However, preparing for the Salesforce-Slack-Administrator test can be challenging, mainly if you have limited time. Here's where ExamPrepAway comes in with actual Salesforce-Slack-Administrator Questions. We at ExamPrepAway are well aware of the importance of the Salesforce Salesforce-Slack-Administrator certification in order to stand out in today's competitive job environment.

Salesforce Certified Slack Administrator Sample Questions (Q144-Q149):

NEW QUESTION # 144

During a re-org within your organization, the IT department is renamed to Business Technology (BT). Many channels will need to change their prefixes from #it- to #bt-.

The original channel creators are no longer at the organization.

What is the most efficient strategy to ensure the channel prefixes are updated?

- A. Write a script using the channels API to rename all channels with "#it-" to "#bt-" in bulk.
- B. Join all public IT channels and request access to private channels in order to update the channel settings.
- C. Promote members leading the IT to BT department name change initiative to the Channel Manager role in the key channels.
- D. Use your preference menu to create an automatic keyword notification for IT and BT.

Answer: A

Explanation:

Slack API best practices specify:

"The channels.rename method within the Slack API allows admins to programmatically rename channels, making bulk updates efficient and standardized." Manually managing through Channel Manager roles (B) or joining channels (D) is slow and error-prone. Keyword notifications (A) don't rename channels.

(Reference: Slack Administration Study Guide - Managing Channels and Using APIs)

NEW QUESTION # 145

You're a Support Agent on the admin team for your organization's Slack Enterprise Grid workspace.

You receive a service request from one of your employees to add 15 new members from a single external company to Slack in order to support a 12-month joint marketing partnership. The team requires multiple channels and members for external collaboration.

How should you respond to the service request?

- A. Advise the employee to initiate one or more Slack Connect channels to collaborate with the external organization. The external organization can set up a free Slack instance if they are not already using Slack.
- B. Advise the employee to request the external users be added to your identity provider (IdP) so they can authenticate to your workspace with SAML single sign-on (SSO).
- C. Advise the employee to set up a separate Slack workspace that is jointly owned by both organizations.
- D. Approve the employee's request, then invite the external users to your workspace as Multi-Channel Guests with a 12-month expiration date.

Answer: A

NEW QUESTION # 146

You've just joined the Org Admin team at your organization.

You notice that the setting for "public file sharing" is toggled to "enabled" in your organization.

What ability does enabling "public file sharing" give members?

- A. Members can share files externally via Slack Connect channels.
- B. Members can share files externally by creating public URLs.
- C. Members can share files in public channels within the Slack Enterprise Grid.
- D. Members can share files with guests in Slack.

Answer: B

Explanation:

Slack's documentation on file sharing specifies:

"Enabling public file sharing allows members to create public links for files that can be shared externally outside of Slack." Public file sharing is about generating external public URLs (A), not internal sharing (B), sharing with guests (C), or Slack Connect-specific behavior (D).

(Reference: Slack Administration Study Guide - File Sharing and Public Link Management)

NEW QUESTION # 147

In your role as an Org Admin, you are advising a user working on a market research project.

The VP of Human Resources requested a sensitive internal report. Typically, communication takes place in a public project channel. What should you recommend the user do?

- A. Post the report in the project's public channel.

- B. Send the report in a DM to the VP of HR.
- C. Create a private project channel to share the report with the VP and anyone whose information is included.
- D. Send the report in a group DM to the VP and anyone whose information is included in the report.

Answer: C

Explanation:

Slack security best practices recommend:

"Sensitive information should be shared in a private channel where access is restricted to authorized individuals." Posting in a public channel (D) would expose confidential information. Group DMs (A) are less scalable and harder to manage. A one-off DM to the VP (C) may not involve all relevant stakeholders.

(Reference: Slack Administration Study Guide - Sharing Sensitive Information in Slack)

NEW QUESTION # 148

Paul leads an accounting team and is implementing a new expense reporting system.

He wants to update employees on the status of the system's rollout to different offices. He also wants to post links to help articles and online trainings that the team can use as resources. However, he wants to maintain control over the flow of information for these updates and would like to minimize off-topic discussion.

Which of the following would help him achieve his goal?

- A. Create a private channel called #expense-system-updates with all employees added.
- B. Create a public announce-only channel for the expense system
- C. Create a new public workspace called "Expenses" with access granted to all employees.
- D. Create a new invite-only workspace called "Expenses."

Answer: A

NEW QUESTION # 149

.....
