C_BCBAI_2509受験対策 & C_BCBAI_2509全真問題集

我々社のSAP C_BCBAI_2509問題集を使用して試験に合格しないで全額での返金を承諾するのは弊社の商品に不自信ではなく、行為でもって我々の誠意を示します。SAP C_BCBAI_2509問題集の専門化であれば、アフタサービスの細心であれば、我々It-Passportsはお客様を安心して購買して利用させます。お客様の満足は我々の進む力です。

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C_BCBAI_2509 試験問題 (Q30-Q35):

質問 # 30

Which protocol enables autonomous AI agents to discover each other, delegate tasks, and collaborate across platforms?

- A. Agent2Agent (A2A)
- B. Agent-to-Orchestrator (A2O)
- C. Model Context Protocol (MCP)
- D. Agent Hub

正解: A

解説:

The Agent2Agent (A2A) protocol enables autonomous AI agents to discover each other, delegate tasks, and collaborate across platforms, as detailed in SAP Business AI documentation. This protocol facilitates direct communication and coordination between AI agents, allowing them to share tasks and data seamlessly within and across SAP ecosystems. This ensures efficient, decentralized collaboration for complex workflows. The Agent-to-Orchestrator (A2O) protocol focuses on orchestration, not direct agent collaboration. The Model Context Protocol (MCP) and Agent Hub are not defined protocols in SAP's framework for this purpose. A2A's design supports scalable, autonomous AI operations, enhancing enterprise agility and interoperability.

質問 # 31

What are some benefits of AI agents? Note: There are 3 correct answers to this question.

- A. Facilitate collaboration
- B. Replace managers
- C. Reduce costs
- D. Boost productivity

正解: A、C、D

解説:

AI agents, as described in SAP Business AI documentation, offer significant benefits to organizations. Facilitate collaboration by enabling seamless interaction between business functions, such as integrating procurement and finance processes. Boost productivity by automating repetitive tasks and providing actionable insights, allowing employees to focus on strategic activities. Reduce costs through efficient resource utilization and streamlined workflows, minimizing manual effort and operational expenses. While AI agents enhance decision-making, they do not replace managers, as their role is to augment human capabilities rather than supplant leadership. Ensuring privacy is a safeguard but not a primary benefit highlighted in the documentation. These benefits align with SAP's goal of delivering intelligent, cost-effective solutions.

質問 # 32

What are some value propositions of SAP Document AI? Note: There are 2 correct answers to this question.

- A. Enterprise-grade orchestration
- B. Secure and compliant frameworks
- C. Scalability and compliance
- D. Preconfigured content

正解: B、C

解説:

SAP Document AI offers significant value propositions, including scalability and compliance and secure and compliant frameworks, as detailed in SAP Business AI documentation. Scalability and compliance ensure that Document AI can handle large volumes of documents while adhering to regulatory standards like GDPR, making it suitable for enterprise environments. Secure and compliant

frameworks provide robust security measures, such as encryption and access controls, to protect sensitive data during document processing. These features enable businesses to extract insights from documents efficiently while maintaining trust and compliance. Enterprise-grade orchestration is more aligned with the Generative AI hub, and preconfigured content is not a primary value proposition of Document AI. These capabilities make SAP Document AI a powerful tool for document-intensive processes.

質問 # 33

Which of the following capabilities are offered by Joule for Consultants? Note: There are 2 correct answers to this question.

- A. SAP Fiori apps smart help
- B. Process automation
- C. Code intelligence
- D. Project lifecycle support

正解: A、D

質問 # 34

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Clean core maintenance
- B. Consent-based model training
- C. Tenant isolation
- D. SAP-hosted AI infrastructure

正解: B、C、D

解説:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.
