewall
- C. VCF Operations Collector
- D. NSX Networking

**Answer: A**

Explanation:

VCF Operations for Networks (formerly vRNI) provides visibility into network traffic flows, NSX fabric health, application dependency mapping, and micro-segmentation planning. It integrates directly into VCF Operations dashboards under Network Operations.

The vDefend firewall is unrelated, as it provides workload-level security. The VCF Operations Collector is required for telemetry ingestion but does not provide full Network Operations. NSX itself provides the underlying virtual networking, but it must be monitored through VCF Operations for Networks.

#### NEW QUESTION # 67

Which of the following measures can help optimize memory usage in a busy ESXi host cluster?

- A. Installing and enabling VMware Tools Balloon driver in the guest
- B. Correct sizing of VMs to avoid over-allocation
- C. Using memory reservations on every VM
- D. Configuring Transparent Page Sharing (TPS)

**Answer: A,B,D**

Explanation:

TPS (A) deduplicates identical memory pages, the balloon driver (C) reclaims unused guest memory, and right-sizing (D) avoids over-allocation. Memory reservations on every VM (B) can cause resource contention if overused.

#### NEW QUESTION # 68

An administrator is responsible for a vSAN Express Storage Architecture (ESA) cluster running workloads with a RAID-6 policy. The administrator must enable auto-policy management in vSAN ESA.

What is the minimum number of hosts required for workloads with RAID-6?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

The vSAN ESA documentation in VCF 9.0 explains that auto-policy management dynamically selects the most efficient data placement policy based on cluster size. For RAID-6 (erasure coding with double parity), the minimum required host count is 6. The docs state:

"RAID-6 (Erasure Coding with FTT=2) requires a minimum of six hosts in a vSAN ESA cluster. This ensures that data and parity components can be distributed across unique failure domains." With fewer than six hosts, RAID-6 cannot be enforced and auto-policy management will fall back to RAID-1 mirroring. RAID-6 in vSAN ESA provides higher storage efficiency but comes with stricter host count requirements. Options 2 and 4 are far below requirements, while 8 provides more redundancy but is not the minimum. Therefore, the correct minimum number of hosts for RAID-6 with ESA is 6.

#### NEW QUESTION # 69

.....

Fast2test is one of the leading platforms that has been helping VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam candidates for many years. Over this long time period we have helped VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam candidates in their preparation. They got help from Fast2test VMware 2V0-17.25 Practice Questions and easily got success in the final VMware 2V0-17.25 certification exam. You can also trust Fast2test VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam dumps and start preparation with complete peace of mind and satisfaction.
