

100% Pass Perfect JN0-351 - Practice Enterprise Routing and Switching, Specialist (JNCIS-ENT) Exams

BTW, DOWNLOAD part of PassLeaderVCE JN0-351 dumps from Cloud Storage: <https://drive.google.com/open?id=1XxrhGNj8JMfzCzy8BWopdBH5Jg7RR559>

The Juniper JN0-351 Practice Exam feature is the handiest format available for our customers. The customers can give unlimited tests and even track the mistakes and marks of their previous given tests from history so that they can overcome their mistakes. The JN0-351 Exam can be customized which means that the students can settle the time and Enterprise Routing and Switching, Specialist (JNCIS-ENT) according to their needs and solve the test on time.

In order to provide a convenient study method for all people, our company has designed the online engine of the JN0-351 study practice dump. The online engine is very convenient and suitable for all people to study, and you do not need to download and install any APP. We believe that the JN0-351 exam questions from our company will help all customers save a lot of installation troubles. You just need to have a browser on your device you can use our study materials. We can promise that the JN0-351 Prep Guide from our company will help you prepare for your exam well. If you decide to buy and use the study materials from our company, it means that you are not far from success.

Juniper JN0-351 Reliable Test Preparation, Positive JN0-351 Feedback

To find better job opportunities you have to learn new and in-demand skills and upgrade your knowledge. With the Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 Exam you can do this job nicely and quickly. To do this you just need to get registered in the PassLeaderVCE Enterprise Routing and Switching, Specialist (JNCIS-ENT) exam and put all your efforts to pass this challenging Enterprise Routing and Switching, Specialist (JNCIS-ENT) exam with good scores. However, you should keep in mind that the Enterprise Routing and Switching, Specialist (JNCIS-ENT) exam is a valuable credential and will play an important role in your career advancement.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.

Topic 2	<ul style="list-style-type: none"> BGP: This topic focuses on the operational and conceptual elements of BGP, a cornerstone in enterprise networks.
Topic 3	<ul style="list-style-type: none"> OSPF: The concepts and operational details of OSPF are explored, providing tools for routing efficiency. Configuration and troubleshooting mastery ensure readiness for both the exam and complex enterprise environments.
Topic 4	<ul style="list-style-type: none"> Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.
Topic 5	<ul style="list-style-type: none"> Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.
Topic 6	<ul style="list-style-type: none"> Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 Exam.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q119-Q124):

NEW QUESTION # 119

Which two actions are performed by the firewall filter shown in the exhibit? (Choose two.)

- A. All traffic is permitted.**
- B. Term two requires a fromstatement.
- C. Frames with the 88:05:00:29:3c:de source MAC address are accepted and logged.**
- D. Frames without the 88:05:00:29:3c:de source MAC address are discarded and logged.

Answer: A,C

NEW QUESTION # 120

You deployed a new EX Series switch with DHCP snooping enabled and you do not see any entries in the snooping databases for an interface. Which two Juniper configurations for that interface caused this issue? (Choose two.)

- A. MAC limiting is enabled on the interface.
- B. Dynamic ARP inspection is enabled on the interface.
- C. The interface is configured as a disabled port.**
- D. The interface is configured as a trunk port.**

Answer: C,D

Explanation:

A is correct because the interface is configured as a disabled port. A disabled port does not forward any traffic, including DHCP packets. Therefore, DHCP snooping cannot learn any MAC addresses or lease information from a disabled port.

C is correct because the interface is configured as a trunk port. By default, all trunk ports on the switch are trusted for DHCP snooping. This means that DHCP snooping does not inspect or filter any DHCP packets received on a trunk port. Therefore, DHCP snooping does not add any entries to the snooping database for a trunk port.

NEW QUESTION # 121

Which statement is correct about the exhibit?

- A. All routes from inet.0 will be imported into first.inet.0 and second.inet.0.
- B. Only the interface routes from first.inet.0 and second.inet.0 will be imported into inet.0.**

- C. All the routes from first.inet.0 and second.inet.0 will be imported into inet.0.
- D. Only the interface routes from inet.0 will be imported into both first.inet.0 and second.inet.0.

Answer: D

NEW QUESTION # 122

Your ISP is announcing a default route to both R1 and R2. You want your network routers to forward all Internet traffic through the R1 device.

Which BGP attribute would you use?

□

- A. next-hop
- B. origin
- C. local preference
- D. MED

Answer: C

Explanation:

The BGP attribute that you would use to forward all Internet traffic through the R1 device is the local preference.

The local preference is an attribute that is used within an autonomous system (AS) and exchanged between iBGP routers. It is used to select an exit point from the AS. The path with the highest local preference is preferred. By setting a higher local preference for the routes received from R1, you can make R1 the preferred exit point for all Internet traffic.

NEW QUESTION # 123

You want to ensure traffic is routed through a GRE tunnel. In this scenario, which two statements will satisfy this requirement? (Choose two.)

- A. Tunnel endpoints must have a route that directs traffic into the tunnel.
- B. Keepalives must be used on stateless tunneling protocols.
- C. BFD must be used on the stateless tunneling protocols.
- D. All intermediary devices must have a route to the tunnel endpoints.

Answer: A,D

Explanation:

Option A is correct. For traffic to be sent through a GRE tunnel, there must be a route that directs the traffic into the tunnel. This is typically accomplished through the use of a static route or a dynamic routing protocol.

Option B is correct. All intermediary devices must have a route to the tunnel endpoints. In real-world scenarios, the tunnel endpoints for a tunnel going over the Internet must have globally reachable internet addresses. Otherwise, intermediate routers in the Internet cannot forward the tunneled packets.

NEW QUESTION # 124

.....

There are two big in the JN0-351 exam questions -- software and online learning mode, these two models can realize the user to carry on the simulation study on the JN0-351 study materials, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the JN0-351 Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency to pass the JN0-351 exam.
